There Is a Big Difference in Hybrids

Most Hybrids are made by combining four different Inbred lines. The quality and yields of a Hybrid depend upon the following factors. 1. The kind of Inbreds used. 2. The purity of those Inbred lines. 3. The care used in isolating and detasseling the seed producing fields. 4. The care used in drying and grading the seed.

All our Hybrids are produced from Inbred combinations developed by State or U. S. Govt. experiment stations. These Hybrids are not released to make fat profits for corn companies but simply to give farmers more and better corn. Some companies take these combinations and sell them under a private brand at high prices. You can buy Berry's Hybrids at reasonable cost and secure high quality seed stocks.

Berry's strive to give you these Hybrids at their best. State yield records show that in tests made under identical conditions a certain Hybrid produced by one grower will yield as much as 20 bushel per acre more than the same variety produced by another grower. That is caused by a variation in factors 2, 3 and 4 as given above. Berry's Hybrids are produced from high quality seed stocks. Our standards for detasseling are set to an even closer margin than is required for Certification in most states.

State Certified Seed

State Certification requires that the seed stock be approved by the state, that the isolation of the field and the detasseling must be approved by the state. That the moisture content must be 14% or below by state tests and that the variety in itself must have proven its superiority in yield and stalk strength.

While Certification standards are strict we endeavor to go further than they require both in detasseling and drying. We strive especially to get the best of seed stocks because these factors may mean as much as 20 bu. per acre in yield.

Grades and Prices

The varieties we sell are described on pages 2 to 4. Each is available in Flat Grains or Edge Drop Corn and in Round Grain or Hill Drop corn. Both the Flat and Round are prepared in different sizes. Each size is graded so as to permit a uniform rate of planting. Both Flat and Round are equally productive. See description of varieties for prices.

Quality Counts

We want your seed corn business year after year. There is only one way to get it. That is to supply you with corn that is truly superior in quality and production.

To get better corn we must get purer seed stocks, use extra care in planting, growing and detasseling and do a thorough job in processing. This means delivering seed of high germination that has been carefully graded for uniform planting. It means varieties that are heavy in yield. In short it means satisfaction to you and all this at most reasonable cost. Let Berry's satisfy you on Hybrid Seed Corn. Each year our Hybrid seed business grows because satisfied customers are getting their friends to order from us.

See page 16 for Hybrids for Ensilage.

STANDARD'S 613

One of the Most Outstanding Hybrids Yet Developed

About 110-112 Day Type

This is one of the nicest looking and heaviest producing Hybrids in its maturity class that we have ever seen. This name and number will designate both its general characteristics plus the extra quality we endeavor to give all our Hybrids.

This Hybrid is as pretty as a picture while it is growing and just as good looking and satisfactory at harvest time. It catches the eyes of all who see it growing. Its distinctive dark green foliage marks it during the summer months. Its strong straight stalks will take a lot of punishment.

In the fall the husks on the ears begin to dry while the stalks remain green. That shows the ears in maturing are getting the full benefit of the plant food. No premature drying that results in light chaffy ears. The plants have marked resistance to chinch bugs and drought. All these factors combine to produce big yields and high quality.

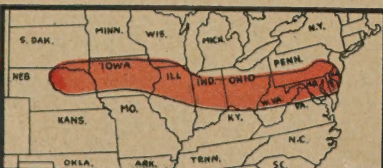

Heavy Yields Fine Quality

The ears of Standard's 613 are well shaped and of good size. It has a fine depth of kernel and these grains are not hard or flinty. Livestock eats it readily. This is a single ear Hybrid and the way they pile up in the wagons at harvest time is a joy to behold. We consider this a top notch Hybrid in its maturity class.

Adaptability

We especially recommend this for any section having conditions similar to north central and south central Iowa. This will take in part of Nebraska and will go on east through Illinois, Indiana, Ohio and Pennsylvania. In southern Iowa, northern Missouri, etc., it will make an excellent early feeding corn or a good variety for late planting.

It has given satisfaction on a wide range of soils. Naturally it will be heaviest in yield on rich ground. On soils of medium or low fertility we believe it will outyield most any variety with which you might want to compare it.

ROUND GRAIN

Supplies are definitely limited this year so please order promptly if you wish some of it. If you want a winner pick Standard's 613.

We are confident you will be highly pleased. It is a money-maker.

ILLINOIS 960

STATE
CERTIFIED

ILLINOIS 751

A Heavy Yielder About 110 to 115 Day Type

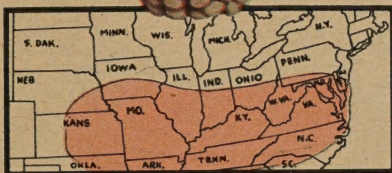

When it comes to bushels of corn per acre, Berry's Illinois 960 is one of the best. You can look through state yield tests, where it is extensively grown and you will see how it rates. In Illinois it was top for a four-year average in the north central, central and south central sections. It showed adaptability to a wide range of soils from high to low fertility.

Our customers write us too, telling about their yields. Richard Bufler, of Oxford, Ohio, sent in some photos and a report on yield. He says he checked 960 against many other Hybrids in every way and 960 proved better in every way. It out-yielded U. S. 13 for him as much as 30%. From Arkansas and Kentucky on east to Maryland and Penn. we have these expressions of satisfaction.

Description

Good solid ears, generally shelling out more bushels per load than any other. Grain medium yellow color, not flinty. Stalks a little taller than the average. A tendency to make two ears per stalk especially on thin planting. Does well under conditions similar to southern $\frac{2}{3}$ to $\frac{1}{2}$ of Iowa and in sections south. Has done fine in Missouri being top among 65 Hybrids making 112.2 bu. per acre. It was tops in eastern Nebraska and Kentucky, Ohio, Indiana, and other states report good results.

There is not much State Certified 960 seed left to sell at the time this catalog goes to press so don't delay ordering. No more this year after present stocks are sold.

Where we suggest planting Illinois 960

\$6⁵⁰ BU.
FLAT GRAIN
\$4⁵⁰ BU.
ROUND GRAIN

A Prize Winner About 108-110 Day Type A Single Ear Variety

A fine single eared Hybrid that is a great favorite with those who have grown it. It contains two of the same inbreds used in making U. S. 13. The ears are not quite as long as U. S. 13 but generally larger in circumference. Many ears have 20 rows of kernels. The grain is of good depth and medium rough. Beautiful golden yellow in color. It is a good pollen producer giving assurance of good fertilization and well filled uniform ears. The ears are well protected by husks. Retains its ears well and is an excellent variety for machine as well as hand picking. It has a strong stalk. In yield it ranks with the best being a heavy producer on a wide range of soils.

Widely Adapted

It is a fine variety for conditions similar to north and south central Iowa, eastern Nebraska and in Illinois, Indiana, Penn., etc. It is used in southern Iowa, Missouri and other southern sections for an early feeding corn or for late planting. You really have to see this corn growing and harvest a crop to appreciate its quality. Buy Berry's Illinois 751 State Certified seed while it is available and get a quality product.

A Winner at Corn Shows

Even in southern Iowa we have many customers who pick it as their main crop variety. It has won first prize in many local corn shows this fall and took sweepstakes prizes over all other Hybrids. When you have a Hybrid that will do that down here among later Hybrids think how it can produce in the sections to which it best adapted, that is north central and south central Iowa and similar sections. Make no mistake—this is a dandy.

BUY EARLY

Hybrid seed corn supplies are relatively short. We advise our customers to mail orders early and be sure of getting exactly what you want.

STATE CERTIFIED

IOWA 939

Best Yielder—6 Year Average—North Central Iowa

This corn took the Banner Trophy in the official Iowa State yield contest for 1939. It had the highest performance score of all of the Hybrids in the entire state test and that takes in all of the best. County reports for 1940 again show its wonderful qualities. It is earlier than 960 being planted throughout the entire state of Iowa. In the southern part of the state and in northern Missouri it is used as an early variety. Iowa 939 holds record as the heaviest producer in both the 6-year and 5-year average.

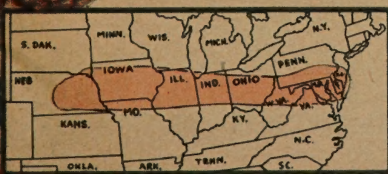

This Iowa originated Hybrid has spread from central Nebraska to the Atlantic coast and its popularity grows. In Iowa it has outyielded o.p. corn by as much as 40%. In Nebraska it has been the best producing Certified corn for an average of the years 1932 and 1939 inclusive. North eastern Colorado for a 3-year average gave a yield of 132.1 bu. shelled corn per acre. In Central Pennsylvania it was the heaviest yielder of all Hybrids. Illinois has official yields of 107.3 and 103.8 bu. per acre. Ohio reported it topped all early Hybrids with a yield of 98.1 bu. It is fine in Indiana. West Virginia shows it doing well as a medium early variety. It is fine for parts of New York and is widely adapted.

Description of Iowa 939

It is a variety of medium early maturity. It forms more uniform ears than many Hybrids, looking more like ordinary corn yet outyielding it materially. The kernels are of a medium rough type. Kernels are fairly broad and of good depth. The sides have a distinctive reddish tinge. They are not as hard and flinty as those of many hybrids and are readily eaten by cattle and hogs.

It has strong roots and stalks. The husks give the ears good protection yet when ripe is a very easy corn to husk. Nearly every farmer that we know of who has grown Iowa 939 speaks very highly of it and wants to continue growing it.

We believe this variety to be adapted to the shaded area shown on the map below.

FLAT GRAIN
\$4⁰⁰ BU.
ROUND GRAIN

TWO TOP RATERS

STANDARD'S 813

U.S.-13

About 120 Day Type
Contains 5 Inbreds

This is a corn that has something few varieties have. Like U. S. 13 it has big strong stalks. Large single ears. Deep soft kernels. Heavy production and all around fine quality. In fact it is U. S. 13 complete with all of its four regular inbreds. Nothing has been taken away but another inbred line has been blended in so as to give you five inbred lines in your field instead of four.

There is a very definite purpose in this and that is to assure better pollination and therefore bigger yields. Most Hybrids have a shorter pollinating period than the old o.p. corn because it has been bred down to four lines. In some years excessive heat and drought may kill much of the pollen. Now, by adding a later pollinating line there will be pollen available for fertilizing even though the early pollen burned. Since silks remain receptive for quite a period there is still time to get fertilization and well filled ears.

There is enough of this latter line to serve the desired purpose and yet not so much as to change the character of the U. S. 13 in any marked degree. The changes that do occur should deepen the color, give it increased resistance to chinch bugs and grasshoppers and greater drought resistance.

Yield Reports

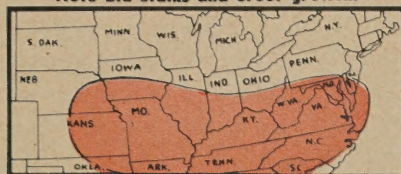

Last year we offered this for the first time and in a contest between customers who bought this we have witnessed yield reports showing yields up to 190.36 bu. at 15% moisture. This was from Andrew K. Hovden, Decorah, Iowa, U. S. Newcomer, Auburn, Indiana, 169.05 bu. Other reports, Green City, Mo., 146.57 bu.; Calmar, Iowa, 137.28; Lakewood, Ill., 131.64. Some were even higher but since no moisture test was secured they were not counted. Surely here is ample evidence of its wonderful yielding ability.

Characteristics

One large ear per stalk. Easy to husk by hand or machine. Dark green healthy foliage. Adapted to a wide range of soil fertility. A vigorous grower. Strong stalks. Stands well and resists drought and chinch bugs. Large deep kernels. High shelling percentage. A fine feeding corn. A longer pollinating period assuring better filled ears under adverse conditions. One of the highest yielders. We consider it tops of all Hybrids.

Picture of a field of U. S. 13 taken on October 23.
Note big stalks and erect growth.

ROUND GRAIN

Big—Single Ear
Deep Soft Grain
Extra Heavy Producer

Never have we seen a variety of corn that had such unanimous farmer approval as U.S. 13. They like its large well formed ears, its fine feeding qualities, its strong stalks and its enormous yields. Looks and feeds like open pollinated corn but what a difference in production. Its nice big ear on every stalk. Its erect growth. Its resistance to chinch bug damage. Its rapid vigorous growth and its fine dark green color. All these are found in U.S. 13. It comes as near to being one ideal corn as any Hybrid.

Yield Records

This is not a corn for northern states but any farmer having conditions similar to the southern half of Iowa will find U.S. 13 a well adapted variety. In Missouri, and Kentucky too and on into the south. Here are some official yield reports.

Iowa—Average of entire southern half of the state. Outyielded all other Hybrids. Top yields 108.4 bu. per acre. **Illinois**—Two year average West North Central—first place. **Ohio**—Four tests in the southern third of the state. First place again with yields of 123.0 bu., 120.6 bu., 108.3 bu., and 103.4 bu. per acre. **Indiana**—Three tests U.S. 13 First Place, top yield 103.2 bu. per acre. **Maryland**—Four tests. First place for U.S. 13 in central and southern Maryland. Yield 134.8% over check variety. **Kentucky**—Uniformly good throughout the entire state and only a fraction of a bushel from 1st place. **Delaware**—First Place for U.S. 13 for a 2 year average. **Pennsylvania**—Lancaster County 2 year average—First Place with a yield of 97.7. **Nebraska**—106 bu. per acre. **Connecticut**—late series test U.S. 13 first place. A leader in Kansas and a great favorite in Missouri.

Supply Limited

We have more U.S. 13 seed than we had last year but the performance this year has been so sensational that the demand has increased tenfold. Farmers who were formerly agents for other Hybrid Companies are buying U.S. 13 now, and those who know what quality means demand Berrys Selected U.S. 13. Read Page 2.

Description

U.S. 13 is a 115 to 120 day type. Rich golden color. Deep kernels. Well shaped ears. Moderately rough. The grain is not hard and will put cheaper gains on cattle than flinty Hybrids. Good height, strong stalks. Easy to husk. The corn that swept the International Livestock show. If you want high quality U. S. 13 Hybrid Seed Corn let us take care of your order. Mail it early.

J. F. SINN
President
Berry Seed Company

A farmer by birth and early training. A man who has had 37 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

He has something special for you on Hybrid Corn and low prices on all seeds.

SAVE MONEY on QUALITY SEEDS EVERY POUND GUARANTEED TO PLEASE

Dear Friends:

Jan. 10, 1942.

The United States has been confronted with an undeclared war, hence prices on all commodities have advanced materially. Now since we have declared war prices are again higher. The Farmers' income has shot up more rapidly than any other class. The farmer is enjoying higher prices for his commodities and his buying power is above parity, in excess of 1929 and the best since the first World War. This means that You have plenty of buying power for all kinds of seeds. While seed prices are somewhat higher they are still below 1937 and you should have more money to buy with.

Seed Crops generally speaking were very short. Red Clover is still cheap while Alfalfa is much higher as only about a half crop was produced. Sweet Clover has doubled in price, but is still cheaper than in 1937. Lespedeza and Sudan Grass are still unusually low in price, but you can look for fireworks in the way of higher prices on Timothy, Sweet Clover and Alfalfa. We specialize in these crops and probably handle more Alfalfa than any other seed house. Accept our advice and buy early, thus save most. You can look for higher prices owing to big demand and scarcity of seed. Buy now while these low prices prevail.

Hybrid Corn is another item that is short, but we still offer the very best varieties at ridiculously low prices. We guarantee anyone ordering from this Catalog will save money. This is your opportunity to save. Our prices are lower than wholesale on many items. This year we can save you far more money than usual. We give you a guarantee to this effect and also give you our word of honor that we will please you.

Garden Seeds have tripled in price on many items, but we still have made our prices lower and more attractive. Get our Defense Garden Collection, one of the biggest values offered today. Nursery stock likewise, is higher but our prices are extremely low. We should be flooded with orders as we never offered greater values than in this Catalog.

I would like to meet every customer and friend and have a heart to heart talk with you. I am sure you would appreciate these wonderful values placed before you and you should place your order promptly with the Berry Seed Company. No one tries harder to save you money.

I believe after you have studied our Catalog you will find the biggest values in the Seed Trade on Farm, Garden and Nursery Stock. I will be looking for your order.

Your Seed Friend,

J. F. Sinn

Greens Fork, Ind.
Dear Sirs: Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.
D. W. HARRIS

Springville, Iowa
Gentlemen: The Marvellous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.
Yours truly,
C. F. BUTLER

Mount Clare, W. Va.
Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.
Truly yours, G. W. CONLEY

New Berlin, Ill.
Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farming friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.
J. W. GERHARDT

Hummelstown, Pa.
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Honest John Alfalfa has given you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.
Yours truly
DANIEL BEHRENS

The Famous

BOONE SEED OATS

DISEASE RESISTANCE

This Boone oat is outstanding in its ability to resist the four leading oat diseases. These are Crown or Leaf rust, Loose Smut, Covered Smut and Stem Rust. Its resistance to stem rust is especially valuable because this disease breaks out severely every three or four years. It is a serious menace to most oats.

Now is the time to start a new variety and when you start take the best. Sow something that will do well year in and year out and over a period of years beat others. This isn't like Hybrid corn that you buy every year. Start them now and you have solved your oat problem with profit for many years. Show your neighbors something about raising oats. You'll probably be in the seed business yourself next year selling your crop of Boone oats at premium prices.

ADAPTABILITY

These are quite early in maturity. They have a strong stiff straw and stand up much better than most early kinds. Kernels are well filled. Color has a yellow cast. We consider these oats excellent for nearly every part of the country where spring oats are sown. We don't believe you can beat these Boone. In southern Iowa they are exceedingly popular and replacing Columbia, Fulghums. This indicates their adaptability in the southern spring oat section. Naturally they are fine either east or west where similar conditions prevail. They should do well in Kansas, Nebraska, South Dakota, Iowa, Minnesota, Missouri and on east to the Atlantic seaboard, including the New England states.

SENSATIONAL YIELDER

An Early Oat Good for 105 Bu. Per Acre

Farmers are clamoring for Boone Oats. Dealers write us "can't you spare us some of your Boone Oats." Agricultural authorities ask us if we have a good supply. Why all this tremendous demand? The answer is yields. Big Bumper yields. Also it is Quality. Disease resistance and Consistently Fine Performance. Never in all of our experience have we seen an oat jump into such high public favor in so short a time. And it did it without any high pressure sales campaign. It has jumped into the limelight purely through superior merit.

Yield Records High

Eighty bushels per acre in an official Iowa test for an average of six years. Once in a while there will be a good oat year when most oats will yield heavily. When it averages 80 over a six year period there, my friends, you really have something. It outyields many late oats over such a period. Illinois official test 104.4 bu. per acre. We do not know of a place where Boone oats were sown that it did not prove a dandy. The more years it is tested the better it should show up. When you run into bad years there is when Boone oats really "go to town" and usually those are years when prices are highest.

A Hybrid Selection

The Boone oat is a selection from a Hybrid between Victoria, a South American oat with wonderful disease resistance, and the Richland, a heavy yielder. This combination makes it a wonderful heavy yielding, disease resistant variety. We urge you by all means to get started with these great oats for you should find them very profitable and satisfactory. Better quality and Bigger Profits. Prices "Certified" seed: 25 bu. or more, \$1.45 bu.; 10 to 24 bu., \$1.50 bu.; Smaller lots, \$1.55 bu. Prices on seed grown from certified stock on Gov't. farm, 25 bu. or more, \$1.20 bu.; 10 to 24 bu., \$1.25 bu. Smaller lots \$1.30 bu.

SEED FROM GOVERNMENT FARM

We secured the entire crop of Boone oats produced this year on the U.S. Gov't. Soil Erosion Demonstration Farm near Clarinda. They kept only enough for their own use this spring. They sell all their grain and grow what will bring them the biggest cash income. The fact they sow Boone oats shows their great merit. They like it because it has a strong straw, disease resistance and big yields. This seed was grown from Certified seed. We have re-cleaned it thoroughly. This is strictly high quality. Order at once if you wish some of these Government Farm Boone Oats.

LOWEST PRICES

from WORLD'S LARGEST SEED HOUSE SELLING DIRECT to YOU!

Our Clarinda plant and main offices are shown above and our Chicago storage location on the left. We are well equipped, financed and located to give excellent service, low prices and satisfactory quality.

TESTED QUALITY

Mr. L. C. Jorgenson is our analyst and has had twenty years of experience. He secured his training through U. S. Government at Washington, D. C.

New Federal Seed Law Gives Added Protection to Mail Order Buyers

A new Federal seed law requires that all seed shipments in interstate commerce be tagged in accordance with the laws of the state into which it is shipped in respect to any noxious weed seeds. In addition the purity and germination tests are to be given. Thus shipments of seed ordered by mail are required to give you truthful information and correct tests on all state and interstate shipments.

Prompt Service—Safe Arrival

We maintain shipping points at Clarinda and Chicago although correspondence and orders are all handled through Clarinda. We are organized to give you prompt service. Improved freight service gets seed to destination promptly. If on arrival of your shipment there is any sign of loss or damage just have your agent mark it on the freight bill. Send it to us and we will make prompt adjustment. Address all letters to Clarinda, Iowa. We have no office in Chicago.

If you want a receipted invoice ask for it on your order.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. Our guarantee protects the buyer and is lived up to, so it means just what it says.

BERRY SEED CO.,
 Clarinda, Iowa.

**PLANT the BEST
 QUALITY SEED
 for BIGGEST
 CROPS and PROFITS**

DIRECT BUYING

The Sensible
Thing to Do

Markets Strong—Buy Early

Bad weather conditions have caused a drastic reduction in many lines of seed. Alfalfa and Sweet Clover are very short. The Timothy supply is limited. The government is buying Clover to ship abroad under the terms of the lend-lease act. All these things make for advancing markets. We strongly and sincerely urge our friends to buy grass, clover and alfalfa seeds early this year. Present prices will be protected as long as supplies last or until market advances make duplication of present values impossible.

You will find our prices in this book to save you big money for in many instances they are at wholesale levels. The savings to be made by buying direct from Berry this year are unusually large. See page 8 for our guarantee of satisfaction to you.

BERRY'S SEED GRADES

World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

Planet Brand

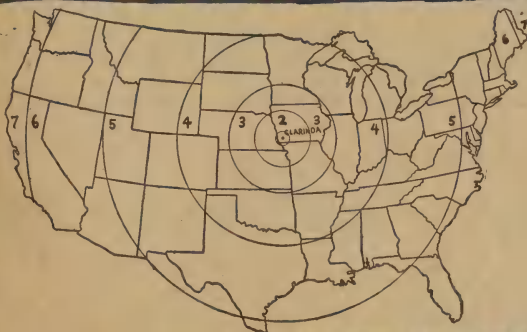

This extra choice grade satisfies many customers. Not quite so bright and uniform but they report good seeding at low cost.

Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it can perform well.

Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

AAA PAYMENTS FOR SEEDINGS

These payments are made in accordance with regulations set up for various sections. The kinds of seedings and rates of seeding required are not all the same. We understand there are no major changes contemplated in the 1942 set up although there is some change in rates. As we understand it the following are payments made in many states by A.A.A. They designate the areas in which payments are made.

We do not guarantee these payments will be made. Your local committee can advise you as to any variations to the above for your section and rates of seeding required.

\$1.50 per acre—Paid for seeding Alfalfa, Brome, Grass, Wheat Grasses or combination of these. This rate may be higher in some states and apply on Sericea Lespedeza in some sections.

75c per acre—Paid for seeding. Red, Alsike, Mammoth, Clover, Korean Lespedeza, Blue Grass, Orchard Grass, Reeds Canary Grass, Meadow Fescue, Domestic Rye Grass and Mixtures containing 50% clovers balance Timothy. This includes mixtures like our Lot Economy page 38, and Lot Just Rite page 32.

50c per acre on seeding Sweet Clover.

40c per acre—Paid for seeding Timothy or Red Top or a Mixture of these two. This also applies to most other mixtures.

PASTURE IMPROVEMENT PAYMENTS

15c per pound but not to exceed \$1.50 per acre for reseeding depleted pastures with adapted pasture grasses, perennial or biennial legumes or approved pasture mixtures. This should include those listed above under 75c an acre for new seedings.

5c per pound but not to exceed 75c per acre for seedings of Red Top or Timothy or Mixtures of these which may include a mixture of Korean Lespedeza.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted post-paid be sure to remit to cover postage. First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3 1/2c
Zone 5	11c	5 1/2c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds. $9 + 18 = 27c$ total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you want an A.A.A. receipt, ask for it on your order.

COMPARING ATLAS GROWTH WITH HEGARI
SEE ALSO 2 FIELD PICTURES BELOW

HEGARI - 6 Foot

ATLAS SORGO

THE HEAVIEST PRODUCING SWEET SORGO

See page 41 for Chicago prices

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre, where corn yielded half as much. In dry seasons our produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their livestock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

State Certified Atlas the Best

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

We handle only State Certified seed because it is so difficult to distinguish Atlas seed from others. State Certified stock comes from approved seed and fields are inspected. Certified Stock is safest.

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

NOT SEALED IN LESS THAN 50 LB. BAGS

ATLAS - 12 Feet

BILLION DOLLAR GRASS

A QUICK GROWER AND HEAVY PRODUCER

See page 41 for Chicago Prices

This crop, also known as Japanese Millet, is a sensational producer. Yields of 26,000 to 50,000 lbs. of green feed per acre produced under favorable moisture conditions. Seed yields of 1000 to 2000 lbs. per acre. Also has made astonishing yields under dry conditions here in southern Iowa. See photo of seed field produced under of the neighborhood. In Iowa, Missouri, Minnesota, Wisconsin and on east and up into New England states it has made big money making yields. No wonder these farmers like it. You too may find it one of the best profit makers on your farm. Make the acres you have in forage crops produce to the utmost.

A Fast Grower

Makes a hay crop in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. per acre although some sow less. Grows up to 6 and even 8 feet high. Valuable feed for dairy and young cattle and sheep. Does not become poisonous due to drought or frost. Generally makes its heaviest growth on fairly fertile moist land.

The seed we have for you is well re-cleaned. Our price on this seed is low. Costs only around \$1.00 an acre for seed.

NEW CROP
SEED**

GROW IT THIS YEAR

A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

Priced Very Low

Our price on Sudan Grass seed is again very low this year. This crop is subject to sudden price variation and often makes sensational advances about seeding time. We advise laying in your supplies early as we contracted our present stocks on the basis of low markets. Considering quality you should find a big savings in our present quotation.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get good bargains by buying now.

MIXED MILLET

**Serviceable Seed at
Low Cost**

Here is really a bargain in Millet for a hay crop. It is practically all German type Millet but contains a little percentage of other millets that make it unsuitable to use for seed production. For a hay crop, however, it makes a wonderful seeding and should produce a yield equal to a straight German type. This lot varies a little from bag to bag but is mainly German type stock.

**\$1.40
BU.
50 LBS.**

These taller growing, heavy producing, hay millets are in big demand. You can buy this Mixed Millet at a very substantial reduction in price. It will give you a great big practical bargain. This seed is new crop seed of good germination. It is nice bright plump seed. The seed has been re-cleaned for the removal of impurities and our analysis shows it free of bad weed seeds.

This is one of our best selling values. Farmers who do not care about a pure seed crop like this mixed millet to get heavy hay production at a lower seeding cost.

See page 41
for Chicago
prices.

SOY BEANS

**Save by Buying
DIRECT**

A Fine Cash Crop

Soybeans are taking their place as one of the important grain crops. They are bought and sold like other grains in many markets. There is no longer much question as to a market for your crop. You can cash in on them like wheat or corn if you do not wish to use them on the farm.

Many farmers do not harvest for beans but rather prefer to take the crop in the form of hay. They produce heavy yields and the hay is of high value being practically equal to Alfalfa in feeding value. No need to be without plenty of rich hay if your clover or alfalfa fails. Sow soybeans. They stand heat and drought and deliver the goods.

Good Profit in Beans

Soybeans are widely used instead of small grain crops and are generally found more profitable yielding up to 25 to 30 bushel per acre. On account of their heavy growth they are not suitable as a nurse crop for grass or clover seedings. Soybeans are legumes. They gather nitrogen from the air for their growth. They have a dense root system and make soils mellow.

The seed we have is cleaned and much more satisfactory and economical than stock containing a lot of split beans. Send us your order for beans. The quality and savings must please you or you can have your money back. See Guarantee Page 8.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid prices on Berry's Nodule Germ Inoculator for Beans and Peas: 1 bu. size 30c; 2 bu. 50c; 5 bu. 90c; 10 bu. size \$1.50 and a 25 bu. size \$2.75. Also see page 41.

Types of Soy Beans

Dunfield Type. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

Manchu Type. An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

Illini Type. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Kingwa Type. A Black Soybean of outstanding merit and quality. According to all customers reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Heavy producer and excellent quality hay.

Virginia Type. Hay bean. Makes large growth with enormous yields of hay. One of the best for poor land. Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41

COWPEAS

This is a money making legume. A soil building and hay crop that is widely used.

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. Our seed stock is good. See quotations page 41. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

Inoculate Cowpeas. Sow 90 lbs. per acre broadcast or 40 lbs. in rows 24 inches apart.

Cowpea Types

Whippoorwill Type. Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color.

Gray Goose Type. Large seeded variety. A prolific producer. Plants half bushy. Very popular and considered a valuable variety in many sections. May be known as Taylor or Gray Crowder to some farmers.

Mixed Cowpeas. Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All reclaimed stock. We have a big call for mixed cowpeas. See page 41 for Clarinda and Chicago prices.

FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1¼ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do. Inoculate Field Peas. Shipment is guaranteed to please you in every way. Crop limited but our prices low. See page 41. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased. Yours truly,

H. C. STRASEN.

CROPS of SPECIAL VALUE MILLETS

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Peas, Vetch, Rape, Rye, Barley, Oats, Wheat, etc. Sow 40 to 50 lbs. per acre early in spring. This is a great pasture combination at low cost. See page 41 for Clarinda and Chicago prices.

GERMAN OR GOLDEN TYPE

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and we guarantee shipment to please you. See page 41 for Clarinda and Chicago prices.

WHITE WONDER TYPE

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut just when seed heads are beginning to form.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land.

SIBERIAN OR EARLY RUSSIAN TYPE

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

PROSO-TYPE MILLET

Also Known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible.

DWARF ESSEX RAPE

**Reduces Pork Production Costs
Enormous Producer—Grows Quick**
See Page 41 for Clarinda and Chicago Prices

Last year some Rape seed that was imported did not have all the characteristics of the real Dwarf Essex type. This year we contracted a moderate supply of Genuine Domestic grown Dwarf Essex so you can be assured of getting this on your orders this year. Supply limited so order early.

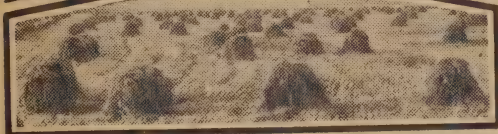

Sow this liberally and cut pork production costs. Lower pork costs are desirable. That means better profits. Lower your production costs and make still more money. Every hog grower can produce pork at lower costs if he has a good rape pasture.

Rape is exceedingly rich in protein, analyzing as high as 37%. Think what this means when yields run as high as 24,000 pounds of green feed per acre. Young pigs especially need lots of protein if they are to make the most rapid and economical gains. It is far cheaper to grow protein in the form of rape pasture than to buy it in the form of tankage or other feeds.

Sow about 5 to 6 lbs. per acre any time from oat seeding time to early July. Pasture six to eight weeks after seeding.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. 5 lbs., postpaid, \$1.50. See price list for quantity prices, page 41.

Friends, if you really know the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,
CHAS. KEOWN.

SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 40-41.

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber Type. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange Type. Heavier stalks, more abundant leaves. Head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Sorghum Amber Type. Secured by us for Molasses purposes. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

Red or Orange Type. More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with sorghum makers.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 1 lb., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

KALO

This is Early Kalo. A drought resistant grain sorghum. Heavy in production. Becoming very popular in sections outside regular grain sorghum section because of its fine quality and wide adaptability. See page 41 for prices.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

Our Kaffir type grain sorghum is used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. Our seed is well graded. Prices are very low on both Red and White Kaffir.

SEE
PAGE
41
for
SALE
PRICES

Feterita

Our Feterita Type Grain Sorghum is a great drought resisting crop. Earlier than Kaffir. Has a higher protein content. A very heavy producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs.

Postpaid, Feterita or Kaffir
1 lb., 20c; 5 lbs., 75c

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. Clarinda-Chicago Prices Page 41.

Postpaid, any of above five crops. 1 lb. 20c; 5 lbs., 75c.

HEGARI

Our Hegari Type sweet sorghum is somewhat similar to Atlas (page 10), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 90 lbs. per acre. Postpaid 5 lbs. for 75c. See page 41 for quantity prices.

MILO MAIZE

Our Milo Maize type grain sorghum is similar to Kaffir. The stalks, somewhat more pithy, are considered one of the best drought resisters. The grain makes fine feed. White in color. Follow suggestions given for Kaffir in planting. Milo is a good yielder. Widely used for Chicken feed. It is grown in place of corn in sections of extreme drought. Farmers who have grown these grain sorghums generally want at least a few acres. See page 41 for prices. Small lots postpaid 1 lb. 20c; 5 lbs. 75c.

BARGAIN PRICES**SEED
POTATOES****Better Seeds—Better Crops**

Most experienced potato growers have learned that it pays them to plant new northern grown seed potatoes every year. The extra yield and finer quality generally makes it profitable to get new northern grown seed each year. It pays to plant better seed. The difference in cost is not a big item. The satisfaction of heavier yields and better quality makes the investment a wise one.

NORTHERN GROWN SEED DESIRABLE

Our experience has been that our customers are best satisfied with northern grown seed stock. Practically all of our seed comes from Minnesota and is a type of seed that we can guarantee to show up to your satisfaction. If you are not thoroughly pleased with your shipment, write us for shipping instructions and a refund. Our potatoes are all secured for seed purposes only. We endeavor to obtain the finest quality to sell at the low price we make.

**WARBA—AN EXTRA EARLY POTATO
An Extra Heavy Yields**

It is a creamy white potato yet earlier than the earliest red variety grown in Minnesota at the time of this writing. It is roughly about eight days earlier than the early Ohio. Warbas are fine for earliest market or for home gardens.

The Warba is a blocky type of potato similar to the Irish Cobbler. The Creamy skin is suffused with pink around the eyes. Eyes somewhat deep. The foliage is very resistant to disease such as mild and crinkle mosaic. This potato has a wide adaptability, producing its finest texture and quality on soils that are not extremely heavy.

This variety has certainly come up fast in popular favor because of its earliness, yield, color and quality. If you want something extra early be sure to order some of our Warbas.

EARLY RED RIVER OHIO

This is a standard early potato. We know of no early potato in bigger demand as a table variety. They have a fine quality and an enormous producing ability. Early Ohios are well suited to heavy gumbo soils as well as to sandy areas. Its wide adaptability makes it a great favorite.

The color of the skin is pink to light red. Flesh white. The tubers are oval in shape and slightly flattened. Eyes are moderately shallow. Very little waste in peeling. They are easy to dig. Northern grown seed generally matures earlier which is another reason for getting such seed stock. As an all-around early, heavy yielding fine quality potato you will find early Red River Ohios hard to beat.

IRISH COBBLER

Also an early potato although about a week later than the Ohios. It is a great potato and the results our customers have secured from our seed has brought us most enthusiastic letters. They report enormous yields and fine flavored quality.

Both skin and flesh are white. It is a blocky type, roundish and slightly flattened. Eyes are relatively deep. Plants are sturdy. An excellent potato for clayey type soils.

The Cobbler cooks dry and mealy. Tubers grow to good size and are good keepers. It is truly a fine potato. You may have grown Irish Cobblers before but we urge you to plant some of our Cobblers this year. Our prices are low and we believe you will harvest a crop that you can really brag about.

GREEN MOUNTAIN

A medium late variety of exceptional quality and fine flavor. Produces heavy crops and is a good keeper. It has a creamy white skin that is slightly netted which is a general indication of fine quality. The tubers are round to oblong and slightly flattened. Eyes are few and shallow. The plant is a very vigorous grower and produces well on both heavy and lighter soils.

The flesh is white and fine grained. Cooks dry and mealy. Retains its fine quality during the winter. It certainly is a dandy main crop variety. For big quantity and fine quality production it is hard to excel.

RUSSET BURBANK

We classify this with the Green Mountain as a medium late variety. Also a quality potato and one of the very best for baking. A moderately long potato slightly flattened with rounded ends. Color of skin is yellowish or golden brown. The eyes are shallow. Flesh is pure white and solid. It is a stronger grower and we consider it better than the average in disease resistance. The Russet Burbank is a heavy yielder. It keeps well and is a very fine medium late potato.

RURAL NEW YORKERS

This is a late potato. One of the best keepers. Has white skin and flesh. The tubers are round to round oval and somewhat flattened. Eyes are shallow. Stems and foliage are dark green.

This variety is exceptionally drought resistant. It is a great yielder and is our choice as the best of the late varieties. It has a wide adaption. We recommend our Rural New Yorker to those wanting a good all around late potato for market or home garden. It combines big yields with fine quality and excellent keeping characteristics. They're good till new crop comes on in the spring.

Small lots, any variety. Postpaid to 4th Zone: 1 lb., 20c; 5 lbs., 65c; 10 lbs., \$1.00.

The modern method of checking disease on potatoes. No soaking necessary. Just mix, dip, drain and dry and your potatoes are ready to plant. Controls such costly diseases as scab, rhizoctonia and black leg. Increases yield 15 to 25%. One pound treats 30 to 35 bushels.

Prices: Prepaid, 4 oz. size, 25c; 1 lb., 75c.

Twinbrook
Farm,
Emaus,
Penna.

Dear Sirs:

I have been using your seeds for thirteen years which in itself means quite a lot. I have found your seeds satisfactory and always saved money by buying from your Company. My Sudan was wonderful and your Dakota No. 12 Alfalfa was the only field in the neighborhood that did not show bare spots after the first winter.

Yours,
P.G. Lichtenwalner.

LOWEST PRICES

SEED CORN

OPEN POLLINATED VARIETIES

See pages 2 to 5
for Hybrid Corn

The Open Pollinated corn described on pages 56 and 57 is stock that we secure from reliable parties. It is all well dried, carefully graded stock of high germination. There are early, medium and later kinds. No definite maturity date can be guaranteed as that depends upon soil and seasonal conditions. Our guarantee of satisfactory shipment is given above.

The varieties of Open Pollinated corn listed in our catalog are secured by us under the names given herein. They are not represented as having all the nationally or regionally recognized characteristics for varieties having the same name. It is all corn that we believe will give our customers very satisfactory crops.

GRADES

Our O.P. Corn comes only in one grade which is the Edge Drop or flat grained type. The Hybrids come in the Edge Drop and Hill Drop (round grains). Both Edge and Hill Drop are graded to different sizes so that uniform planting can be secured from all of them. Round or Hill Drop is cheapest.

ECONOMY OF BETTER SEEDS

Nearly every experienced farmer knows that the seed he plants has an influence on the yield he obtains. Our open pollinated corn costs you only a little over 25c an acre for seed. Such a small expenditure may readily bring you 5 to 10 bushels more corn per acre. Our Hybrids cost only about 50c to 75c an acre and have increased yields 10 to 25 bushels per acre. Better seed corn is a profitable investment.

PRIDE OF IOWA

This corn should mature a little earlier than New Perfection and run it a close second for yield. It is a rougher type than our Reids Dent. In size of ear it should average somewhat larger than Reids but not quite as big as the Perfection. It is not a flinty corn. Easily chewed by hogs. We classify it as about a 110 day variety.

This corn should please the average grower who wants corn of medium maturity, that is moderately rough in type. It is a kind of corn that has long been popular with our trade and is a very satisfactory variety of open pollinated corn.

NEW PERFECTION

This is shipped from Clarinda only

This is a large eared yellow corn. It has big ears. The kernels are broad and thick. They are moderately rough. Runs 16 to 18 rows of kernels per ear. Some customers like this big eared type corn better than Hybrid. It is a vigorous grower. The grain has a beautiful yellow color. It is a heavy yielding open pollinated corn. We know of none better. Maturity in this section classified as 110 to 115 day. You can save seed from New Perfection for replanting. We consider this superior to our old Big Perfection. Our seed is Iowa grown. If you want a big open pollinated corn that is not very late we believe you will like this extra well. A very heavy producer. Price 1 bu., \$2.50; ½ bu., \$1.30; ¼ bu., 70c. Postpaid 1 lb., 25c; 5 lbs., \$1.00.

Merko

Corn Treatment
only 3c per acre

Apply as a dust any time before planting. Controls seedling blight and root and stalk rots. Increases germination. Permits earlier planting. One pound treats 8 bushels. Directions furnished.

Postpaid: 4-oz. tin, 50c; 1 lb., \$1.25.

HYBRID CORN FOR ENSILAGE

In Northern Sections

The outstanding qualities and grain yields of Hybrids are making them more sought after for ensilage purposes. The matter of seed cost is an important consideration in planting ensilage. However, the principal thing is the production and quality. A little more per acre spent for seed may mean a great deal more in profit.

We have a little surplus of round grain corn in some of our leading Hybrid varieties that will make wonderful ensilage corn in northern sections. Leading varieties as described on pages 2 to 4 and some new outstanding varieties not yet listed in catalog because of limited supplies. You will receive a straight unmixed variety, our selection. Strictly high germination and fully equal to flat grain seed in production.

Plenty of grain in your ensilage increases its value. All of our Hybrids have high yielding records. We will ship you stock that are main crop varieties in the main corn belt which we consider excellent for ensilage in northern states. This seed is good. The price is low. Plant some this year and watch it grow.

\$3⁵⁰ BU

LARGER YIELDS MAKE BERRY'S SEED CORN A WISE INVESTMENT

RED WHITE CAP DENT

This year we have just a limited supply of this famous Red White Cap. It is a cherry red corn with a light colored cap on the tip of each kernel. It is an early maturing variety being generally classified as a 90-day corn. It is highly popular with feeders. Many consider it by far the best early feeding corn they can raise. It is an exceptional producer. Good length ears, medium depth and fairly broad kernels. Gives corn to feed ahead of most any other. We certainly can recommend this distinct, early maturing and heavy yielding corn.

SILVER KING

A very early white, also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

FLINTS

Extra early maturing corn. Eight rowed broad kernels. Can be planted close. In demand for early feed or late planting.

Longfellow—A prolific yellow flint. Large wide kernels.

Silver Triumph—A fine white flint quite long eared.

1 lb. any variety on this page 25c; 5 lbs. 75c post-paid.

GOLDEN GLOW

A heavy producing early yellow corn. Stalks somewhat taller than the average corn of this early maturity. Very popular with northern growers and those wishing an excellent early feeding corn.

Fine yellow color. Kernels of medium depth. Good, solid, well filled ears, medium size. Prolific yielder. Maturity around 95 days. If you want a good early maturing yellow corn we feel sure you will like our Golden Glow.

See page 41 for Clarinda and Chicago prices.

REID'S DENT
Also sold as Early Yellow Dent. Comes between Reids and Golden Glow for maturity. May be classed as around 100 to 105 days. Ears a little smaller than Reids. Kernels smoother but very definitely not a flinty corn. This is our best selling o.p. corn in the earlier factory o.p. variety.

WHITE WONDER

This kind of corn is also sold as Boone County White by some dealers. It is a large eared white corn with a white cob. The ears are sometimes 12 inches long and are large in circumference. It is good solid corn but not flinty. The grains are quite deep and somewhat rough. It produces prolifically. We have no white corn that will outyield it with the possible exception of St. Charles White. It is however grown more extensively for ensilage.

This corn should be classified as a 115 to 120 day. A little later as a rule than the Silver Mine described below. White corn is generally considered best for poorer land. We have heard farmers contend that this kind of white corn is the most profitable open pollinated corn for any kind of land. As one man said, "It was a mortgage lifter for me and it will be for anyone."

Seed corn is a big money-crop. It costs so little to plant an acre. Less than a bushel increase in yield pays the extra cost of planting good seed. Let us supply you. See page 41.

KRUG'S DENT

We consider this corn to rank along with our Pride of Iowa for yield, perhaps somewhat better and still it should run around 5 days earlier in maturity. The original Krugs made a great record in Illinois, outyielding all other open pollinated. It was the best of 118 kinds in the test.

The ears may run a little smaller than Reids but there are lots of them. They are firm and solid. The grain has a rich yellow color. You should find in this corn a combination of relatively early maturity and heavy production. A little later than our Golden Dent, but we believe it will outyield it several bushels per acre on the average. We do not claim it equal to our Hybrids described on pages 2 to 4, but we do consider it a very good open pollinated corn.

SILVER MINE

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe and profitable kind to grow. It makes friends everywhere it goes.

ST. CHARLES WHITE

The Famous Red Cobbed Ensilage Corn

This is an enormous producer having tall leafy stalks and large white ears. The grains are clear white, deep and large in size. Medium rough type. Leaves are broad and succulent. It is used extensively for ensilage in the Northern states. Yields up to 40 to 50 tons of green feed per acre. Grown as a main crop variety in this locality and south.

Makes a good milling corn on account of its clear color. Customers tell us it is the most sensational producer they have ever grown or seen. We have some very nice graded and tested seed.

VANGUARD

Canadian Grown

The GREAT STEM RUST RESISTANT

An Amazing Yields

Canadian Certified

A sensational variety brought to you at its best through Genuine Canadian Certified seed.

Characteristics of Vanguards

This variety was originated in Canada by crossing two varieties in an effort to secure an oat that was highly resistant to stem rust. This stem rust disease often reaches epidemic proportions and causes tremendous losses in oat yields. The Vanguard oat not only has proven highly resistant to this stem rust but a leader in production. In most sections covering Canadian tests Vanguards were top in the yield test. In a few tests the Victory was better. Both are very fine yielders. The grains are large and heavy. Percentage of hulls somewhat less than average.

Economy of Seeding

Vanguards have proven prolific stoolers. Many sow only a bushel per acre which is enough in a favorable season. Normally we believe $1\frac{1}{2}$ to 2 bushels per acre is better. Too heavy a seeding may make too much straw and reduce grain production. Our seed is genuine new crop Canadian grown. We ask no premium prices. Don't be misled by considering a higher price means a better quality or a different oat. Shipment guaranteed satisfactory. See page 41 for prices.

This is the variety that produced such sensational results in many states last year. Farmers were simply amazed at the returns they received. Many farmers came in to tell us about their yields. Ninety, one hundred, a hundred and ten bushels per acre. They brought bundles of the oats with them to show the tall strong stems and the large heavily laden heads. You should have heard their enthusiastic comments on how those oats stood up and how completely satisfied they were with their Vanguard Oats.

Importance of Northern Grown Seed

Northern grown seed has shown definite superiority in production. While local grown seed will grow all right the increase in yield from northern grown seed should make it profitable to buy new seed every year. It should be remembered that these are a little later type of oats and northern grown seed seems to come to maturity somewhat quicker. Also they appear to have added vigor and vitality. We believe that the difference in yield between northern and local grown seed may range from 10 to 20 bushel per acre. It looks like poor economy to save \$1.00 or so an acre for seed and risk such a reduction in yield. Our supply of these fine Canadian Certified Oats is limited. Order Early. See page 41 for prices.

SEED OATS

BIG GRAIN

VICTORY TYPE

Northwestern Grown

This, like the Vanguard, is also a big grained heavy producer. In some tests has outyielded Vanguards. Extra heavy seed stock weighing around 40 to 42 lbs. per bushel. Plump, bright, meaty kernels. Let us show you how fine they are. Ask for sample. See for yourself how exceptionally fine they are. More and more farmers are finding much better profits through sowing better seed. It is a wise investment that pays big dividends.

You can order these oats with the distinct understanding that you will receive a shipment of as fine an oat as you ever saw. If they disappoint you in any way write us for shipping instructions and refund.

Our seed is all northwestern grown. We pay premium prices and high freight rates to get them. We do this because we know our customers will get better yields and finer quality. It pays to pay a little more and get this kind of seed. Has straw of good length and strength. Stools freely, yields heavily. Similar in maturity to Vanguard. They are not real early. Especially productive with cool seasons. Sow around 2 bushels per acre. We have sold this Victory type for several years and they have proven highly satisfactory. See page 41 for Clarinda, Chicago Prices.

GOPHER^{TYPE} OATS

Here is an early oat we are sure you will like. They are the choice of many farmers and deserve wide popularity. Gopher oats were developed by the Minnesota Experiment station. It is a selection from the sixty day oat. It is a white kernel oat and of an early strain. Gophers were developed to provide a good early variety for the northern edge of the corn-belt. It is suited especially to southern Minnesota and experiments by the Illinois station prove them to be a fine early oat for the northern half of Illinois. It ranked first in a four year average at Urbana with a yield of 70 bu. per acre. This would indicate its adaptability to much of Iowa, southern Wisconsin and Michigan. Also northern Indiana, Ohio and sections having similar seasonal conditions.

Its characteristics are earliness, stiff straw and high yield. Produces somewhat plumper kernels than some other early strains and its white kernels make it a favorite over other early ones with many farmers. We believe you will like our Gopher Type oats and that you will find them a productive oat of high quality.

Suggestions for Getting Better Oat Yields

A double discing before seeding will generally result in better yields than just discing in oats. Drilling is preferable to broadcast seeding. It gives the seed more uniform covering and requires less seed per acre. Drilled oats are more satisfactory for a nurse crop than a broadcast seeding. An early seeding is desirable as it provides the oats with a longer period of cool growing weather. Fertilizers for oats alone may not be profitable but usually pays when grass or clover seeds are sown with it. Seed treatment is profitable. See Ceresan on next page.

See page 41 for prices f.o.b. Clarinda and Chicago

BETTER SEED OATS

LARGER YIELDS

COLUMBIA

Every farmer we know of who has grown our Columbia Type oat is a booster for them. They are a development of the Fulghum but often superior to them in that they may be sown as much as three weeks later and still be a leader in yield. The increase in production has ranged from 5% to 25% depending on season. Some years other oats do well but the Columbia nearly always ranks a leader.

Columbia oats are also similar to Burt oats but plants are taller, heads longer and more erect, and the straw much stronger. The kernels have light stripes on the back and are usually awnless. It is always one of the earliest oats to mature. Its wide range of seedling dates, its resistance to unfavorable conditions and early maturity make it one of the surest heavy yielding varieties. We recommend this variety strongly because of the satisfaction it has given our customers.

Our seed is cleaned and is priced low. See page 41 for Clarinda and Chicago prices.

CERESAN

Disinfects small grain for two cents a bushel

A dry treatment. Easy to apply. Controls stinking smut of Wheat, covered smut and stripe of Barley and loose and covered smut of Oats. Does not cause seed to lodge in drill. Measuring spoon in each can. Half ounce treats a bushel. Makes for better stands and larger yields. Many Agricultural authorities advocate its use. We recommend it highly.

Prepaid 1 lb. enough for 32 bushel only
75c; 5 lbs. for \$3.00.

FULGHUM

Our Fulghum Type oats are of a quality guaranteed to please you. We consider the Fulghum oat as one of the heaviest producing of the early varieties, especially when sown early. It outyielded other varieties by 12% to 17% in a seven-year test. Kernels are medium size. Golden yellow color. Straw relatively short. One of the best to stand up on rich land and to outyield on thin land as well.

Fulghums are especially resistant against smut. Where Khersons showed 25 to 40% hardly a trace could be found in the Fulghums in the same test. These oats are harder than most oats. They are sown in the south as a winter oat. Best results in the north come from very early seeding. For later seeding use Columbia or Iowar. We recommend our Fulghum Type oats highly.

SWEDISH TYPE

Our Swedish Select type oats are large heavy grained kernels. Plump, meaty white oats. The stiff straw is fairly long. The grain is borne on spreading heads. Somewhat later than Iowar and Columbia. It is indeed a beautiful sight to see these large heads drooping with a load of these fine heavy grains. And that brings added profits too for oats such as this type has yielded over 100 bushel per acre. With proper weather it is amazing how these oats can produce.

Our northern grown seed stock is well cleaned and we guarantee to ship you seed that will please you. If you do not consider it one of the finest lots of oats you ever saw, write us for shipping instructions and refund. We pay good prices to get such seed. Our price is low for this quality. Sow better, bigger, cleaner northern grown seed. It takes good seed to get more profitable oat production. Clarinda and Chicago prices page 41.

HULLESS OATS

Big Yields—No Waste—Fine Feed

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grains similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to help prevent smut we treat all our Hulless oats with copper carbonate to destroy smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have attractive prices and ample stocks this year.

IOWAR

Another dandy early oat. Dependable and very satisfactory. We have a very nice stock of Iowar Type oats. The Iowar variety was originated at the Iowa Experiment Station from a 60 day variety. It is a very fine early white oat. It outyields both the old Iowa 105 and 103. Grows a longer straw than most of the older early varieties. The grains are of medium size and have a thin hull. A fine feeding oat. Has a small black awn on each kernel.

This type of oats because of its earliness is grown over a wide area. It is used in southern Iowa and northern Missouri and is a fine selection for sections having conditions, similar to Iowa and somewhat further south. It is perhaps the most widely grown type in Iowa and surrounding states. Farmers in eastern states wanting a good early variety should like them very much. It is a real good oat. Our seed is reasonably priced and shipment is guaranteed to please you. See page 41 for prices.

SPELTZ

**ALSO CALLED
EMMER**
NORTHERN GROWN
Great Drouth Resister. Practically Rust and Smut Proof. A Good Producer. Dandy Feeding Grain

This grain is one of the oldest grains known to mankind. It was apparently grown in prehistoric times. German-Russian immigrants introduced it to the United States.

It is a remarkable spring grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a nutritious feed. The kernels with the hulls removed have about the same composition as wheat. Best as ground feed. Highly resistant against rust and seldom injured by smut. Also an excellent drought resistant grain. A good producer and under drought or rust conditions it is especially a desirable crop. Matures early. Makes a good nurse crop. Grown from Canada to Texas. Iowa, Minnesota, Wisconsin, Michigan and other states are growing it as well as Western States where drought conditions generally prevail.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow $2\frac{1}{2}$ bu. per acre. Set drill for as for oats but not too close. It is a remarkable grain crop. Its nice heavy grains will delight you. Splendid for all kinds of stock.

See page 41 for

ON ALL
SEED GRAINS
SLASHED**

**SPRING
WHEAT**

NORTHERN GROWN

THATCHER TYPE

Exceptionally Rust Resistant

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of $2\frac{1}{2}$ to $3\frac{1}{2}$ times as much wheat per acre grown side by side with the other varieties. If you live in a section having rains, morning dews and relatively high humidity by all means grow Thatcher wheat.

Thatcher has a very strong straw. Not as tall as some varieties. Excellent for rich land. Makes a wonderful nurse crop. Matures 2 to 4 days earlier than New Marquis. Heads are short and compact. An excellent milling wheat. It is also quite resistant to bunt and loose smut. This is by all odds the most profitable spring wheat for sections susceptible to stem rust damage.

Our seed is northern grown, re-cleaned and very nice. Supply limited.

**SPRING
RYE**

Strictly a spring grain crop. Sow early in spring. Grain looks like Winter Rye. Used mainly as a grain crop. May be pastured or cut for hay. Sometimes combined with Field Peas for hay. Big yielder on rich land. One of the best small grain crops for thin land. Makes fine feed. Sow early in spring using about 2 bu. per acre.

See page 19

Wilt Resistant FLAX

Grow Flax for bigger profits. Prices have ranged from 6 to 10 times prices paid for oats. These famous Wilt Resistant varieties Bison and Red Wing may reasonably be expected to yield 10 to 15 bushel per acre.

Higher yields than these are secured. These varieties are real money makers. Wilt drove Flax out of many sections. These wilt resisters are bringing it back. Adapted to most of the spring oat section having rainfall of around 25 to 30 inches or more per year. Grown as far south as Kansas and in a wide area from east to west. Help national defense and make money for yourself growing Flax this year.

Flax Facts and How to Grow It

Flax does best on medium to heavy land. It is not good on light soils. Biggest yields follow corn, some other cultivated crop or soybeans which leave the land reasonably weed free. Sow about spring grain seeding time. Late seedings may reduce yields. Seed bed should be firm. Pack with a roller if necessary. Do not cover over an inch. Half an inch is generally plenty. Drilling is best. Sow $\frac{3}{4}$ bu. per acre of Red Wing or about 1 bu. per acre of Bison. Harvest when bolls are ripe and stems yellow.

Flax makes a wonderful nurse crop for Red Clover, Alsike, Alfalfa.

Bison the most Wilt Resistant. A little later in maturity. Largest seed. Excellent oil producer.

Red Wing. About a week earlier than Bison. May be sown somewhat later. Also a heavy yielder. See page 41 for prices. F. O. B. Clarinda and Chicago.

Palmyra, Mo.
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,
W. A. Rinehart.

USE CERESAN TREATMENT ON GRAIN. SEE PAGE 19

IOGLOSS

A Very Fine Type Extra Heavy Yields

We Are Sure You Will Like Our Iogloss Type Barley

A smooth awned, stiff strawed and high yielding strain of spring barley. It is a malting type. Ripens about the same time as the Velvet. In tests extending from 1930 to 1937 it showed a superiority over both Velvet and Wisconsin 38 in lodging strength. It outyielded all varieties in the test by a very substantial percentage. It produced 7 to 9 bushels per acre more on the average than other widely grown varieties. When you consider that this was the average of a seven-year test its significance is most important. No barbs, strong straw, big yield make Iogloss an exceptionally fine barley.

ODERBRUCKER

Our Oderbrucker Type Barley Is the Rough Bearded Kind

Also known as Wisconsin 55 Type. A standard malting barley. This, in our opinion, is a heavy producer. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. We endeavor to secure the best of quality at our prevailing low prices. Recleaned seed gives you stock with small stuff removed. Plumper grains generally make somewhat stronger plants. All of our barley and other seed grains are shipped subject to your approval. If in your opinion you have not received an extra measure of value, write us for shipping instructions. See guarantee page 8.

Danese, W. Va.

Dear Friends:

I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

BARLEY

SPARTAN

Our Spartan Type Barley of Very Nice Quality

A two-row, smooth awned spring barley. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded. It has greater value than some which, although yielding well, are discounted on the market or whose weak straw causes trouble. Spartan Barley is a profitable variety.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

HEAVY
PRODUCING
VARIETIES**

See page 41 for Clarinda and Chicago prices

VELVET

The KIND With SILKY BEARDS

Our Velvet Type Barley Is Cleaned, Graded Stock

Velvet is a smooth awned or barbless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to Iogloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

A VERY POPULAR VARIETY

WISCONSIN No. 38

BARBLESS BARLEY

Our Wisconsin 38 Type Barley Is the Smooth Bearded Kind

This is claimed as an improvement over Velvet-type and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

Wisconsin No. 38 shares the popularity of malting types with Velvet and Iogloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 8.

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. See description on oat page 19.

See Page 41 for New LOW PRICES

BROMUS INERMIS OR BROME GRASS

DROUGHT RESISTANT

**Heavily Productive—Highly Palatable
Starts Early. Grows Late in the Fall**
Domestic and Canadian No. 1

See Description Below

If you are needing a grass that will take lots of punishment and still produce a valuable crop, grow Brome Grass. If you want a grass that is palatable and greatly relished by all kinds of livestock, grow Brome Grass. If you want a grass that can be used for pasture or hay, Brome Grass fills the bill. For drought resistance and early and late growth it is hard to equal. We wish you could talk to farmers who are growing Brome Grass and hear their enthusiastic stories. Or better yet if you could see the crop growing and see the production it can make you would certainly want some of it. It isn't a new grass but its great value is just becoming more widely known. There are stands in Illinois that have stood over twenty years. It has been popular in the west for many years and has become widely grown in the eastern states. From Kansas and the Dakotas on east to the coast. From Michigan and Wisconsin on south into Kentucky. It is being grown as never before and each year the praises for it are better and louder.

Characteristics

Brome Grass is also known as Bromus inermis, Smooth Brome, Awnless and Hungarian Brome Grass. It is a long lived perennial grass. Grows erect to a height of 3 feet or more depending upon soil fertility. The fibrous roots go deep sometimes 5 feet or more. Highly resistant against drought and cold. Remains green after Blue Grass has turned brown and dry. It is adapted to a wide range of soils. Does well on clay loam and sandy loam soils if not too low in fertility. Stands trampling and grazing very well. Fine to grow with alfalfa for hay and widely used with it and other clovers and grasses for pasture. While permanent it is not difficult to eradicate. If it becomes sod bound a thorough cultivation generally corrects that.

Getting a Stand

Brome Grass is sometimes a little slow in starting. Best results are obtained by preparing a good fine solid seed bed same as you would for alfalfa. May be sown either in spring or fall when moisture conditions are favorable to start it. The seeds are large and light and sometimes a little difficulty is had in feeding it through drill spouts. Mixing with sand or dirt or a peck or two of oats per acre helps. Keep it stirred and mixed in the box. An endgate seeder may be used. Some practice hand sowing. The seed should have a light covering but deep covering should be avoided. Wherever possible use a cultipacker or roller after seeding. Sow about 13 to 20 lbs. per acre alone. In mixture use 8 to 10 lbs. of Brome. Eight pounds each of Alfalfa and Brome is a good mixture. Remember it grows slowly the first year. What may appear a poor stand the first year is usually surprisingly good the second.

Canadian No. 1 or Domestic Seed

We sell two grades of Brome Grass. The Home Grown or Domestic seed at prices above. This is good serviceable seed although not as heavy weight.

We especially recommend our Canadian No. 1 Brome. This is much heavier in weight. Contains more solid seed. Requires less seed per acre. It is more economical and satisfactory. Strictly a very high quality product in every way.

Price Canadian No. 1 \$19.00 per 100 lbs.—\$9.60 for 50 lbs., f.o.b. Clarinda. Twenty-five cents per 100 higher at Chicago.

See page 40 for complete price list. Small lots postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

ALFALFA AND BROME MIXTURE

A Fifty-Fifty Seeding of Alfalfa and Brome Grass

This is a great combination. Both crops are drouth and cold resistant and very palatable. Brome reduces danger of bloat from alfalfa. Tests show Brome grown with alfalfa contained 21% more nitrogen than when grown alone. The combination yields heavily. A 13 year experiment in Canada showed the combination to yield $2\frac{1}{2}$ times as much as Brome alone. One of the finest of pasture combinations. We urge you to try it. On orders of this mixture we ship Alfalfa and Brome Grass seed to give you a 50-50 mixture by weight.

Farmer Reports on Brome Grass

Elmer Wagner of Ada, Minnesota, says, "It pastures better than Blue Grass. Has seen fields that stood severe pasture for 10 years. As a hay crop I have found it as valuable as alfalfa. Likes it mixed with sweet clover for pasture."

J. T. Dudgeon of Penick, Kentucky, reports he has been growing Brome Grass for more than 30 years. Cattle grazed in different grass prefer Brome to all others. He uses Alfalfa and Brome mixed with highly satisfactory results. All kinds of livestock eat Brome ravenously.

Achenbach Bros. of Washington, Kansas, say it is the only grass they have ever found to take the place of the old time prairie grass. Comes on early, stays on late in the fall and often eliminates weeds. When sown with Alfalfa reduces danger of bloat when pastured. Yields $1\frac{1}{2}$ to 4 tons of hay per acre.

Lack of space prevents giving many more reports but these are indicative of the great value farmers place on this crop.

Experiment Station Reports

Agricultural Experiment Stations now recognize its value and most states in the northern half of the nation have circulars or bulletins describing the crop and its value.

The Illinois experiment station considers it the most drought resistant grass in that state. Also very palatable and relished by cattle and horses. New York recommends it especially for pasture in mixture. Michigan finds it adapted, very drought resistant, highly palatable and especially suited for mixing with Alfalfa for pasture. Nebraska recognizes it as superior to all other cultivated grasses in that state. Iowa finds it of great value. Kansas finds it especially good in the northern part of the tame grass section with hay yields of 1 to 3 tons per acre. South Dakota says it is one of the outstanding grasses in the eastern section.

A Remarkable Permanent Grass of Great Value

Here is a crop that can really "go to town." It's a remarkable crop in many ways and in a class by itself. It grows on extremely wet land, stands a lot of overflow yet withstands drought amazingly well. You should have seen it at the Iowa Experiment Station on upland one dry year. It stood out like an oasis on a desert. Farmers who came to look at the experimental field would spot it as soon as they entered the field. The Reed Canadian Grass yielded 3 tons a acre, it was a double cut and the only alfalfa crop. Produces 2 to 3 cuttings a year. No wonder farmers were enthused about it. You would be, too, if you had such a crop on your farm.

Grows 5 to 6 ft. High

You also have to see it grow to appreciate the value of this crop. It is a very leafy grass. And how it can yield. Up to 3 to 5 tons of cured hay per acre from two cuttings. The second crop is even leafier than the first although not as tall. You ought to hear farmers bragging about its feeding quality. We do not consider it equal to alfalfa in feeding value, but some growers claim it is. They report increased milk flow on Reed Canary Grass. Tests show 9.43% protein in first cutting and 11.76% in second cutting. They like it for pasture. They like it for hay and many make good money out of the seed crop.

Grows from Early Spring Until Late Fall

Lots of times you can hardly wait for spring to come and give you pasture. Reed Canary grass starts on the job real early in the spring and keeps at it until late in

the fall. It is well adapted to pasturing after a good sod has been formed. And what a sod it makes especially on wet land.

Reed Canary grown on land so wet cattle would bog down in it, made a sod so strong it would support a team and wagon.

It is a perennial grass with a long life. In Minnesota a field was used for hay crops for 15 years and then 18 years as a pasture. A government report from the Pacific Coast showed it pastured four dairy cows per acre for seven months of the year.

Widely Adapted

You may ask, "Can I grow Reed Canary Grass?" This grass is adapted to all states from the Atlantic to the Pacific in the entire eastern half of the country and as far south as into eastern Tennessee. If you have any low wet land there isn't a better grass you can grow. It will change acres that are worthless into valuable acres—real money makers. But it isn't limited to wet land as the Iowa Experiment Station has shown. It has been a real money maker. Use it for hay, pasture and seed production.

You can get all three in one year. First a seed crop. See below. Immediately after a hay crop and then pasture or hay. Sometimes a third cutting. The water table can be practically at the surface yet Reed Canary grass flourishes and it stands a lot of overflow. Again we would repeat that it also shows marked resistance to insects. At the Urbana, Illinois Experiment Station for two years it averaged 5 tons of air dry hay per acre a year.

Postpaid: 1 lb., 50c: 5 lbs., \$2.25: 10 lbs., \$4.25.

How to Grow Reed Canary

It should have a relatively cool season for starting. Both fall and early spring seedings are widely practiced. Use 6 to 8 pounds per acre. Sometimes it is sown late in the fall so the seed will not germinate 'until the following spring. Be sure to prepare a good seed bed. Make it fine, smooth and get it well packed. Follow with a heavy roller, although spring plowing can be worked into a good seed bed. Late fall seedling may be necessary on some poorly drained soils.

Sometimes the seed is sown during thawing weather in the spring. We suggest a light covering and packing it with a roller. About $\frac{3}{4}$ to $\frac{1}{2}$ inch is plenty of covering. If weeds get bothersome clip them back. Seedlings are as hardy as those of Timothy and will stand considerable freezing. The growth is not fast the first year. Second and following years give full and rapid growth.

Profitable Crop

Gordon Aebischer of Chilten, Wisconsin, says, "Hay yields run 1 to 3 loads per acre per cutting." Ordinarily 4 tons per acre in two cuttings. Seed yields range up to 450 pounds per acre. First seeding was in 1931. Have added more since and never had to reseed. Some of the land growing it is subject to overflow for as long as six months at a time.

A.A.A. Payments

AAA. Payments
This is a perennial grass. In some sections special pasture seedlings had a rating of 2 units which pays \$3.00 an acre. In general the regular run of perennial grasses in many states is $\frac{1}{2}$ unit or 75¢ an acre. Your local AAAA. Committee can give you the rating on each seeding for your own section. See page 9 of this catalog.

Money in Seed Crop

Reed Canary Grass will produce 100 to 400 pounds or more of seed per acre. Even if the seed should get as low as 10c per pound that produces a nice extra cash income per acre. You don't have to sacrifice a hay crop for it. Good hay is obtained if cut immediately after seed harvest. It is a profitable crop as hay or pasture even if no seed is saved.

High Points in Canary Grass

Grows on very wet land. Withstands drought. Value of seed crop may run as high as \$90.00 per acre basis 20c price. Gives two to three cuttings per acre. Yields up to 4 and 5 tons per acre. Makes fine pasture. A seedling lasts many years. Comes on early in the spring and grows until late in the fall. Adapted to a wide area. It is a money making crop.

GRASSES

of SPECIAL MERIT

CRESTED WHEAT GRASS

EXTRAORDINARY DROUGHT RESISTER

A.A.A. Pays \$3.00 an Acre in Designated Areas on This Grass. See Page 9.

If you want the most highly drought resistant grass, sow Crested Wheat grass. In sections with as little as 10 to 18 inches of annual rainfall and high evaporation it has made a very satisfactory growth. Yields of 3 tons per acre are recorded in more humid sections and seed production up to 900 pounds per acre.

It is a deep rooted long lived perennial grass. A fine stemmed leafy grass. Roots go down as much as 8 feet and are very dense. It does not spread by under ground root stalks, therefore is easier to eradicate than some grasses. On the other hand it does not become sod bound like some dryland grasses or to deteriorate like others.

Comes on Early—Grows Late in Fall

Starts growing unusually early as it likes cool weather. No amount of freezing or subzero temperatures seem to hurt it. Begins growing in the spring from one to two weeks before Brome Grass which is also an early starter.

Likewise it continues growing later in the fall. During hot weather it becomes dormant but responds quickly to a little fall moisture. It has not been definitely determined how far south it will grow. Has been grown in Colorado and Illinois and is worthy of trials further south and east.

It is under extremely dry conditions that it shows its most striking superiority over other grasses.

45c per
100
higher
at
Chicago

\$16⁵⁰
100 LBS

Other Valuable Characteristics

It stands close grazing and trampling remarkably well. In one test it was grazed continuously for five years from early spring until late fall without apparent injury. It has proven a fine weed eliminator. A field that was heavily infested with mustard and Russian Thistle was almost totally freed of these weeds after Crested Wheat was established, yet the grass is easily eradicated. It is relished by all classes of livestock and especially horses. Cures to greenish stems and abundant leafage as hay which is very palatable and highly nutritious. No grass is more winter hardy.

Seeding Suggestions

Prepare a fine well settled seed bed. Rolling or packing are desirable. Use about 10 pounds per acre and sow with grain or grass seed drill. Relatively early spring seedings when weather is cool and moisture conditions most favorable for quick germination are best. Cover seed about half an inch. In very dry sections cover a little deeper. Rolling is a good practice.

Postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

RED TOP GROWS MOST ANYWHERE

Seldom Fails to Make a Stand

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses fail. Next to Reed Canary it is the best wet land grass. It is also strongly drought resistant. Fine to sow on banks to prevent erosion. If you have trouble in getting a stand of grass, sow Red Top—it seldom fails.

It is second only to blue grass as a pasture plant especially in the northeastern part of our country and it grows when blue grass often fails. On sour land we know of no grass to equal it. Red Top and Blue Grass is good for both pasture and lawn purposes. Likewise it is good in hay mixtures and it is widely used in that way.

Adapted to the Entire Country

Red Top thrives from Canada to the Gulf and from New York to California. It is a vigorous grower and quickly forms a turf. Very valuable for use in soil erosion work to stop washing. When used with Timothy for hay it generally increases the yield. Matures at about the same time.

It is a perennial grass. One seeding lasts several years. The seed is small. Around 10 pounds per acre are sown when not mixed. A mixture of three or four pounds per acre is fine in pastures and meadows. May be top sown on old stands to increase production. Early spring or late summer is the best time to sow.

The seed is very small therefore the seed bed should be fine and solid. Take care not to cover it too deeply. Red Top is cheap this year compared with Blue Grass, Orchard, Brome, etc. If you wish to get a grass that is economical to sow and almost sure to get a stand even on poor land be sure to sow some Red Top this year. Use it with Timothy for hay and with Blue Grass for pasture. It will help you get more feed per acre. Check soil erosion with Red Top. It is a crop that can fill an important place on your farm. A.A.A. pays 40c an acre for seeding Red Top. See page 9.

Small Lots Postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75.

higher at Chicago

\$12⁰⁰
100 LBS.

Bermuda Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Small lots, postpaid, 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.90. Not pre-paid, 25 lbs., \$7.60; 50 lbs., \$15.10; 100 lbs., \$30.00.

45c per 100 higher at Chicago.

\$7⁶⁰
25 LBS.

Western Wheat Grass

A native American Grass. It is very resistant against extreme cold and drought although will not stand it to the extent that Crested Wheat Grass does. It produces wonderfully well, however, under average drought conditions. Grows remarkably well on Alkali soils. Not suitable on land subject to much overflow. Grows 2 to 4 ft. high and yields are around 2 to 4 tons per acre. Matures a little later. The seeds are larger than Crested Wheat and it requires 15 to 20 lbs. to sow an acre.

May be sown alone or with small grain as a companion crop. This crop has certainly come up fast in popular favor.

Postpaid, 1 lb., 30c; 5 lbs., \$1.40; 10 lbs., \$2.75. See page 40 for prices on large lots, not pre-paid.

F.O.B. Clarinda & Chicago.

\$3⁹⁰
25 LBS.

KENTUCKY BLUE GRASS

A Most Valuable Pasture

This long lived perennial grass is well known as an outstanding pasture and lawn grass in a great portion of our country. It is

very nutritious and highly palatable. Grows from early spring until late fall. Makes a fine sod and stands close grazing. Stands a lot of drought, coming out after long dry spells in an astonishing manner. It is adapted to a wide territory and to different soil types. Will stand some wet conditions and some acid but not as much as Red Top. Because of its fine quality it is widely desired for pasture.

Make Blue Grass More Profitable

Blue Grass pasture should be good money makers yet on many farms they are not. That is not the fault of the grass but more often due to neglect. When bare spots show up little attention is given them. It is hoped they may be reseeded by mother nature. Sometimes they are but it is slow. Meanwhile you lose what bare spots might be producing and weeds creep in. Save money by reseeding such places.

Other ways in which you can improve Blue Grass pasture is to fertilize them. Grasses use plant food same as grain. Sow clovers in Blue Grass to give them more nitrogen. Sweet clover is excellent for that. Clip weeds before they go to seed. Disc it occasionally and harrow early in the spring. Do not over-graze it in dry season.

In adapted areas Kentucky Blue Grass earns half a unit or 75c an acre under A.A.A. and \$1.50 for pasture improvement. See page 9.

Seeding Suggestions

Buy good seed but don't pay too much for it. Our prices should save you money. In spite of short crops our prices are low. Prepare a fine, well settled seed bed. Sow in the spring or fall. Spring seedings may be made with a light crop of grain as a companion crop. Often it is best to cut grain for hay so as to give the grass a better chance. Some clover also may be used with a spring seeding. Timothy is sometimes used both with fall or winter seedings. Blue Grass straight is sown 15 to 20 lbs. per acre. In mixtures, reduce to suit your ideas. For thickening thin spots 8 to 10 lbs. are generally sufficient. Whenever possible roll after seeding. See page 40 for Chicago prices.

Blue Grass for Lawns

For lawns a very thick stand is desirable and a pound to every 5 or 600 square feet is suggested. An application of commercial fertilizer and a little lime will make a more luxurious growth, give it better color and help keep out weeds such as dandelions.

Small Lots, Postpaid: 1 lb., 40c; 5 lbs., \$1.80; 10 lbs., \$3.50.

\$21⁰⁰
100 LBS.

ORCHARD GRASS

Adapted to a Wide Region—Fine for Shady Places

Orchard Grass is grown in nearly every state in the Union. It is most common north of Alabama and Georgia and eastward from and in Iowa and Missouri. Also grown south and west of these localities. It has soil requirements similar to Timothy and Blue Grass but can be grown in a wider range of climates. It is grown alone for hay and pasture but is perhaps most generally used mixed with other grasses and clovers. A mixture of Orchard Grass with clovers makes fine hay especially for fattening cattle for market. We consider it very good with sweet clover because it grows in the shade of taller plants better than any other grass we sell. Orchard Grass makes best hay if cut when just in bloom. Makes a good aftermath for pasture.

Starts Growing Early and Grows Late in Season

The early starting growth of Orchard Grass in the spring makes it a valuable addition to pasture seedings. It grows luxuriously then and again in late fall it adds to the productivity of pastures. Add it to Brome, Sweet Clover, Blue Grass, Timothy and other grasses for pasture. Your local A.A.A. can give you payments on Orchard Grass seeding. Ranges from 75c to \$1.50 an acre in adapted areas.

Fifteen to twenty pounds per acre are generally sown when a stand of straight Orchard Grass is desired. The percentage in mixtures is one of personal preference. Sow spring or fall and follow the suggestions given above for Blue Grass.

Sow good seed. Let us send you a sample of our stock. See the liberal savings. Order with the complete assurance of a satisfactory shipment. Small lots, 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.25. See page 40 for Prices at Clarinda and Chicago.

\$32⁰⁰
100 LBS.

English Blue Grass

A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. Start this grass. Our understanding is it classifies same as Kentucky Blue in A.A.A.

See page 40 for Clarinda and Chicago prices. Small lots, postpaid, 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.25.

\$7⁶⁰
25 LBS.

Lot "TIM" Red Top & Timothy

A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding. A.A.A. payments 40c an acre where adapted.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

See price list for other quantity prices. Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$1.95.

\$2⁴⁰
25 LBS.

GROW QUICK PASTURE MIXTURE

\$2.60
BU
25 LBS.

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

This spring may find many farmers short on pasture. This is a seeding that may help you solve your problem. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost. Qualifies for A.A.A. payments. See page 9.

Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

Contains
Korean Clover,
Sweet Clover,
Domestic Rye Grass
and Timothy.

Approximately 50%
Clovers, Balance Grasses
Chicago Price \$2.65

PERMANENT PASTURE and MEADOW MIXTURE

Thrifty Mixture

A combination of Grasses and Clovers that give our customers very satisfactory results at low seeding cost. A seeding that lasts several years. Produces a fine quality and variety of feed. Gives a longer pasture season. Some of the crops in it start early. Others grow through hot dry weather and late into the fall. Some stand wet conditions. Others prefer it dry. Under almost any conditions it can give you a stand that is productive.

The grasses in the mixture are Kentucky Blue Grass, Red Top, Rye Grass and Timothy. These are combined with Korean Clover and Sweet Clover. The Rye Grass grows fast and serves as a nurse crop although a light seeding of grain can be used if desired. Red Top is also quite a fast grower and these two grasses provide early feed. The Korean and Sweet Clover are generally ready to pasture by mid summer and on till late fall. The Timothy and Blue Grass also add to the fall pasture.

The grasses are all perennials excepting the Rye Grass. The Korean Clover is an annual but generally reseeds itself no matter how closely it is pastured unless the season is too short. The sweet clover is a two-year crop and it too, nearly always reseeds when in pastures. Thus you have legumes to build up your land, increase the growth of the grasses and improve the feeding value of the pasture. Sow 15 to 20 lbs. per acre.

We guarantee the quality of the seed to show up to your entire satisfaction and assure you of good value. Your money back if the seeds or the savings are not fully satisfactory. See page 9 for A.A.A. payments.

\$6.10
50 LBS.

Master Mixture

A combination of grasses only. Contains no clovers. Many of our customers want such a mixture. Some have clovers of their own to add. Some don't care for clovers. Others want to add one kind of clover and some another. So here it is. A straight grass mixture that we are sure you will like and priced to please you.

Our Master Mixture contains Kentucky Blue Grass, Brome Grass, Timothy, Reed Canary Grass, Red Top and Meadow Fescue. These give a variety of grasses and that is what livestock likes. There are other advantages. All of them are perennials. Some start earlier in the spring. Brome Grass takes the heat and drouth exceptionally well. Meadow Fescue starts early and will grow until late in fall. It is widely adapted. Red Top grows most anywhere. Reed Canary stands wet and drouth. Timothy fills in well for several years as the other grasses are getting well established. Qualifies for A.A.A. See page 9.

Poor thin pastures don't pay their way. They lose money. They become infested with weeds. They start to wash and erode. Thicken up old stands by reseeding. Disc the land, harrow. Sow one of our mixtures and roll or pack the ground. Make new seedings if old ones are too far gone. See page 25 under Blue Grass for seeding suggestions. Use 10 to 12 lbs. of mixture for top seeding or 18 to 20 pounds for a new seeding. Make those pasture acres profitable. More stock per acre for a longer period of time getting a greater variety of feed.

We use good seed and mix it as thoroughly as we can according to a definite formula. The shipment is guaranteed to please you. If you do not consider it a great value in every way at our low price you may return it for refund plus freight.

See Page 40 for Clarinda and Chicago Prices

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 30c; 3 lbs., 80c; 5 lbs., \$1.30; 10 lbs., \$2.50. A pound sows about 500 square feet.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 50c; 3 lbs., \$1.30; 5 lbs., \$1.90; 10 lbs., \$3.60. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 45c; 3 lbs., \$1.20; 5 lbs., \$1.80; 10 lbs., \$3.25.

WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., \$1.00; 3 lbs., \$2.70; 5 lbs., \$4.25; 10 lbs., \$8.00. See page 40 for larger quantities.

KENTUCKY BLUE GRASS

The most satisfactory all purpose lawn grass for the U. S. to the coast and from Canada south to Tennessee. Stands drought. Makes an excellent turf. Grows from early spring until late fall. Use Berry's quality Blue Grass. Postpaid price: 1 lb., 40c; 3 lbs., \$1.10; 5 lbs., \$1.80; 10 lbs., \$3.50.

TESTED RELIABLE SEEDERS, CLEANERS AND SEED TREATMENTS

CYCLONE SEEDER

This handy seeder can save you many dollars a year. It saves on seed cost because it distributes seed nicely and therefore less seed per acre is required. It also saves on labor costs as with a Cyclone Seeder you can sow many acres per hour.

Sows Clover, Timothy, Alfalfa, Lespedeza, Sudan, Oats, Wheat and any other seed that is sown broadcast. Can be regulated for any amount per acre.

Its well known double feed insures a uniform flow of seed. Sloped feed board keeps hopper properly filled. Feed adjustment is automatic. Distributing wheel scatters seed evenly. Throws equal amounts to equal distance from operator. Full directions for setting furnished.

Postpaid price \$2.75

HORN SEEDER

Sows all smooth seeds like Alfalfa, Clover, Timothy, Lespedeza, etc. Patented Brass Seed Gauge regulates amount per acre to be sown and it is reliable. Tube comes in sections or joints that fit tightly. Easily operated.

Postpaid price
\$1.00

USE SEED TREATMENTS FOR BETTER YIELDS

Treating seeds like Corn, Oats, Barley, Wheat and potatoes pays. That is especially true when unfavorable weather conditions increase the danger of disease damage. Seed treatment brings larger yields and often a much better quality in the crop produced. The cost is small. For Potatoes it is only 2½¢ per bu. Corn about 15¢ per bu. or less than 3¢ per acre. Small grain treatment is also about 2½¢ per bu. See catalog pages referred to below for description and prices.

For Corn
Merko—Page 16

For Small Grain
Ceresan—Page 19

For Potatoes
Corona P.D.7—Page 15

SEED CLEANER

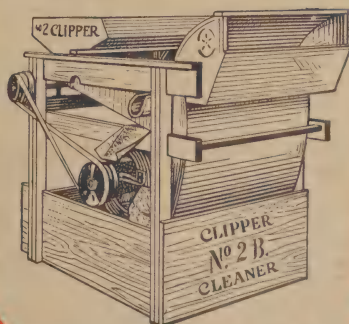

Clipper Mills

For Grain—Seed and Beans

We have sold hundreds of these mills and have never had a single complaint on any of them. They are a profitable investment. With a Clipper you can improve the quality of your own seed and grain and get better prices for your product.

They are sturdily built and well finished. Comes equipped with screens for cleaning Wheat, Oats, Barley, Rye, Red and Alsike Clover, Alfalfa, Sweet Clover, Timothy, Millet, Flax, Peas, Beans, Cowpeas and Soybeans. Grades Corn, Cane, Milo, etc.

Write for Circular giving detailed information on Clipper Cleaners. It tells you all about them. They come in two sizes.

See below for other prices

Grows on the poorest land
Wonderful pasture—Excellent Soil Builder.

A VERY VALUABLE CROP

A.A.A. in many states counts a seeding of this Lespedeza as ½ unit which pays 75c an acre. In some southern states it pays \$1.00 per acre. See page 9.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year. Korean Clover is not a good competitor of Red and Sweet Clover and Alfalfa. That is those crops are more profitable if they can be grown successfully. But on poor land where those crops do not grow readily, Korean is a very valuable crop.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much.

Korean Prices

Regular Grade, \$1.75 bu., Clarinda, \$1.80 Chicago.
25 lb. Bu. Nice quality cleaned seed of high germination and good purity. Sow 12 lbs. per acre.

Special Grade, \$2.00 bu., Clarinda, 25 lbs.

Selected especially to comply with provisions of Iowa Seed law. Sow 12 lbs. per acre.

Hulled Korean, \$9.00 for 100 pounds—50 lbs., \$4.60—25 lbs., \$2.40.

Has hulls removed. Generally germinates quicker. Best for late seeding. Sow 10 lbs. per acre.

In buying Korean don't be misled by too low prices. Much of the seed contains excessive weed seed and is no bargain. Considering quality our prices are low. Quality brings real satisfaction.

Ask for our Free Circular on Lespedeza.

INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Cost is low. A bushel size package inoculates two 25-lb. bushels of Lespedeza. 1 bu. size, only 30c; 2 bu., 50c; 5 bu., 90c.

Early Giant KOREAN

Matures Earlier—Grows Taller

Adapted Further North
Also Known as No. 19604

\$4.00
BU.
25 LBS.

You who want to grow Lespedeza and have found you are a little too far north for regular Korean should by all means order this Early Giant. It matures quite a bit earlier and may be grown 100 to 150 miles north of the regular Korean. Because of its earliness it is more certain to produce seed and thus reseed itself or provide a cash seed crop. Sow it this spring. Harvest a seed crop this fall. Seed yields of 1000 pounds per acre reported. Get a big cash income after your small grain crop.

Grows Taller

Growth up to 2 feet reported in dry season of 1936. Stands drought but responds well to moisture conditions. Compare growth of 18 to 24 inches with regular Korean. Early Giant is generally about twice as tall. Like regular it grows on very thin land without lime. Makes better hay. Valuable as a pasture. Has a very leafy growth and is high in food value. Adds nitrogen to your land.

Grow This Adapted Korean

This is the Korean you want if you live under conditions from southern Iowa to north central Iowa. There is a big need for this in states like Nebraska, Illinois, Indiana, Ohio, Pennsylvania and others where regular Korean does not do well. Don't use regular Korean where it is not adapted, but sow this Early Giant which is also known as No. 19604. Get it started in your neighborhood. Sell your first seed crop locally at a premium. Make those thin acres produce good profits. Make sure of your seed supply by ordering at once. Figure 10 to 12 lbs. per acre.

Small lots, postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00

SERICEA LESPEDEZA

A perennial Lespedeza. Comes up from roots in the spring. Has wintered as far north as New York. Grows on very sour soil without lime. Grows taller and coarser than Korean. Very leafy. Highly drought resistant. High feeding value. A great soil builder. Sow about 6 to 8 pounds per acre, about April 15th in latitude of southern Iowa. Wants a solid seed bed. Cover seed lightly.

Seed supply is still limited. All prices are for prompt orders. See page 40. Pays up to \$1.50 acre. A.A.A. See p. 9.

Small lots, postpaid: 1 lb., 60c; 5 lbs., \$2.50;
10 lbs., \$4.50

Watson, Missouri.

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL

All Domestic Grown

All of the seed is hardy U. S. grown and qualified as to origin, North Central region, for benefit payments. Here is a mixture with an abundance of hardy clovers. Priced to provide very low seeding costs and yet give you a rich clover seeding. Averages fifty percent by weight in clovers. When sown at 11 pounds per acre should give you an average of 45 to 50 clover seeds per square foot and you have the Timothy besides. Think of making such a seeding at a cost of \$1.40 per acre for seed.

Quality Guaranteed to Please

We will gladly send you a representative sample of our Marvelous Mixture so you can see the quality of this seeding. Or you can order it with the assurance that you will be well pleased. As with all our grass and clover shipments you can take up to 60 days time after you receive the shipment to have any test or analysis made. Then if you are not satisfied or if you do not believe you have made a big savings you can return the shipment and your money plus freight charges will be refunded.

A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops, Fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it.

Start the Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 10 to 12 lbs. per acre.

Price is 15c per
bu. higher
f.o.b. Chicago

A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

Saves 50% at Berry's

Stratford, Wisc.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seeding looks very good. I feel I saved about half by buying from this Co.

Yours truly, THEO ROGGENBAUER.

Yield and Quality Fine

Catawba, W. Va.

Dear Sirs:

I have been using your Marvelous Mixture of grass seed for more than eight years with satisfaction. The quality and yield has never disappointed me, and can heartily recommend to others desiring good seed.

Yours truly, WILLIE L. ROBE.

Good Stands—Big Yields

Hillsdale, Wis.

Gentlemen:

We have been using Marvelous Mixture grass seed on our farm near Blue River, Wis. for a number of years and have been well pleased with the results. Have had the best stand and best yield of any seed sown for several years.

Yours truly, G. L. POUND.

Splendid Hay—Lots of It

Martinsville, Ind.

Berry Seed Co.

Dear Sirs:

I find your Marvelous Mixture makes splendid hay and I got 21 loads off of 9 acres first cutting and 11 loads of fine Alfalfa this year in second cutting. In 1928 I bought one bushel of Kansas Grown World Brand Alfalfa, and it is still fine field of hay and thick as ever, so I have been using your seed ever since.

(Signed) W. L. COLEMAN.

Marvelous Satisfies

Kent, Ohio.

Dear Sirs:

I had good results with your Marvelous Mixture, very heavy crop and good quality. Your Marvelous Mixture is my choice. There is no guesswork about this seed. I have recommended it to a good many friends and neighbors.

Yours truly, J. B. SMITH.

GENUINE HARDY CORN BELT STOCK

SEE
 PAGE 34

Origin qualifies for North Central agricultural conservation program. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

This Honest John is the same in hardiness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then the seed should please you. It is a seedling that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

TWO OUTSTANDING ALFALFA VALUES. BUY NOW!

**GENUINE
 NORTHERN
 GROWN**

GRIMM
Lot NORTH
 Approximately 99% Crop Purity

FROM THE "ORIGINAL" GRIMM FIELD STATE ~ SUPER HARDY STOCK

The seed in Lot North comes from states where severe winters kill non-hardy plants and have only the hardiest to survive and bear seeds. States like Minnesota, Michigan and Nebraska. Contains no southern seed. Seed of this character is always in big demand and sells at a premium over other less hardy origins. Our present price is figured extremely low. A bargain in extra hardy stock.

Wherever conditions cause much trouble with winter killing, Grimm should be used. Here is a lot of nice quality seed that is priced to make it an extraordinary value. We secured this seed at a low figure. It is priced so you can secure a nice saving by acting promptly. Don't wait.

Lot North has the high quality characteristics. Good color. Smooth uniform berries, 99% pure including around 2% to 4% crop seed which is principally Red Clover and Sweet Clover. Good germination. A vigorous growing type. We'll gladly send you a sample. Compare it with the best grades. Consider the hardy character of this seed. Your saving should run around \$2.00 to \$3.00 per bu.

This is not our lowest priced seed. Other lots are described on pages 31 and 34 to 37. They are all fine values but this is such an outstanding bargain that we give it our special recommendation to all who want Genuine Northern Grown seed and do not object to a small percent of crop seed. See page 41 for Inoculation.

Our Finest Corn-Belt Grimm

We sell different grades and origins of alfalfa as described on pages 30 and 34 to 37. The greatest possible measure of value is packed into each lot. The Grimm is gaining in popularity among farmers everywhere because of its finer character of hay and extra winter hardiness.

Our World Brand Corn-Belt Grimm has for years been one of our biggest selling lots. This present low price is made possible through early purchases and cannot be duplicated at this writing to sell for anywhere near so low a figure. It is a real bargain in high quality seed.

High Quality—Adapted Seed

This seed comes from sections considered adapted by AAA for the entire north central section. That includes the states of Minnesota, Wisconsin and Michigan as well as states south of these. Seed that is adapted to these northern states certainly should prove

amply hardy for any place in the Union. If Alfalfa stands ever get punished by severe winters it is up there in the north. Therefore in Berry's Corn-Belt Grimm you get hardiness and in the World Brand Grade you get extra fine quality. At our present low price you secure a great value.

World Brand Quality

There is a sample of World Brand Corn Belt Alfalfa enclosed. That is indicative of our World Brand quality in other lines of seed as well. Note the smooth uniform character, the nice bold berries, the high purity and color. Old customers know World Brand represents our finest and best. For years it has satisfied our most critical customers. To you who demand the best we say, buy World Brand. Why pay more for the best than Berry's Direct-to-you prices? Save \$2.00 to \$3.50. Quality and Savings guaranteed satisfactory.

For best success with alfalfa—Inoculate your seed. A.A.A. pays \$1.50 an acre for sowing Alfalfa. See page 9.

\$19⁸⁰
60 LBS. BU.

DAKOTA No. 12 ALFALFA

WORLD BRAND QUALITY

Dakota No. 12 has long enjoyed a wide popularity. The seed we have for you this year is of World Brand quality and Nebraska grown stock. Consider the high quality of this seed. Ask for samples. Compare values. Thrifty quality buyers should delight in this quality bargain. The price should save you around \$3.00 on every bushel. Shipment guaranteed to please you.

Our Dakota No. 12 alfalfa is not Grimm but is considered by many farmers to be equally hardy and heavier in production. We have many customers who will buy nothing else. They claim it out-yields others and takes a lot of punishment. Seed of Nebraska origin comes from plants that have survived wide variation in climatic conditions. Extremes of heat and cold are damaging and drought also takes its toll of weaklings. We consider therefore that in this seed you will secure a type of stock that will give you most satisfactory performance and a stand of rugged character. Supply limited. Early buying is advised.

\$19⁸⁰
60 LBS. BU.

UNITED STATES GROWN

RED CLOVER LOT LEADER

99% PURE Including 4% Crop Seed

A SEEDING MANY FARMERS PREFER

Here is real quality in beautiful Red Clover seed at a real bargain price. You almost have to see it to appreciate its outstanding value.

Let me send you a sample. I ask you quality buyers to check this value closely. You will appreciate its plump berries, high color and uniform character. I know the seed we have at this writing is finer in appearance than much seed that is sold as the best. It is just as fine as it looks. In fact it is mostly Idaho seed for which many dealers gladly pay premium prices.

Clean Hardy—Home Grown

This is all hardy home grown seed adapted for AAA payments. Lot Leader is really World Brand quality seed. It sells at a lower price because it contains a little crop seed. By crop seed we mean seeds like Alfalfa, Alsike or Sweet Clover. There is only about 4% which is mostly alfalfa and including these Lot Leader tests right around 99% pure. This gives you clean, high germinating seed of a most practical character and priced to save you good money.

Savings Guaranteed

Quality is the basis of value. In clover seeds value is determined by hardness, purity, germination, color, etc. Seed like Lot Leader can be sown at a lighter rate than seed of inferior germination. A bushel goes farther and its high crop purity gives assurance of clean stands. On the basis of quality we guarantee you a saving of \$1.00 to \$2.00 per bushel. If after you have received the shipment, you do not believe you have saved that much or if you are not completely satisfied return your shipment. We will promptly refund the purchase price plus freight charge.

Sow Liberally This Year

Red Clover is proportionately the most economical seed to sow this year. It has advanced less in percentage than Alfalfa, Sweet Clover and Timothy. While somewhat higher than last year it is still below the average. A considerable period of years. In 1938 it was almost double present prices. Now other farm prices are higher. Then it took roughly, 330 lbs. of hogs or 290 lbs. of beef or 70 bushels of corn or 40 bushels of wheat to buy a bushel of clover. Now only 125 lbs. of hogs or 120 lbs. of beef or 20 bushels of corn or 13 bushels of wheat. It will pay to sow liberally this year.

Seeding Suggestions

Do not use too heavy a nurse or companion crop. That is the cause of a lot of failures from stands that started out in nice shape. Sow only a half to a third as much grain as normal. Thin stands of grain produce surprisingly heavy yields. Pasturing grain instead of harvesting it often gives the best clover stands. Make sure your seed bed is firm and well settled. Use a roller after seeding wherever possible. Inoculate your seed. See page 41.

CROP SEED IS MOSTLY ALFALFA

only **\$12.30** BU. 60 LBS.

A MONEY SAVING MIXTURE
LOT JUST-RITE RED CLOVER
WITH ALSIKE and TIMOTHY

\$6.00 BU. 45 LBS.

All Home Grown

A good many customers wrote me last year that they wanted a seeding that would give them a good clover stand and still as low in cost as possible to get AAA payments for a clover seeding. Lot Just-Rite has been prepared to meet that need. This isn't an experimental seeding. We have sold hundreds of bushels of a similar lot and it has given very satisfactory results. A bushel should sow six acres very nicely. That will cost you around \$1.00 per acre. See local A.A.A. for seeding rates.

Gives a Fine Clover Seeding

This seed is of hardy origin that fully qualifies for AAA payments. It contains 50% or better Red and Alsike Clover carefully mixed with Timothy. This runs 30 to 35% Red Clover, 15 to 20% Alsike. When you sow this at the rate of a bushel to six acres you will have approximately 20 Red Clover seeds and 18 Alsike seeds per square foot. A total of 36 clover seeds per square foot and you have the Timothy besides to hold up the clover and increase the yield. The government payment covers most of the cost of the seed.

Recleaned Quality Seed

Do not compare this with country run or cheap seed of doubtful quality. We haven't tried to see how cheap we could make this. On the contrary we have made it the best possible value at this low price. It is cleaned seed, carefully mixed. It has the quality to produce good stands.

You can use it for hay, pasture and for soil erosion control. It is an adapted seeding and a good one priced to save you money. If you don't believe you have made a worthwhile saving on quality seed, return it and get your money back including freight charges.

For best results from clover seedings—Inoculate your seed.

$\frac{1}{2}$ bu. size package, 30c; 1 bu. size, 50c; $2\frac{1}{2}$ bu., 90c.

RED CLOVER

A.A.A.

Pays 75c per Acre—Page 9

When it comes to really building up land for a corn crop you can hardly beat Medium Red Clover. It gets the job done without excessive burning or drought damage. The real quality corn crops come from Red Clover sod. And of course there is good money in hay, seed and pasture crops. To get good clean vigorous hardy stands use Berry's World Brand. It is the quality that has pleased our most critical trade for years and is distinctly superior to the so-called best grade of many dealers. The government is buying up clover under the Lend Lease act. You can expect sharp market advances.

ECONOMICAL AND SATISFACTORY

This quality pleases because of the results it can give. It requires less seed per acre than country run or poorly cleaned lots. A bushel goes further. This seed is priced very low considering its fine quality. If at any time within 60 days after you receive shipment you do not consider you have saved \$1.00 to \$2.00 a bushel, write us for shipping instructions and a prompt refund.

THIS SEED IS HARDY U. S. GROWN

It is new crop, hardy anywhere in the United States and suitable for the AAA conservation program. North Central Region. Compare sample with any you can find anywhere for appearance and quality. Such seed is worth premium prices.

You will find other grades of U. S. grown Medium Red Clover described on page 9 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. Postpaid 1 lb. 45c; 5 lbs. \$1.75; 10 lbs. \$3.00.

GETTING GOOD STANDS OF CLOVER

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price $\frac{1}{2}$ bu. size 30c; 1 bu. size 50c; $2\frac{1}{2}$ bu. size 90c. Also see page 41 on inoculation.

MAMMOTH RED CLOVER

U. S. Grown Seed, Priced to save you money

Critical and thrifty buyers are served alike in our World Brand grade. The quality meets demands of our most critical trade. Our low price satisfies the sense of thrift. There is always true economy in such a value.

Here is our extra fancy, northern grown Mammoth. It is recleaned and tested. It has size and color that indicate strength and vitality. Has a high purity. Such seed goes farther. It is far cheaper and more satisfactory than most average seed. A.A.A. pays 75c an acre for seeding this. See page 9.

Our World Brand seed gives you better assurance of clean, heavy, healthy stands. That means larger and more profitable crops. This is a very fine value. Limited crops and advancing markets make it advisable to order what you need early. See page 9 for description of other grades and page 40 for prices.

Mammoth Clover is a large variety of Red Clover. It lives longer. It is also known as Sapling and Big English Clover. Superior for soil building. Extensively grown when seasons are too short for two cuttings and wherever an extra heavy crop is desired. Buy early. We look for higher markets.

Choice MEDIUM RED Clover

A serviceable lot of hardy home grown Medium Red Clover seed. Good clean, dependable seed. Origin qualifies for A.A.A. payments of 75c an acre. Not as fine in appearance as World Brand but capable of producing good stands of hardy adapted Red Clover. Return for full refund if shipment is not completely satisfactory to you.

**A
SENSATIONAL
VALUE**

CORN-BELT ALFALFA

This is the type of alfalfa that is very popular throughout the Corn-Belt because of its heavy production and its winter hardiness. Its use however, is by no means confined to the corn-belt. Northern states like Minnesota, Michigan and Wisconsin use this character of seed with very satisfactory results and customers in eastern, western and southern states like it very much.

Thoroughly Dependable

TRADE MARK
Reg. U. S. Pat. Off.

We do not mix any unadapted southern or southwestern alfalfa seed in our stocks. Dealers who do that can sell nice looking seed at lower prices. However, the farmer sowing such seed will probably lose a great deal through winter killing and find that the most expensive seed in the end.

Alfalfa Earns \$1.50 An Acre in A.A.A.

You get twice as much under A.A.A. for seeding alfalfa than Red Clover and 3 times as much as for Sweet Clover. The great value of the crop justifies this large payment. This cuts actual seed costs. See page 9 for information on payments. Corn-Belt Alfalfa contains only such seed as is considered by A.A.A. authorities to be adapted to North Central Region. This includes northernmost states like Wisconsin, Michigan and Minnesota. Such seed should prove amply hardy anywhere. You may be certain therefore that Corn-Belt Alfalfa both Regular and Grimm qualifies for government checks under A.A.A. as stated above.

We also sell straight Nebraska, Montana, Minnesota, Canadian and Kansas grown as catalog describes.

HARDY and HEAVILY PRODUCTIVE

CUSTOMERS' REPORTS ON BERRY'S ALFALFA

Joseph Ash of Otsego, Michigan: "We got some of your World Brand Corn-Belt Alfalfa 2 or 3 years ago. It is doing so good we want some more."

C. A. Foster of Sparta, Ill., says he bought some of our cheapest Corn-Belt Alfalfa 5 years ago. Still going strong. Has another piece of ground ready for more.

Ed Phienheimer of Shipshewanna, Ind., has used Corn-Belt Alfalfa for seven years. Orders more. Says to send it whatever the price may be.

Ivan R. Arnsmeir of Juda, Wis., reports our Corn-Belt Alfalfa gave him four cuttings when his neighbors got only two. He had our lowest priced grade.

Wm. Koutny of Brandon, Iowa, states he obtained a fine stand. Lots better than some who paid five bucks per bushel more for their seed.

Oscar M. Hub of Riley, Wis., says the four bushels of Corn-Belt alfalfa was seeded with excellent results. Well pleased.

Frank L. Wilcox, Galloway, Ohio, wants another bushel and a half like the Corn-Belt he got the year before which gave very good results.

Wm. S. Van Tassel, Antwerp, N. Y., says: "I secured a wonderful stand last year of your seeds, especially of your alfalfa."

Elmer Broedlow of Jefferson, Wisconsin, writes: "Just wish to say the alfalfa I purchased of you last year withstood the drought and ice of last winter. My seeding is excellent although some report their seedings are dead again this year."

GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 9. There are also special lots of Corn-Belt designated by names such as "Honest John," etc. We also have the Corn-Belt Grimm such as our World Brand on page 31 and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

INOCULATE ALFALFA SEED

Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. Price $\frac{1}{2}$ bu. size, 30c; 1 bu. size, 50c; $2\frac{1}{2}$ bu. size, 90c. If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

Market Conditions

Unfavorable weather conditions have caused a very drastic reduction in Alfalfa seed supplies for this year. The total crop probably is not over 40% of last years. The demand and need for seed is great. We look for markets to advance as the seeding season approaches. Our sincere advice is to buy Alfalfa seed early.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

North Liberty, Indiana.
Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

ulation

LOT FANCY

A Fine Fancy Quality

We generally call this our Dealers Fancy Grade because it is a quality that is so often sold as the best in a retail way. It might easily pass for the best if you didn't compare it with an extra fancy quality like our World Brand.

You'll like its high purity and smooth berries. It has good color too. Not quite as bright as the World Brand but plenty nice at that. And it has the growing power to produce good stands. The hardness is the same as the World. In fact it will do everything the higher priced grade will do. The main difference is in the color and that difference isn't great.

The saving in cost is \$1.50 per bu. over our World Brand and compared with many retail prices the saving should run up to \$4.00 per bushel. That's a lot of savings but if you don't think you have made big savings we don't ask you to keep our seed. See guarantee page 8. This year above any other year the savings by buying direct from Berry's are extra large. But buy early.

Corn-Belt Alfalfa Seed

A low priced grade that satisfied many

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do. O.K. for A.A.A.

WORLD BRAND CORN BELT ALFALFA

\$19⁵⁰
BU
60 LBS.

We ask every critical buyer to check the savings you can make on this high quality grade. This is Corn-Belt alfalfa at its best. Our extra fancy quality. The highest color and plumpest berries. A grade that nearly always runs 99½ pure. Priced to save you

real money. See the samples of World Brand Alfalfa seed enclosed. That indicates the beautiful character of this grade. Compare prices. We guarantee you a saving of \$2.00 to \$4.00 per bushel over any seed of similar character and quality. If you don't consider you have made such a saving when you receive your seed, return it for refund plus freight charges.

The hardy character of our Corn-Belt Alfalfa is described on page 34. Qualifies of A.A.A. payment of \$1.50 per acre North Central. This is seed that we consider winter hardy and highly productive. It is this character of alfalfa that has helped build up such an extensive alfalfa seed business for us. Quality to please our most critical trade and a price to suit our keen judges of value. You will appreciate this high grade bargain.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
WM. E. KLEMKE.

LOT BIG KROP

Choice Quality Corn-Belt Alfalfa

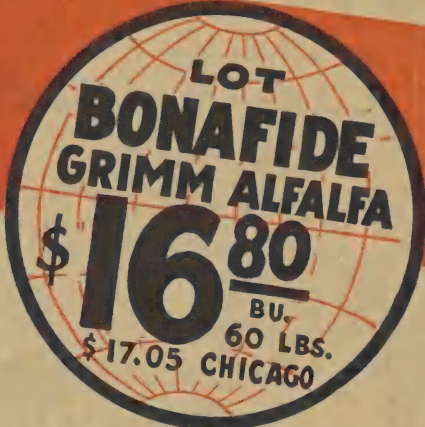

\$16⁵⁰
BU
60 LBS.

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot Good Service described above. It is not as smooth and uniform as the extra fancy World Brand described in the opposite column.

It is the same hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a good practical value for thrifty buyers.

Origin qualifies for A.A.A. North Central region.

EXTRA HARDY ALFALFA

Shipped in a Sealed Bag A Real Value

A selected bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Northern Grown of a productive hardy type. Origin qualifies for A.A.A. payment of \$1.50 per acre. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

Lot BED ROCK GRIMM

25c per bu. Higher at Chicago

Shipped in a Sealed Bag
Serviceable Seed—Hardy Origin

\$14.70
BU.
60 LBS.

Grimm Alfalfa is in greater demand than ever. This lot places it within the reach of every farmer who wants this kind. This lot is priced very low for such quality. It is a grade that has given our customers satisfactory results. Has good growing power. Produces the same kind of alfalfa as higher priced seed.

This low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind. Origin O.K. for A.A.A. North Central.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it does very nicely. Sow 15 pounds per acre. Shipment is guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

INOCULATE ALFALFA SEED PAGE 41

MONTANA GRIMM

World Brand

In spite of drastic reduction in Montana Alfalfa seed last fall we were able to secure some very fine seed at a reasonable price. That is why we can sell this extra fancy quality seed at this most reasonable price. It is beautiful seed, friends. High color, bold berries, excellent purity. High germination. And it's priced to save you around \$4.00 a bushel. But we can't replace it to sell at this figure so order it promptly if you want it. Shipment guaranteed absolutely satisfactory.

Dear Sirs: I have always found your seeds to be very satisfactory and have gotten good results from them. I recommend your seeds highly at every opportunity.

CARL A. C. JOHNSON.

BEST COSSACK

Considered by Many The Hardest of All

Cossack Alfalfa is in wide demand by those having unusually much trouble with winter killing. We really doubt if it is really superior to our Grimm in this respect but have a nice stock of beautiful seed.

Anyone wishing Cossack Alfalfa can certainly save money on seeding costs with this extra value lot. O.K. for A.A.A.

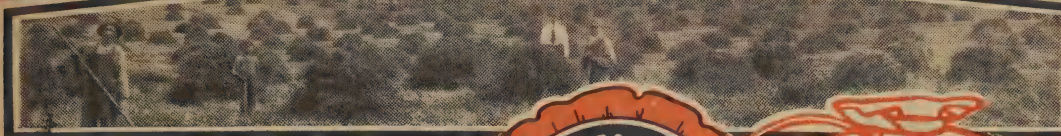

This seed is our very finest World Brand grade. It is truly an extra fancy lot. You can expect something very fine when you order this. This variety produces hay of a very nice quality. Sample sent free. Compare our quality; then compare prices. You should find a saving that will surprise you. Bargains like this move fast.

GRIMM ALFALFA

At STRIKINGLY LOW MONEY SAVING PRICES

CANADIAN No. 1 GRIMM

\$21.00
BU.
\$21.25 CHICAGO
60 LBS.

World Brand Grade

Our customers have always liked Canadian grown Grimm. Often the premium demanded for it has been very high. This year through some fortunate early contracts with one of

Canada's strongest Cooperatives we secured some beautiful seed. It can be sold right in line with domestic seed. Any comparison will show you how great a bargain this is. But we can't replace it to sell at this price. It may not be available at all later. While it lasts this price should save you around \$4.00 per bushel.

Canadian grown seed is famous for its hardy character. That's where it really gets cold. Long lasting subzero cold. It takes hardy, sturdy, vigorous plants to survive and bear seed. That's the kind many Berry customers want to establish on their farms. It should last many years.

Besides grading Canadian No. 1 this seed has passed all U. S. Gov't. Import Regulations. It tests 99½% pure. Has fine color, bold berries, high germination and is strictly high grade seed. You'll be proud to show this seed to your friends and we are certain your fields will be profitable and very satisfactory. But order early.

Small lots postpaid, 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.25.

\$22.50
BU-60 LBS.
\$22.75 IN CHICAGO

The Finest Obtainable

This is similar to our own State Sealed and Certified Grimm. Central Canadian Gov't. inspects fields, seeds grades, etc. No. 1 Registered is the very finest and the most beautiful seed we have ever seen. The most exacting buyer will be proud of his purchase.

With this seed you can establish on your farm an unquestionably extra hardy strain of the purest character. You'll forget about the small extra cost in a short time. In fact our present low price is less than that of State Sealed Blue Tag. If you ever had a chance to get an extra bargain in extra fine quality it is now. This seed nearly always sells at premium prices. If you want to take advantage of this big opportunity better act now. The savings are up to \$5.00 per bushel. Compare and see. Many dealers can't even offer it.

WORLD BRAND NEBRASKA GRIMM

An Extra Value

There are many grades and origins of Alfalfa seed. This is sometimes confusing to the buyer. Some know what they want and there are many different likes and dislikes. There is, for example, a big demand for Canadian seed as described above. There are others who prefer U. S. Grown Grimm providing they are sure of its adaptability and hardy character.

EXCEPTIONAL MERIT

For sheer merit, adaptability, yields and hardiness we don't believe you can beat Nebraska grown Grimm. While it may not get as cold in Nebraska as in Canada or Montana there is often less snow protection and therefore more damage to crops. Besides in Nebraska there are often periods of extended drought and high temperatures. That can be damaging too and those are more nearly the conditions un-

der which most alfalfa is grown in this nation.

Big Yields

When it comes to yields we believe Nebraska Grimm has it over the others in that it grows somewhat taller and therefore produces a heavier tonnage.

High Quality

Berry's World Brand Nebraska Grimm is high quality seed. It will test around 99½% pure. The seed is bright, plump and a first class quality in every way. We are close to Nebraska and have excellent buying connections. This seed was bought to advantage and our price is way down compared to the average quotations. The savings will run up to \$5.00 per bushel. But again we advise and urge you to buy early as we anticipate market advances.

ALSIKE CLOVER

WORLD Brand

\$13²⁰
BU.
60 LBS.

"This is a clover so valuable, so adaptable to conditions unfavorable to other clovers that many farmers are passing up a good bet when they do not use it. In this World Brand you secure our finest quality. Highest in color and plumpst berries. The grade that has satisfied our most critical trade for years. All hardy U. S. Grown seed.

Alsiike is a fine stemmed perennial clover. Higher in feeding value than Red, greener in color and less dusty. Under favorable conditions stems grow 3 to 5 feet long. Prefers loam to heavy soils. Grows on land too sour for red and is extra winter hardy. It is excellent practice to sow a couple of pounds of alsike per acre with Red. Helps to secure a better stand and a thicker growth.

Alsiike is economical to sow. It is a smaller seeded clover, 5 to 6 pounds per acre is plenty to sow. Use it alone or with other grasses for hay and pasture. Stands trampling. An extra good clover for pasture and makes wonderful hay. See page 9 for A.A.A. payment.

Alsiike is grown from Oregon to Maine and from Minnesota to Tennessee and other southern states. In the south is used largely for pasture on lower ground. North and east it shows its great value as a hay crop. Extra good on wet land, stands a lot of overflow. Its use however, is by no means confined to wet land. It is generally easier to get a stand of alsike. Compare our values. Although the seed is relatively scarce we have very low prices and can save you money on this our finest quality.

Postpaid 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

LOT ALSIKE MERIT

This lot of Alsike sells at a substantial discount under our World Brand simply because it may have a little White Dutch Clover or Red Clover in it and a small percent of Timothy. Will average 90% or better pure clovers. Free samples on request will show you just how nice this seed is.

You will like it for hay and it is very good for pasture. If you are making a new seeding you should like it and it is fine too for top

seeding on old meadows and pastures. If you are making up a pasture mixture with other grasses you can use Lot Merit. It helps to reduce seeding costs and it is a value we are sure you will appreciate. Return seed for refund if you are not completely satisfied. See guarantee page 8. See page 9 for A.A.A. payment.

\$11⁰⁰
BU.
60 LBS.

GIANT INCARNATE or CRIMSON CLOVER

Resembles Red Clover. Grows up to 2 to 2½ feet.

Upright branching plants. Roots deeply. A bountiful provider of nitrogen. Will thrive better than Red Clover on thinner and poorer soils. Very efficient for green manuring. Plowing under a good crop is estimated equal to 20 loads of manure per acre. Stubble plowed under 12 tons. A cheap source of nitrogen. One authority says it's worth \$20.00 to \$30.00 per acre in nitrogen.

Most extensively used in the south as a fall sown crop. We suggest only spring seeding in north where it is a quick growing annual. Prefers cool growing season. Sow 15 lbs. per acre. Our seed guaranteed to please you.

Small lots, prepaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75.

\$8⁷⁰
BU.
60 LBS.

Lot ECONOMY ALSIKE WITH TIMOTHY

A special lot and a seeding that our trade takes to in a big way. A bushel sows six acres. That averages about 60 clover seeds per square foot. You have the Timothy besides to hold up the Alsike. That helps it grow taller and cleaner. One crop aids the other. They will produce a greater tonnage in combination than when grown separately. Makes heavy crops of fine quality hay and pasture. Qualifies for A.A.A. payments at 75c an acre. That's all it costs for seed, except where local regulations require a heavier rate of seeding. See page 9.

Lot Economy generally contains 50% or more Alsike. This is mixed with the Timothy to make a blending and quality that our customers consider a real bargain and a money-making seeding. Do not confuse this with the average combination of Alsike and Timothy. It is richer in clovers. Requires less seed per acre.

Shipment is guaranteed to please you. You can cut your seed bill. The seed is U. S. grown and hardy anywhere in the U.S.A. If you want to make an adapted seeding and an economical one order Lot Economy. We are sure you will be well pleased.

FOR 15 LBS.

TIMOTHY WORLD BRAND

Our Finest Grade—Iowa Grown

The value of Timothy is again being appreciated. It is one of the surest to make a stand. Grows on a wide range of soils and is adapted to a wide area. Helps check soil washing better than straight clovers. Used alone and in combination with clovers and alfalfa to produce money making crops. Hay, pasture and seed crops are all valuable. A seeding lasts several years. Sow 10 to 12 lbs. per acre. Our present prices will save you money.

Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices low and quality extra nice.

More for Your Money

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We have other grades too, Fancy, Planet and Square. See page 9 for description and page 40 for prices. A quality and a price to meet every need and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook.

Single pounds, postpaid, 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

PLANET BRAND TIMOTHY

\$3.30
BU.
45 LBS.

This is a very serviceable grade of re-cleaned Timothy seed. It has good purity and germination and the ability to produce fine stands. It sells for less money than our World Brand grade because it isn't so nice in appearance. It contains some lighter weight seed and some lots with a larger percentage of hulled seeds are blended in. Therefore it is not quite as bright or uniform in appearance. This Planet Brand will compare very favorably with much seed used. When compared with our World Brand you will see it is not quite as nice looking.

Costs Only 75c an Acre

A bushel will sow 4 to 5 acres. Timothy is one of the surest seedings. It is adapted to a wide range of soils and climate. Gives you protection against soil erosion at low cost. It is a small investment that buys profitable returns. Don't risk the wastefulness of thin stands of grass when it costs so little to get a good one. Provide for bigger yields and better soil protection by sowing Timothy this year. This seed is good sound merchandise of good practical value.

\$3.70

DOMESTIC RYE GRASS

Fast Grower—Big Yielder

Domestic Rye Grass is rather light green in color. Leaves are a little broader than Blue Grass and grows much taller. Requires no nurse crop. In fact it grows so fast it is often used as a nurse crop for other slower growing grasses. Do not confuse this with Rye that is sown for grain. It is entirely different. The seed is somewhat like that of Blue Grass only larger.

Common A.A.A. Rating 1/2 Unit

If you need early pasture or hay, something to sow early, use Domestic Rye Grass. A full seeding is 25 lbs. per acre. Some sow less. Prepare a good seed bed, cover seed lightly and roll if possible. Sow alone or in mixture.

Our Grow-Quick Mixtures (see page 26, contain a good percentage of this valuable grass. Buy now. For present prices see page 40.

Small lots, postpaid: 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

Stoddard, Wisconsin.

Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You made me money and I got better results. Yours truly, ALBERT J. JONAS.

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can thrive without proper inoculation.

In order to be inoculated there must be a certain strain of bacteria working in the roots of the plants. Then and then only can these legumes take nitrogen from the air and use it for its own growth.

Legumes are heavy users of nitrogen. If they cannot make it for themselves because they lack the proper bacteria, they generally turn yellow and often die. Meanwhile instead of building up your land they are robbing it of nitrogen which is the most valuable plant food. You grow legumes because you want them to store nitrogen in the soil but they will take it away if they are not properly inoculated.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria suited for the crop you specify. You put that on the seed. See opposite column. As soon as the seed sprouts the bacteria start to work and give the plant the power to make its own nitrogen out of the air.

We urge you to inoculate. The cost is small. It is easy to apply. We guarantee our Nodule Germ to give satisfactory results. If it does not make nodules on your plants we will refund the price of the material. See opposite column for prices.

INOCULATING LEGUMES PAYS

Berry's Nodule Germ

A Wise Investment

In the opposite column we have explained the necessity of proper inoculation for your seed. Berry's Nodule Germ is one of the best and most economical ways of securing this inoculation. It is very easy to apply. The simple directions are printed on each package. Guaranteed to produce nodules if used as directed or money refunded.

A New Development

Most Inoculants are prepared so that you have to buy different packages for different kinds of legumes. For example you buy one kind if you want to inoculate Red and Alsike Clover, another for Alfalfa, Sweet Clover and still another for Soybeans.

Now, Berry's Nodule Germ is prepared by a laboratory that has devised a satisfactory method of combining different strains of bacteria in one package. This will inoculate Red, Alsike, Crimson Clover, and all Alfalfas. You can order as much as you need of Berry's Nodule Germ and use part of it on Clovers and part on Alfalfa, if so desired. It can also be used on Soybeans.

NODULE GERM PRICES

Alfalfa and Clovers
1/2 bu., 30c; 1 bu., 50c;
2 1/2 bu., 90c

When used on Soybeans each package will inoculate double the amount of seed specified above.

If you order inoculation for Vetches, Field or Cowpeas, Garden Beans, Lespedeza or straight Soybeans be sure to state which of these crops you want it for.

3 Timothy AND CLOVER MIXTURES

AT
LOW
SEEDING
COST

TIMOTHY ALSIKE and RED CLOVER

Regular Grade

Contains 20 to 25% Clovers

All Hardy U. S. Grown

An economical seeding but a good one. There is ample clover seed to produce a good stand. At 10 lbs. per acre it provides around an average of 25 clover seeds and at 8 pounds per acre 20 to 22 clover seeds per square foot. The Timothy is in addition. There is a distinct advantage to the Timothy. It supports the clover plants. They grow straighter and taller. There is less loss of clover leaves because there are not so many in contact with the ground. Most of the feeding value is in the leaves.

The clovers help the Timothy. It gets the benefit of nitrogen gathered by the clovers. A number of tests show that grasses contain more nitrogen when they are grown with clovers. It has also been shown that Timothy and clovers grown together will yield more than when grown separately. Thus better quality, larger yields and low cost are big factors in making our mixtures so popular.

Adapted Recleaned Seed

Our seed is all hardy U. S. Grown as required for A.A.A. It has been carefully cleaned and thoroughly mixed to the best of our ability. Shipment guaranteed to please. See Page 8. Now is the time to sow liberally as prices are very low this year.

TIMOTHY & RED CLOVER HOME GROWN

All mixtures 15c bu. higher at Chicago

SUPER GRADE

Contains 28 to 32%

Red Clover

Hardy U. S. Grown

\$5³⁰
BU.
45 LBS.

Red Clover is hard to beat as a soil builder in the corn-belt. It leaves the land in ideal condition for corn crops. The ground works up nice. It is easy to cultivate. There is less danger of burning than with some other legumes. You can be surer of a good vigorous well filled crop of corn. In fact a good grass sod is good too, only it lacks the nitrogen clovers bring. A combination of Red Clover and Timothy gives wonderful results, for you get both humus and nitrogen from the growth plowed under.

Berry's Timothy and Red Clover mixture has always been and long will be a seeding to give you these results. Yes, soil building, soil conserving, and at the same time produces money making hay and pasture crops. Then too it is economical.

The clover grows erect in the Timothy because the grass helps hold it erect. Thus the clover can do it best. Less spoilage; more leaves. The Timothy benefits by the nitrogen gathered by the clover. That increases its feeding value. All this for a cost of around a dollar per acre. Some sow 8, some 10 lbs. per acre. At the latter rate you get around 23 clover seeds per square foot. Three or four clover plants make a wonderful stand. You have the Timothy besides.

Compare any prices on such a recleaned mixture with Berry's direct-to-you quotations. We guarantee a saving of 20% and complete satisfaction on every shipment. See page 8.

Send us your order. Cut costs. Make a real seeding.

TIMOTHY and SWEET CLOVER RED CLOVER

Contains 50% Hardy Home Grown Clovers

Picture a field with a nice vigorous growth of luscious sweet clover. In between the sweet clover a heavy growth of Timothy with Red Clover filling in the gaps and lower growth. What a crop and what a yield. Rich in protein, high in feeding value, powerful in soil enrichment. A combination that is good for hay or pasture or both. Costs only 70c an acre, figuring 10 lbs. of seed per acre. At 8 lbs. it's only 80c an acre. See local A.A.A. for payment on such a 50% biennial legume mixture.

It is all cleaned seed and hardy home grown. Carefully mixed for uniform seedings. We know of no other seeding so low in cost that will produce as heavily. Helps inoculate soil for alfalfa. Should provide pasture the first year, an early hay crop the next year and then pasture for the balance of the second year. Shipment is guaranteed to please you in every respect. See page 8. For heavy production at lowest cost order Timothy, Sweet and Red Clover Mixture.

North Manchester, Ind.
Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises.
Yours truly,

A. F. STELLAR.

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is re-cleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

TIMOTHY AND ALSIKE

20-25% Clover

Regular Grade
Low Cost — Big Yields
An Economical and Highly
Satisfactory Seeding

All U. S. Grown as Required for A.A.A.

\$4⁷⁰
BU.
45 LBS.

This is the year to sow liberally to this famous natural mixture. The cost is reasonable and a seeding lasts for several years. We know of no mixture that makes a finer quality of hay than our Timothy and Alsike. The Alsike hay is less dusty than Red Clover and pound for pound it has a higher feeding value. It can be used as pasture to good advantage and keeps soils from washing.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Timothy and Alsike have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are low figures for such fine quality clover rich seeding.

This mixture when sown at 10 lbs. per acre will give an average of 32 Alsike seeds per square foot. It would take about a 50% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. Ask for sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

Small Quantities Postpaid any Mixture on this page.

Dalton, Ohio

Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,

S. J. KULA

4 WAY
TIMOTHY AND CLOVER
MIXTURE **\$5⁴⁰**
BU.
45 LBS.

\$5.55 bu. f.o.b. Chicago
28 to 32% Legumes

Red Clover, Alsike and Alfalfa in a generous measure mixed with Timothy to form a splendid seeding. This is one of our most popular and biggest selling combinations. Ample clovers to produce a good legume stand. An excellent way to see how Alfalfa will do on your land. A seeding of 10 lbs. per acre averages 30 clovers and Alfalfa seeds per square foot, 8 lbs. per acre 25. This seed is all hardy home grown. All re-cleaned seed, carefully mixed. Comes ready to sow. Produces heavily. Makes fine hay and very good for pasture. It will build up your land and check soil washing. Fits in AAA program.

Costs only around \$1.00 an acre to sow and that is a really low price this year for such a fine 4 way mixture. No farmer can afford to neglect grass and clover seedings and with this combination you get a good one at small cost. We consider this one of our best mixtures. Our price is guaranteed to save you money and shipment is guaranteed to satisfy you. See page 8. We are sure you will be delighted with this seeding. It is economical, productive and very popular.

TIMOTHY and RED CLOVER

REGULAR GRADE
15-20% Clover

\$4.65 Chicago—45 lbs.

\$4⁵⁰
BU.
45 LBS.

The same quality of seed that is used in our extra rich grade described on page 42. Our lowest cost mixed seeding. Contains sufficient clover to give an average of 12 to 13 clover seeds per square foot when sown at 10 lbs. per acre. That costs only \$1.00 an acre, 8 lbs. per acre costs only a trifle over 80c an acre. Satisfactory stands of clover can be secured from such a seeding. All hardy U. S. Grown, cleaned seed. If you want to economize as much as possible, buy this Regular Grade of Timothy and Red Clover mixed. If you don't consider it an exceptional value in every way at this low price, return shipment for full refund.

VARIETIES AND TYPES

That which we list as Sweet Clover is the White Type. Because of conditions in principal seed producing sections it may contain some yellow. Lives two years.

GRUNDY COUNTY TYPE. Matures about 3 weeks earlier than common white. Grows around 3½ ft. high. Lives 2 years. See page 37.

YELLOW TYPE. Lives 2 years. Matures between White and Grundy County. Finer stemmed and leafy. See pages 37 and 39.

HUBAM. An annual White Blossom Sweet Clover. See page 39.

Valuable Crops

All Sweet Clover are great Nitrogen gathering and soil building crops. A crop plowed under is equal to 25 loads of manure. They are wonderful pasture crops. Can be pastured first fall with two head of cattle per acre. The second year 3 or 4 head and hogs besides. Generally produces a hay crop first fall and two next year. Some take hay or pasture first fall and plow under next spring.

Sow early spring like Red Clover. Use 12 to 15 lbs. per acre. Have a firm seed bed and cover lightly.

SWEET CLOVER

A NEW SWEET CLOVER GOLDEN ANNUAL CLOVER

A Great Cash Crop—Heavy Seed Producer The Most Palatable Sweet Clover

Here is an entirely new variety of sweet clover. A clover that we believe is destined to rapidly replace other sweet clovers because it has so many valuable characteristics. The demand for the seed will be tremendous. Get in on the big money by growing a seed crop this year.

A Big Cash Income

One Iowa farmer sowed 15 pounds last spring on 4 acres and harvested 1250 lbs. of seed last fall. Another got 360 lbs. from two acres and still another 25 bushels or 1500 lbs. from 2½ acres. That is 10 bushels per acre. This was from seeds planted in rows.

This clover ripens seed more evenly than other sweet clover and the seed hangs on to the plant. Very little loss from shattering. In the fall there are practically no leaves or blossoms but all seed.

Characteristics

It is an annual like Hubam, making its full growth, blooming and bearing seed the same year it is sown. It is slightly later than Hubam. It is leafier and has finer stems. The crop is very palatable. It is not as bitter as most sweet clover. Makes a fine pasture after small grain in August, September, when two-year-old sweet clovers are dried up. It is an excellent soil builder. Its roots are thick and fleshy, very much like the two-year sweet clovers. These roots go down about 4 feet.

How to Make Money

Its value for fall pasture and for fall plowing of the clover for fertilizer will be more common when seed is more plentiful and cheaper. Now is the time to cash in on it as a seed crop. Sow with small grain using 6 to 8 pounds per acre. The seed is smaller than other sweet clover. Or plant in rows with a corn planter fitted with drill plates using about 2 lbs. per acre. Be sure you have a firm seed bed. Pack with a roller if possible after seeding. Do not cover over 1 inch. If in rows cultivate as soon as you can see the rows and keep it clean. Inoculate your seed with Sweet Clover Inoculation. Harvest when top seed is fully matured.

There will be a big market for this seed crop because it has so many superior features that it will be several years before the demand can be supplied. We have a limited quantity only. Order at once and don't wait until it is gone before you order.

While it lasts our price is \$33.00 per bushel of 60 lbs.; \$17.00 for 30 lbs. and \$9.00 for 15 lbs. f.o.b. Clarinda. We do not have this at Chicago.

Small lots Postpaid 1 lb. 90c; 5 lbs. \$4.00; 10 lbs. \$7.50.

Inoculate Your Seeds

Inoculation provides young plants with the bacteria they need to gather nitrogen from the air. Helps assure healthier and more vigorous plants and bigger yields. Easy to apply. Full directions furnished. Cost is low.

Price: 30c for ½ bu. size; 50c for 1 bu. size; 90c for 2½ bu. size.

See page 41 for further information. Berry's Nodule Germ is guaranteed.

BLUE RIBBON BARGAINS
UNHULLED
SWEET CLOVER
ALL RECLEANED SEED
\$3.00 at CLARINDA
PER BU. **\$3.05 at CHICAGO**
30 LBS. to BU. PER BU.
BAGS FREE

Our well re-cleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference.

3 SPECIAL VALUES IN HULLED AND SCARIFIED SWEET CLOVER

LOT WONDERFUL SWEET CLOVER

\$6.90
BU. 60 LBS.

15c per bu. higher, Chicago

**Our Greatest Sweet Clover
Value
Better than 99% Pure**

We made a wonderful buy on 5 carloads of White Blossom type sweet clover. It is practically equal to our World Brand grade and still is \$1 cwt. lower in price. It is scarified, high germinating seed and as satisfactory to sow as any seed you can buy. We recommend it because it contains about 5% of mottled seeds which indicates the presence of yellow sweet clover. In our opinion this increases its value as a pasture, makes good hay and a great fertilizing crop.

Save up to \$2.00 and \$3.00 bu.

Here is a lot free of Noxious weeds, carefully re-cleaned and a quality and a bargain you, as a buyer can be proud to show to your friends. Some wholesale houses are actually asking retail dealers \$1.75 a hundred more than our selling price. Retail dealers may ask you \$2.00 to \$3.00 per bushel more money.

In fact, retail dealers who read this catalog can save money by buying this Lot Wonderful. We sold a goodly portion of this Lot through our offer in our December Seed Facts. Any farmer who needs sweet clover seed and wants a high quality at a low price should act immediately. This bargain won't last long. Our customers sure know how to pick bargains and this is another one of those bargains that make Berry's values the talk of thousands.

SWEET CLOVER LOT DO-MORE

All Sweet Clover 15c higher Chicago

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is a quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More has been scarified. It comes from re-cleaned stocks. The crop from this seed is the same kind as will be secured from any of the higher priced grades. Sweet Clover is the greatest of all soil builders and the most productive pasture crop. Page 9 for A.A.A. payments on sowing Sweet Clover.

\$5.40
BU.
60 LBS.

This Grade in Big Demand

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, there are so many more seeds in a pound of Lot Do-More that this helps to compensate for the lower test per hundred seeds. The true value of a lot of seed, in our opinion, is the number of sprouts per oz. or per pound. You sow your seed by weight or measure and not by counting it out.

Reduced Seeding Costs

You do not have to sow Lot Do-More at any heavier rate than the higher priced seed. This lot is a real value. Compare it with the cost of sowing any other clover seed. Our customers who use this quality are boosters. They come back for more.

If you want our finest looking seed order World Brand. Lot Wonderful is also a good value. But if you want to cut seeding costs to bed rock order Lot Do-More. You may order this seed with perfect assurance of receiving seed of this character. You can have 60 days to test it after you get it. Then, if for any reason you are not entirely pleased you may return it and your money plus freight will be refunded. We cannot emphasize this value in a fairer or stronger way.

YELLOW SWEET CLOVER LOT SAV-MOST

\$6.00
BU.
60 LBS.

We offer this Yellow Type Sweet Clover. It is a biennial or two year kind. Somewhat leafier than the White Type. Does not grow as tall and coarse. Blooms and matures 10 days to two weeks earlier. Preferred to many for hay. Some claim it is surer to make a stand.

Our Lowest Priced Yellow Type

Lot Sav-Most gives you a very low cost on this finer stemmed leafier sweet clover. It gives you a lot of value at low cost. We sell large quantities of this seed. It is our lowest priced grade. Naturally it isn't as nice looking as the World Brand or Premium on page 47 but we are sure you will find it a real bargain value. There are some smaller berries in it. The color and uniformity are not equal to our World Brand but the amount we sell of it each year indicates that it gives satisfaction to our trade. It is all hardy seed adapted as to origin for A.A.A. benefit payments.

Sow it alone or in mixture for hay and pasture. See seeding suggestions bottom page 44. Start Sweet Clover this year. It is a money maker. Stands heat and drought. Produces lots of valuable feed and does a wonderful job of soil building. Lot Sav-Most gives you the yellow Type Sweet Clover at very low seeding costs.

Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Costs only 30c. 1/2 bu. : 90c, 1 bu. : 90c, 2 1/2 bu. Easy to apply. Read page 41. It pays to use it.

SWEET CLOVER
BLUE RIBBON BARGAINSLOT
PEARLEXTREMELY
LOW
PRICES
COMPARE ON
A QUALITY
BASIS

All Sweet Clover 15c bu. higher for Chicago Shipment

A Good Value—Moderately Priced

Lot Pearl is the biennial or two year sweet clover same as the World Brand grade described on this page and the Lot "Do-More" on page 45. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop. Average seeding required is only 15 lbs. per acre.

A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the uniformity and smoothness of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

\$6⁰⁰—
BU.
60 LBS.**Compare Values**

Lot Pearl is like our choice grade. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

Inoculate Sweet Clover
Page 41GRUNDY
COUNTY**Grundy County Type
Sweet Clover**

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common Sweet. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

**World Brand
Quality**

We have the Grundy County type only in our finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 8.

Supplies of this Grundy County type are much smaller than of the common type. Be sure to order your Grundy County Type Sweet Clover early and save money. A.A.A. Payment 50c an acre. See page 9.

Do you want the satisfaction of knowing you have the best? Do you like to compare values with your neighbor and prove that you have the finest quality and the biggest bargain? Order Berry's World Brand, for it is our finest and best. A first class quality in every way. See the sample of World Brand Alfalfa enclosed for the fine character of this grade. Consider quality. Then compare prices. You'll see a big and genuine saving of around 20% or more.

Sweet Clover has been one of our specialties for years. We were the first to feature it as a main farm crop in a big way. These many years of specialization have taught us much about the great crop and about handling sweet clover seeds. Our buying contacts, cleaning and scarifying machinery, power, etc., enables us to give you values such as this. There is no seed that would give you better assurance of success.

Sweet Clover is a crop of great value. Its enormous pasture capacity, its big seed yields, its heavy hay crops, its marvelous soil building power, these are all money making features. Cash in on them in the fullest degree by sowing Berry's World Brand. Sweet Clover seed is scarce, very scarce this year. Our present price is at or below many wholesale quotations to dealers. Save that extra profit. Never have the savings at Berry's been so attractive. But don't wait until this is sold and then have to buy on the basis of replacement prices. Buy it today.

15c higher
Chicago

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,
MIKE ZOPP.

WORLD BRAND YELLOW TYPE SWEET CLOVER

\$7.50 BU.
60 LBS.

15c Higher, Chicago

An Extra Value

Our very finest extra fancy quality. The choice of our most critical trade. Guaranteed to please the most exacting trade. See guarantee, page 8. Why pay more than our money saving price on this beautiful seed? Consider quality and check the savings. This is quick germinating scarified seed.

Yellow Type Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white.

Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

Our prices are guaranteed to save you money. See price list for price on our Planet Brand. Let us take care of your Sweet Clover needs.

It has been our specialty for years and we are equipped to take care of your needs.

Lakefield,
Minn.

Dear Friends:
I like your seeds and recommend them to others. Your seeds do well in

this section. I save money by buying from you. I am well satisfied and am sure other farmers will, too.

Yours truly,

JOHN GREIN.

LOW PRICE on HUBAM TYPE CLOVER

ANNUAL WHITE SWEET CLOVER

\$9.90 BU.
60 LBS.

The Sweet Clover That Does Two Years Work in One

Hubam seed is relatively scarce this year but we were fortunate in securing some fine seed. Supplies are limited however so order early. Sow it this spring.

Use it as a hay, seed, pasture or soil building crop this fall. Hubam is a variety of sweet clover that blooms and bears seed the same year it is sown. It is an annual. Does not live over winter. Gives an enormous growth and production in a short season.

15c Higher, Chicago

Get Two Cash Crops in One Year

Sow Hubam Type with small grain. Harvest your grain. Then cut clover for seed. Produces up to 600 lbs. of seed per acre. Sometimes more. Or use it as a pasture. It grows fast, attaining height up to 4 or 5 feet if not cut or pastured. Think what a carrying capacity that means. The growth is rich in protein, making it all the more valuable. Makes a heavy production of rich hay if cut when it begins to bloom. Or if you want to enrich your land fast, plow under a full growth. Some pasture it a while and then plow it under. Think of it, all this in the same year the crop is sown. No wonder farmers who know the crop were willing to pay up to \$15.00 a bushel for the seed a few years ago.

Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See Page 41. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll. The firmer the seed bed the better.

If you cut Hubam as a seed crop or use it for pasture, often the crop will reseed itself for another year. It does not become a pest. It is easily eradicated by cultivation. If plowed under before it seeds it will not come up again.

Low Price on World Brand Quality

Our Hubam Type seed is carried in one quality and that is our World Brand. That is our best grade and a fine quality that pleases critical buyers. Make comparisons on a quality basis and note the big savings our prices can give you. This is the year to get started with this valuable, quick acting, money making clover. Use Berry's World Brand scarified seed. We use care in the purchase and preparation of this seed. Our seed is scarified. Shipment guaranteed to please you and save you money. See Page 8.

We want your business and are making our prices correspondingly low. Don't pay more for seed that is no better or will do no more for you. Here in this great crop you can get a measure of value that we do not believe can be duplicated anywhere else. Let us help you get started with this money maker.

Small Lots, postpaid: 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.50.

YELLOW TYPE SWEET CLOVER

Lot PREMIUM

A very Serviceable lot of seed. Not as fine and smooth as World Brand but a quality that pleases many of our customers. It is cleaned scarified seed. Graded and priced to make a very popular seeding. Widely used for top sowing on old pastures or thin stands as well as for new seedings. With smaller berries and more seeds per pound it has ample sprouts per pound to give a good stand at the regular seeding rate of 15 lbs. per acre. Lot Premium is one of our big selling lots. Cuts seed costs. All Sweet Clover 15c bu. higher for Chicago Shipment.

YOUR HOME GARDEN IS AMERICA'S FIRST LINE OF DEFENSE

PLANT a COMPLETE GARDEN THIS YEAR

DO YOUR PART To AID NATIONAL DEFENSE

With the Declaration of War by America it becomes the sacred obligation of all of us to do our part in every way. The big Home Defense or War Garden Program now being sponsored by our National Defense Council, Secretary of Agriculture, and other government agencies needs the support of everyone. Only by 100% cooperation and participation by everyone can we be insured of success in this Garden Program so vital to National Health and Victory.

Victory will come to America because we'll unite in this and other crusades essential to it. If you want to be sure of doing your part order the Approved Iowa Defense Garden Collection page 53 at Berry's special price of only \$3.75 postpaid. Save more by getting your neighbors to order too—price in groups of 8 or more only \$3.49 prepaid.

That is why we term this Home Garden Promotion being carried on by State Agricultural Colleges and your national government "America's First Line of Defense." Fresh vegetables from your own garden in a complete variety is the basis for our health rules. Don't depend on someone else to garden for you. Help make America self-sufficient by doing your share in raising your own food supplies.

and PROTECT YOUR Family's HEALTH and PROSPERITY

Raising lots of fresh vegetables for eating and canning not only insures you and your family better health but also adds greatly to your farm income. Surveys made recently show that the most successful farmers today are those who raise a big home garden. The whole family can take a part in it and the garden is the backbone of successful farm management. It also trains the children in a family to do their part and they here may learn the vital importance of assuming responsibility in contributing something vital to their own family's welfare.

We all know fresh vegetables from our garden taste better than any we may buy. There is also nothing like home canned foods. But some of you may not appreciate how far on food or living costs your own garden will carry your family. Government economists say a ½ acre farm garden will save up to \$200 on food costs for the average family of 5. With Berry's New "Defense Garden" Bulk Packages (see page 53) and our big collection offers on pages 49, 52 and 53 you may get enough seed to plant 1 acre of all vegetables for as little as \$3.50.

GARDEN SEED SUPPLIES SHORTEST in HISTORY

This year many contributing factors beyond the control of seedsmen have combined to give us the shortest garden seed supplies in history. First acreages of nearly all vegetable seeds were greatly reduced and adverse growing conditions drastically cut down the yields and in some cases meant total crop failure.

We would not be so short of seed though if it wasn't for the fact we normally import a part or nearly all of our requirements on several important vegetables. The imports have been cut off nearly 100% by the War in Europe. Imports furnish about 80% of our Spinach, all of our Cauliflower and Herbs, 60% of our Cabbage, 50% of our Turnip, 35% of our Radish and so on.

Other countries that normally import items from these same European nations have now turned to us for help. We have shipped hundreds of cars of seed to England for that country needs it (to survive the war) and will pay any price, also large exports to Central and South America.

Some companies this year will not be listing in their catalogs some standard items. We can't expect to fill all orders later in the season in full (regardless of price). But as long as we can, you'll find the lowest prices and biggest measure of the year in Berry's "Defense Garden" Bulk Packages described on page 53.

ORDER NOW BERRY'S TELL YOU WHAT AND HOW TO PLANT

In order to aid you in planning your garden so as to have all the vegetables necessary to health in your diet we'll furnish with each garden seed order for \$1.00 or more our Planting Guide. This shows you just how far Berry's "Defense Garden" Bulk Packages will go so you won't need to waste any seed.

If you want to be sure of the right vegetables and varieties and save the most money, order our big "Lucky 7" or Iowa Approved Defense Garden Collection pages 49 and 53. Also on Package you get more seed for your money at Berry's.

GERMAIN'S HOTKAPS

Crop insurance at low cost enabling you to market your vegetables three weeks earlier and insures finest quality. (Pictured on page 53.) Hotkaps are "individual hotheouses" for each plant giving protection and forcing plant growth. They allow the proper amount of air and light for quickest plant development. Hotkaps are used to protect any flower or vegetable, being particularly adapted for vine crops.

Complete instructions given with each size package ordered or get our free circular before ordering. Postpaid prices: 25 Kap (Home Garden) size with paper setter, 50c. 100 Kap size with light metal setter and steel tamping, \$2.75. 250 Kap size with setter and tamping, \$4.00. Special steel setter and tamping without Kaps, \$1.50. Not prepaid: 1,000 Kaps without setter, \$10.75. Weight 23 lbs.

SEE POST CARD ENCLOSED

You will find enclosed in this catalog a post card addressed to the Berry Poultry Farm of Clarinda, Iowa. This is a different firm than the Berry Seed Co. While there is no connection between these companies we are sure you will be well pleased with any dealings you may have with the Berry Poultry Farm. Mail this card promptly and you will hear from them direct. They will send you free large poultry catalog, printed in colors.

20 PACKAGES
\$1.00 FREE
YOUR CHOICE With

LUCKY "7" COLLECTION

A GIFT YOU WILL REMEMBER

One dollar in itself is not much to have given you. Still on a \$2.39 order it is more than you would expect. Multiplied by several thousands or tens of thousands it becomes a large sum of money. That is what we are actually doing to promote more and larger gardens in the interest of National Defense.

We are actually giving you more than \$1.00 though when we give you that sum in garden seeds your choice free. It will actually save you over a year's time a good many times that amount in food costs and as health insurance. We can't do more and stay in business to serve you in years to come. We know you don't expect more. All you want is to do your part and get value received for any money sent us. We've guaranteed you more than that in this big free offer.

Order Now—Get Patriotic Auto Sticker

Last year we asked everyone receiving our catalog to plant a garden. We hope they all did—but we are afraid they did not. This year it is more important to our Defense Program than ever before. For that purpose with your order for our "Lucky 7" Collection in our big free gift package we will include a sticker for your car reading as follows: "I am cooperating 100% with National Defense Garden Program as explained by Berry Seed Co."

This big gift package is for early orders. But those who get our catalog late and order at once on receipt of catalog will receive it also. We don't recommend that you select 20—5c packets as your free gift for they don't contain enough seed for a Defense Garden. You can order some if you like though along with our D.G.B.P. Special Auto sticker given you where you order some D.G.B.P. in your only \$1.00 free gift. Your choice of 1.00 gift is limited to regular sized packets 5—9c and D.G.B.P. at catalog prices. List on order sheet your choices totaling up to \$1.00. If your order totals over \$1.00 please remit for the difference.

For complete Iowa Defense Garden Collection (Regular price \$4.50) at special low price \$3.49. See bottom of page 53.

RECOMMENDED FOR EVERY HOME DEFENSE GARDEN

This collection contains the identical quantities and varieties of Peas, Beans and Sweet Corn recommended by Iowa State College, leading seedsmen, and government agencies; for the farm or home gardener cooperating for our Defense under the "Food for Freedom" program. That includes all of us. "United we stand—divided we fall."

All of us have our favorite varieties, we can't please all the people all the time; but we know this collection contains many of your favorites. We know you'll cooperate then and order today. Every Iowa gardener which includes us all and those in other States is going to be offered this or a similar collection to plant a big home Defense Garden in this hour of National Emergency. For the complete Iowa Defense Garden Collection see bottom of page 53.

We want at least 100,000 of our good customer friends to show us they are 100% good Americans by ordering of us and planting this collection. We guarantee highest quality seeds and for early orders as long as supplies hold out we'll give you free as explained opposite \$1.00 worth of garden seeds your choice.

This looks like a lot of seeds for so low of price. It certainly is but we want to give you the bargain of a lifetime on garden seeds. Few of us have been raising a big enough garden and eating enough fresh home grown vegetables. Now by canning liberal quantities you can save more than ever as food costs are rising daily—and this is the way to good health which you can not buy at any price. Avoid the rush. Protect your family. Order today. We will mail at once. For first 5,000 orders we will furnish special 25c Planting Guide Free.

WORLD'S GREATEST BARGAIN

BERRY'S HYBRID SWEET CORN GARDEN

Why pay a premium for Hybrid Sweet Corn? Only because the yield may be increased 50%? No—a bigger difference is in the superior quality and deliciously sweet and tender flavor. Hybrid Sweet Corn is nearly 100% drought and wind-resistant. Order both early and late varieties or our 8 Row (Early) and 12 Row (late) blends of best varieties.

HYBRID BERRY'S "Earli-Best"

Berry's "Best Early" Yellow Sweet Corn

The best variety in your favorite Golden Bantam type 8-10 rowed. Selected for early maturity and extra fine quality from all hybrids developed to date. Because it matures uniformly, we recommend making several plantings at 6-8 day intervals. Plant 1/2 or 1 pound each time. No. 20X—D.G.B.P., 18c; 1 lb., 29c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid.

Berry's 8 Row Hybrid Blend

A mixture of four finest hybrids, blended to make the earliest possible crop, and to insure superior hybrid flavor and quality over the longest possible period. For the earliest, most productive and finest quality Sweet Corn, plant this Hybrid blend to bear over a two to three weeks period. No. 201X—D.G.B.P., 21c; 1 lb., 34c; 2 lbs., 62c; 5 lbs., \$1.45, postpaid.

Berry's 12 Row Hybrid Blend

A combination of 12 row hybrids with same plant heights and that mature at different times. Enjoy hybrid quality over a long picking period of at least two weeks by planting this blend. About 10 days later than our 8 row blend. No. 200X—D.G.B.P., 22c; 1 lb., 36c; 2 lbs., 66c; 5 lbs., \$1.50, postpaid. Regular Sweet Corn Prices, Page 55

STOWELL'S Evergreen Hybrid

A Favorite Variety at Its Best

Of many hybrids developed of the Stowell's type, we have selected this as the best. It gives you unsurpassed Stowell's quality and increased yields. It is vigorous and highly resistant to disease, wind and drought. Plant successively at one week intervals. No. 287X—D.G.B.P., 23c; 1 lb., 39c; 2 lbs., 69c; 5 lbs., \$1.59, postpaid.

I WANT EVERY GARDENER TO "TASTE THE DIFFERENCE" OF THESE 8 FAVORITE VEGETABLES. A NEW THRILL AWAITS YOU IN THEIR EXTRA DELICIOUS QUALITY

Charles Sinn, Manager of our Garden Seed Department, grew up in the business. He is prepared to serve you personally and save you money.

THE BEST NEW DWARF GREEN BEAN

LANDRETH'S STRINGLESS An Improved Burpee's Bean

For years everyone has planted the old standby, Stringless Green Pod Beans, in their garden. It has given satisfaction—just as the old "Model 7" did in the days gone by. Now we are able to give you something new and much better at little extra cost. Did you ever stop to think how little your garden seed costs? But my, what a difference there can be—something you must see for yourself.

Be sure and try this one now. It is more prolific than the old Burpee's, much better quality and more hardy. It is disease resistant—will thrive anywhere. Make a succession of plantings this year. You need at least 2 pounds for your garden. Our stock is western grown, hand-picked and polished, germination about 95%. There is no better seed or variety than this for the home garden. Defense Garden Bulk Package, 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c, postpaid. Other Beans, pages 54-55.

Nutrition experts are now urging us to eat more fresh vegetables. All 8 of these are important in our daily diet for health. Grow these at home—they'll taste better and save you a lot of money on food costs at our introductory offer of all 8 for only 75c, postpaid; you save 45c. Order No. 52X—Delicious fresh vegetables such as these are delicacies that cost little but mean a lot to our National Defense Program.

OUR BEST-A FAVORITE OF THOUSANDS

Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 15 to 18 days after planting. A decidedly superior variety with sparkling red top and white tip. An extra early variety of superior quality for home or market. Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 725X—Postpaid: Pkt., 15c; D.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.

Radishes, Also Page 65

AN EARLY TOMATO of WONDERFUL QUALITY

Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest tomato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round and large in size. Has a small seed cavity, firm but juicy flesh. A vigorous grower, it bears enormous crops, over a long period. Grow this tomato for the earliest finest quality fruit. Lot 156X—Postpaid: Pkt., 15c; D.G.B.P., 27c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75.

Other Tomatoes, Page 50

DELICIOUSLY SWEET, TENDER, HEALTHFUL

Berry's Tenderflesh Carrot

The finest health giving vegetable at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Coreless, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain developed for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 012X—Postpaid: Pkt., 15c; Defense Garden Bulk Package, 29c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.25.

Regular Varieties, Page 58

BERRY'S SPECIALS

PACKAGES

Any 5 for 49¢

YOUR SELECTION

A MOST SUPERIOR QUALITY PEA FOR YOU

Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrinkled variety growing vigorous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your garden. Plant at least two pounds at different times so you will have plenty for canning. Lot 364X—Postpaid: D.G.B.P., 15c; ¼ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

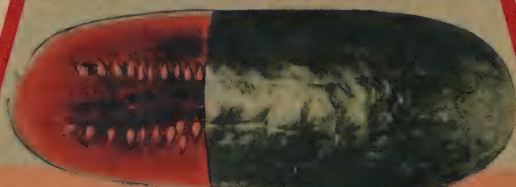

See Also Pages 62-63

Berry's Mammoth Melting Sugar Watermelon

The sweetest most delicate flavor you ever tasted. Absolutely stringless, its scarlet flesh fairly melts in your mouth. A spice to its sugar—sweet juice makes it always a delicacy at any time. Big beauties growing 20 to 25 inches long, weighing 40 to 60 pounds. Dark green color with tough rind, creamy colored seed. Hardy, vigorous vines often bearing 6 to 8 melons each. The earliest finest quality melon we have ever seen. Plant extra early. Lot 153X—Postpaid Pkt., 15c; D.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.

Melons, Pages 60-61

A BEET of TRULY SUPERIOR QUALITY

Berry's Early Blood Red Beet

An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp, it matures quickly but is a splendid keeper. If you want the best, try this one. It will be a favorite among all others. Lot 393X—Postpaid: Pkt., 15c; D. G. B. P., 22c; ¼ lb., \$1.10; ½ lb., \$2.00; 1 lb., \$3.50.

More Beets

Page 56

AN EXTRA FINE EARLY CABBAGE

Berry's Earliest Cabbage

We challenge you to beat this variety anywhere for earliness, quality and productiveness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 971X—Postpaid: Pkt., 15c; Defense Garden Bulk Package, 25c; oz., 45c; ¼ lb., \$1.50; ½ lb., \$2.75.

Later Varieties, Page 57

BERRY'S TOMATOES

Rich-Juicy

BEST EARLY RED VARIETIES

Save money. Grow your own tomato plants. They are hardier than those shipped in or produced in greenhouses. Plant 10-12 seeds per hill in your regular outdoor garden as early as frost danger is over. No transplanting necessary. Your tomatoes may be later but they will be just as good. Under "Food for Freedom" Program you need 3 regular size packets or 1 Defense Garden Bulk Package (D.G.B.P.). See page 53.

In nutrition value Tomatoes are high and should appear more often in our diet than any other vegetable except potatoes. They retain most of their ascorbic acid (Vitamin C) even when cooked. They are easy to grow, readily canned and the average family needs 150 quarts per year. Tomatoes should appear in our diet 6 days a week, as recommended by Bureau of Home Economics, U. S. Dept. of Agriculture.

156X Berry's Early Wonder. (See opposite page.)

654 Bison. See picture at right. For a sure crop of the finest quality, earliest tomato try Bison. It produces abundantly where other varieties fail. Bison is the best new Tomato in years. It produces smooth, luscious, deep red fruit a little larger than Earliana and maturing a few days earlier. Far superior to Earliana in yield and quality. Pkt., 8c; D.G.B.P., 15c; oz., 34c; ½ lb., \$1.05; ½ lb., \$2.00.

670 Break O'Day. Most prolific of early types being a cross on Marglobe and maturing a little later than Earliana. Fruits orange-red, medium large, smooth, solid and heavy. Vines wilt-resistant. Pkt., 7c; D.G.B.P., 14c; oz., 32c; ½ lb., 95c; ½ lb., \$1.75.

655 Earliana. A favorite of home gardeners. Vines open, spreading, and very productive. Fruits deep scarlet, medium size, exceptionally smooth. Pkt., 5c; D.G.B.P., 13c; oz., 29c; ½ lb., 85c; ½ lb., \$1.50.

652 John Baer. Matures the same as Break O'Day between Earliana and Bonny Best. Fruits semi-globular, very attractive bright scarlet red, smooth and quite firm. Pkt., 6c; D.G.B.P., 12c; oz., 25c; ½ lb., 75c; ½ lb., \$1.35.

INTERMEDIATE OR SECOND EARLY SORTS

651 Pink Marglobe. A new disease resistant variety. Earlier than regular Marglobe, it is also a heavier yielder. Otherwise similar to regular Marglobe, but flesh is pink. Pkg., 9c; D.G.B.P., 16c; oz., 36c; ½ lb., \$1.10; ½ lb., \$2.00.

664 Certified Rutgers. The outstanding new variety in its class. To insure you getting the variety at its best we offer only certified seed. Really an improved Marglobe maturing a little earlier and being a heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt., 7c; D.G.B.P., 13c; oz., 28c; ½ lb., 80c; ½ lb., \$1.45.

674 Bonny Best. Earliest of all tomatoes in this group. Fruits medium large, apple-shaped, smooth, solid, bright scarlet in color, of excellent quality, setting in clusters of 4 to 8. Unexcelled as a general purpose tomato. Pkt., 6c; D.G.B.P., 12c; oz., 25c; ½ lb., 75c; ½ lb., \$1.35.

665 Marglobe. A most popular all-purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet, of finest quality and flavor. Pkt., 5c; D.G.B.P., 11c; oz., 22c; ½ lb., 65c; ½ lb., \$1.15.

Remember. Order at least 3 regular packets and do your part towards making America strong. Or 1 D.G.B.P. will produce just as many plants.

Berry's
Giant
Improved
Ponderosa

OXHEART

671 A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid, meaty fruit of a delicious sub-acid flavor. Almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands. For the home garden. Pkt., 9c; D.G.B.P., 18c; oz., 55c; ½ lb., \$1.75.

Oxheart

this giant of all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 9c; D.G.B.P., 18c; oz., 55c; ½ lb., \$1.75.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkg., 5c; D.G.B.P., 10c; oz., 18c; ½ lb., 65c; ½ lb., \$1.10.

675 Beefsteak. Bred from the original Ponderosa, and resembles it closely. A brilliant crimson scarlet, wilt resistant, the large fruits are carried in clusters. Solid and meaty, making it excellent for table use. Pkt., 6c; D.G.B.P., 13c; oz., 34c; ½ lb., \$1.05; ½ lb., \$2.00.

666 Ponderosa. Vines large and spreading, bears until frost. Fruits are purplish-pink and grow to immense size. They are solid, meaty and of finest flavor. Pkt., 7c; D.G.B.P., 14c; oz., 35c; ½ lb., \$1.00; ½ lb., \$2.00.

SMALL FRUITED VARIETIES FOR PRESERVES

669 Ground Cherry or Golden Husk. Fruits small, yellow round of delicate flavor. Fine for preserves. Pkt., 5c; D.G.B.P., 12c; oz., 34c; ½ lb., \$1.15.

667 Yellow Plum. About two weeks earlier than Ground Cherry. Very productive. Fruit plum shaped, about 2 inches long. Pkt., 6c; D.G.B.P., 13c; oz., 37c; ½ lb., \$1.25.

BISON

New "ALL AMERICAN" WINNER

658 Victor — 1941 All-American Bronze Medal Winner. The finest extra early tomato, producing large clusters of finest quality deep scarlet fruit. In production it equals Earliana with a much higher percentage of fruit of marketable quality. The fruits are solid, heavy, juicy and of excellent flavor. Recommended for early market and home use, especially for the more northern states. Pkt., 8c; D.G.B.P., 17c; oz., 45c; ½ lb., \$1.35.

SPECIAL FAVORITES

660 Mingold — 1940 All-American Silver Medal Winner. An attractive new yellow tomato rich in vitamin D. Fine for tomato juice and sliced in salads with the reds. Fruits are medium large, nearly globular. Solid with thick walls. Pkt., 7c; D.G.B.P., 14c; oz., 35c; ½ lb., \$1.10.

656 White Beauty. Many feature this variety as "Snowball." An ivory white tomato with paper white flesh. As big as Ponderosa with few seeds and no acid. Grow something different in a big excellent quality tomato that anyone can eat. Pkt., 8c; D.G.B.P., 15c; oz., 38c; ½ lb., \$1.15.

662 Golden Ponderosa (Yellow). A very large deliciously mild flavored late variety for the home garden, wilt-resistant and nearly seedless. Same as Ponderosa except flesh deep yellow color. Pkt., 6c; D.G.B.P., 13c; oz., 34c; ½ lb., \$1.05.

Three new Favorites—1 pkg. each White Beauty, Victor and Mingold Tomato—varieties every gardener should know. Tomatoes are a fine crop to can—have plenty of them. Regular price 23c—our special offer No. 501X —15c postpaid.

LATE or MAIN CROP

673 Berry's Giant Improved Ponderosa — the largest tomato developed to date. Our seed has been triple tested, in laboratory greenhouse and trial grounds in removing the roughness and splitting tendency from a favorite of thousands. Almost seedless, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 9c; D.G.B.P., 18c; oz., 55c; ½ lb., \$1.75.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkg., 5c; D.G.B.P., 10c; oz., 18c; ½ lb., 65c; ½ lb., \$1.10.

675 Beefsteak. Bred from the original Ponderosa, and resembles it closely. A brilliant crimson scarlet, wilt resistant, the large fruits are carried in clusters. Solid and meaty, making it excellent for table use. Pkt., 6c; D.G.B.P., 13c; oz., 34c; ½ lb., \$1.05; ½ lb., \$2.00.

666 Ponderosa. Vines large and spreading, bears until frost. Fruits are purplish-pink and grow to immense size. They are solid, meaty and of finest flavor. Pkt., 7c; D.G.B.P., 14c; oz., 35c; ½ lb., \$1.00; ½ lb., \$2.00.

SMALL FRUITED VARIETIES FOR PRESERVES

669 Ground Cherry or Golden Husk. Fruits small, yellow round of delicate flavor. Fine for preserves. Pkt., 5c; D.G.B.P., 12c; oz., 34c; ½ lb., \$1.15.

667 Yellow Plum. About two weeks earlier than Ground Cherry. Very productive. Fruit plum shaped, about 2 inches long. Pkt., 6c; D.G.B.P., 13c; oz., 37c; ½ lb., \$1.25.

BERRY'S PRIZE COLLECTION

15 DEFENSE GARDEN PACKAGES - A \$2.50 Value
Only \$1.00 POSTPAID

Read below
what our
"Defense Program"
means
to you.

Order with
"Lucky 7" Collec-
tion page 49 for a com-
plete Home "Defense
Garden."

WHAT THIS COLLECTION MEANS TO YOU

This collection contains those vegetables most vital in our daily health diet. Individuals make up a nation, so the success of our Defense Program depends on you, your neighbors, friends and relatives. Good health comes first of all from the proper foods in our daily diet, secondly from exercise. You can get both of these best at home in your garden. Victory comes to the "survival of the fittest."

Our entire Defense Program starts with the Home Garden. That means all of us. The slogan for 1942 is not "V" for Victory but "U" for Unity in our "Food for Freedom" program. Berry's, in offering you "Defense Garden" Packages (more seed for less money as explained on opposite page), are cooperating with our U. S. Government defense set-up. If you'll unite and do your part—you will not only order this "Prize" Collection today but also our "Lucky 7" Collection, page 49. These two collections are made up so that they should be ordered together and contain the proper vegetables in such quantities as recommended by U. S. Dept. of Agriculture, your own State College and the Nutrition Program. Do your part for Defense. Order both today—save money now—and more later on food costs. Enjoy life by having its greatest asset—good health.

AMERICA'S GREATEST GARDEN SEED VALUE

We bar no seed house or dealer in making this statement. We let you be the judge and we know you'll agree with us. First, compare our prices on bulk garden seeds with others on Radish, Lettuce, Beets, etc., by ounce, ¼ pound or any amount. You will find we have lowered them in many cases from last year's catalog when others have raised. In fact, we don't know where your \$1.00 will make you as much money as here. The vegetables produced from these "Defense Garden" Packages may save you \$50-\$100 on food costs alone.

This collection at our catalog prices would cost \$1.70 if the same items were ordered individually. Where can you equal such a saving—nearly 50%? We say the same amount of seeds elsewhere would probably cost \$2.50, so this is really a \$2.50 value for \$1.00. It is hard to believe but that is our part in the Defense Program; to give you the largest amount of high quality garden seeds you can buy anywhere for \$1.00 so you will plant a larger garden this year. Now all we ask of you is to do your part in our Defense Program by ordering this collection today as well as Berry's "Lucky 7," page 49. This will give you all the garden seeds you need for a big "Defense Garden" and save you a lot of money on food costs for a small cost of only \$3.39, postpaid.

- (1) This "Prize" Collection is guaranteed the year's biggest garden seed bargain.
 - (2) Don't order alone though—you won't have enough Peas, Beans, Corn, etc.
 - (3) Order with "Lucky 7," page 49, or its equivalent in other garden seeds.
- | | | |
|---|---|--|
| 1-D.G.B.P. Early Alaska Peas | 1-D.G.B.P. Early Green Cluster Cucumber | 1-D.G.B.P. Purple Top White Globe Turnip |

ECONOMY Collection

\$1.50 VALUE
for **89¢**

Not recommended for a "Defense Garden"—only where more space is not available.

A big bargain in a small collection for town gardens where space is limited. Only order this if you can't get more gardening space to unite in our "Food for Freedom" program, or order 3 units if you prefer this to our "Lucky 7" Collection, page 49. Our special price to Home Defense Gardeners is 2 Economy Collections for \$1.65, postpaid; 3 for \$2.39, postpaid. Assortment complies with Nutrition Program recommendations for your daily health diet.

- 1 lb. Giant Stringless Beans
- 1 lb. Little Marvel Peas
- ½ lb. Stowell's Evergreen Sweet Corn
- 1 D.G.B.P. Early Scarlet Turnip White Tip Radish
- 1 D.G.B.P. Detroit Dark Red Beet
- 1 D.G.B.P. Chantenay Carrot
- 1 D.G.B.P. Early Curled Simpson Lettuce
- 1 D.G.B.P. Hollow Crown Parsnip

For a Home Defense Garden order 3 Economy Collections in place of "Lucky 7." You can choose other varieties than the 5 D.G.B.P. vegetables listed or other vegetables where the D.G.B.P. catalog price does not exceed the catalog price on item you are substituting it for. This gives you a choice of 10 D.G.B.P. besides the 5 listed when ordering 3 collections—same price as "Lucky 7," page 49—\$2.39, postpaid.

Germaco Hotkaps

Postpaid prices:
 25 Kap (Home Garden) size with paper setter, 50c. 100 Kap size with light metal setter and steel tamper, \$2.75.

RAISE MORE For DEFENSE

Plant Our Defense Garden Bulk Packages

This second World's War promises to last longer than the first. Victory will come to the "survival of the fittest," and the more we Prepare today the quicker Victory will come tomorrow. In all our plans for victory, our united action as individuals will write the verdict.

Every American can answer the call to arms right at home. Let us unite 100% behind our War Council in their request for more and bigger town and farm gardens. It will not only mean better health for us but a home garden save immensely on living costs. The better health we enjoy as individuals, and the more self-sufficient we become in our own food requirement—the stronger we become as a Nation.

Berry's give everyone an equal opportunity to participate in this widespread War Garden Promotion by offering new large sized Packages "Defense Garden" at the year's lowest prices.

MORE SEED FOR LESS MONEY

The most economical way to order garden seeds is in bulk—you get the most value for your money. With seed supplies short though we don't want to order more than we need and waste any.

The regular sized packets which usually sell for 5 to 10c each at the higher price of garden seeds today don't contain enough seed to plant a larger garden that we all need. We therefore, offer Defense Garden Bulk Packages which at slight additional cost may contain several times as much seed as smaller packets. They contain just as much value as our larger bulk units which we know you will find will save you money.

On Peas, Beans and Sweet Corn we don't offer any regular packets as no one should plant less than D.G.B.P. size. We recommend only D.G.B.P. or larger units be ordered on all vegetables telling you on each vegetable how much 1 D.G.B.P. will plant and how many D.G.B.P. the average family needs to have enough to eat the year round. Study this valuable information at the top of most pages 54-60 inclusive. First though refer again to our Special War Garden Collections on page 48, on opposite page and below.

BERRY'S GUARANTEE SATISFACTION

Berry's have long been known to thousands of garden seed buyers for their superior quality. We are one of the oldest and largest mail order seed houses serving thousands of new customers each year. Triple-tested quality to thousands of old customers who order of us each year has meant gardening satisfaction from quick germinating, strong vigorous growing seeds that produce better quality vegetables.

Our customers' complete satisfaction over many years is probably the most important test given our seeds. We guarantee satisfaction though and if for any reason you don't have good results, even if the seed is not at fault, we'll gladly comply with your wish in making adjustment.

We guarantee safe arrival of every order to you. It is easy to order by mail as you get free delivery—planting instructions—and everything to make it easy for you to raise a big garden with little effort. We ship all orders promptly but don't delay—mail yours today.

IOWA'S APPROVED DEFENSE GARDEN COLLECTION

Recommended by Iowa State College, Seedsmen and Government agencies cooperating for our National Defense and Victory. A similar collection worked out at a joint meeting of above parties was used in Iowa last year with great success. Over 200 quarts of vegetables were canned in many cases by those who planted this unit.

Last year this Approved Iowa Defense Garden Collection was priced at \$5.00. This year despite higher seed prices cooperating seedsmen agreed to lower the price on about the same collection to \$4.50. Now Berry's in order to have universal acceptance on this collection which is adapted for nearly any state in the Union have slashed all price agreements in the interests of National Defense so you can order this big collection weighing about 13 pounds packed for as little as \$3.49 prepaid.

Every farmer should plant this much seed to raise more foodstuff than ever before. We guarantee you can't get it elsewhere at near this price. Order with your neighbor in groups of 8 or more for our special price of \$3.49 prepaid. Because of weight shipment of 8 or more collections together will be made by freight prepaid so give us your freight station. You can order individually though for \$3.75 and we will send it by mail postpaid.

Some Iowa F.S.A. offices may want to order bulk seed and package their own collections. The seed in bulk for this collection where you order for a group of 25 or more would be only \$3.00 F.O.B. this point. Your cooperation would save nearly 50c a unit from our special price.

The Peas, Beans and Sweet Corn in this collection are the same as in our big "Lucky 7" offered page 49 with \$1.00 in garden seeds free on each order. If you don't order this collection as listed we suggest in the interests of National Defense and Victory you order our "Lucky 7" Collection, page 49, "Prize" Collection, page 52, and with your \$1.00 free choice in other garden seeds you will have about the same as offered here.

ORDER SEVERAL DEFENSE GARDEN BULK PACKAGES

New
Brittle
Wax

Our Defense Garden Bulk Packages contain enough seed for one person only. The average family of 5 needs at least 3½ pounds of beans.

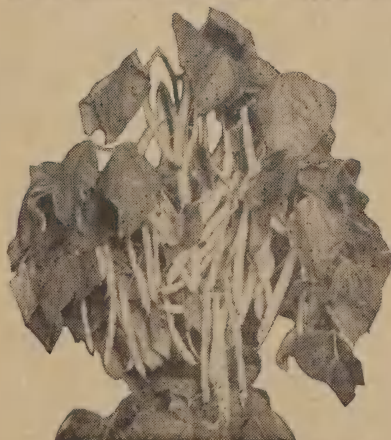

YELLOW POD WAX BEANS

126 New Brittle Wax. The outstanding variety for the home garden. Plant large, erect, vigorous, very productive. Handsome yellow pods, round, slightly curved, extremely brittle, fleshy, succulent, absolutely stringless and fibreless. The standard of highest quality. Postpaid: D.G.B.P., 19c; 1 lb., 29c; 3 lbs., 79c; 5 lbs., \$1.25.

127 Pencil Pod Black Wax. Of finest quality. Large plant, very productive. Pods round, slightly curved, golden yellow, absolutely stringless, brittle and without fibre. Postpaid prices: D.G.B.P., 18c; 1 lb., 27c; 3 lbs., 70c; 5 lbs., \$1.10.

130 Berry's Top Notch Golden Wax. This is an improved strain of regular Golden Wax. Pods average one inch longer and are much more productive. Very early—our best for the home gardens. Postpaid prices: D.G.B.P., 18c; 1 lb., 28c; 3 lbs., 75c; 5 lbs., \$1.15.

117 Sure Crop Wax. Fine for the home garden. A later variety but a heavy yielder under unfavorable conditions. Absolutely stringless pods. Postpaid prices: D.G.B.P., 18c; 1 lb., 27c; 3 lbs., 70c; 5 lbs., \$1.10.

Sure Crop Wax Bean

BERRY'S GARDEN BEANS

Famous for Their Tested Quality

Beans, Peas and Sweet Corn require a large part of your total gardening space. Therefore in connection with Beans and Sweet Corn on these two pages also refer to pages 62-63 for Peas. In planning how much room you need figure an average family of 5 persons for the quantities shown in our "Lucky 7" Collection, page 48, or a total of 9½ pounds. It contains 3½ pounds of Beans and all the best varieties. Prices are just as low as if ordered separately, too, and by ordering this collection you get the big free gift of \$1.00 value in other garden seed your choice.

One pound of beans drilled will plant 100 feet of row. The average person needs at least 60 feet planted to can 8 quarts under the Nutrition Program. Because of this we don't list any small packets of Beans, the smallest being our Defense Garden Bulk Package which contains enough seed for one person only.

If your family requirements are smaller than the amounts found in our "Lucky 7" Collection order the Special Collections of Beans on this page and page 55 to save money.

GREEN PODDED BUSH BEANS

121X—Landreth's Stringless Green Pod. An improved Burpee's Stringless—seeds look the same as Burpee's. Full description and picture on page 50. Postpaid: Defense Garden Bulk Package, 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

116 Tendergreen. (See picture at right.) Hardy and prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: D.G.B.P., 17c; 1 lb., 26c; 3 lbs., 69c; 5 lbs., \$1.05.

134 Burpee's Stringless Green Pod. The old favorite garden bean for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality. Postpaid: D.G.B.P., 15c; 1 lb., 23c; 3 lbs., 59c; 5 lbs., 90c. Not prepaid: 10 lbs., \$1.35.

132 New Bountiful. An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor. Postpaid: D.G.B.P., 16c; 1 lb., 25c; 3 lbs., 65c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.50.

133 Giant Stringless Green Pod. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer. Postpaid: D.G.B.P., 16c; 1 lb., 24c; 3 lbs., 63c; 5 lbs., 95c. Not prepaid: 10 lbs., \$1.40.

125 Tennessee Green Pod. One of the earliest snap beans, pods long, flat, dark green, of excellent flavor. Plants hardy and productive. Postpaid: D.G.B.P., 16c; 1 lb., 24c; 3 lbs., 63c; 5 lbs., 95c. Not prepaid: 10 lbs., \$1.40.

149 Missouri Wonder or Noxall. The earliest green podded pole or corn hill bean. Pods long, round and tender. **Postpaid: D.G.B.P., 18c; 1 lb., 27c; 2 lbs., 49c; 3 lbs., 70c.**

145 King of the Garden Lima. Strong grower and heavy yielder. Uniform pods of fine quality. **Postpaid D.G.B.P., 19c; 1 lb., 29c; 2 lbs., 54c; 3 lbs., 79c.**

Snap, Tender Delicious

Kentucky Wonder

Save money. Order these special bean collections or from pages 49 and 53. Plant more than ever before. Help America be strong.

147 Michigan Navy. The greatest pea or cornfield bean, heavily productive. Popular for cooking. **Postpaid: D.G.B.P., 13c; 1 lb., 19c; 5 lbs., 80c.**

150 Red Kidney. Dark Red. The old-fashioned baking bean. Produces large flat green pods, well filled with large red kidney-shaped beans, rich in flavor. **Postpaid: D.G.B.P., 15c; 1 lb., 23c; 5 lbs., 90c.**

BEAN CULTURE—HOW TO PLANT

Don't plant until the ground is thoroughly warm. Plant about 2½ feet apart in rows, about 3 inches apart in the row. Cover about 2 inches pressing soil down firmly. One pound plants about 100 feet of row. Plant every 10 days to two weeks for a continuous supply. Pick frequently to insure longer bearing. Don't pick or cultivate when vines are wet.

Plant Pole Beans one week later than Bush Beans. Plant 3 to 6 beans to a hill, about 3 to 4 feet apart.

SWEET CORN

Make a succession of plantings, especially on Hybrid varieties. The average person needs 5 quarts canned and 1 pound dried. This requires about 1 D.G.B.P. per person as 1 pound will plant 50 hills 3 feet apart.

EARLY SWEET CORN

276 Early Sensational. The ears are beauties to see, uniform size, well filled and plenty of them. The earliest of any variety with finest flavor. Kernels creamy white, extra sweet, juicy and tender. **Postpaid: D.G.B.P., 19c; 1 lb., 29c; 2 lbs., 54c; 3 lbs., 79c.**

277 Golden Bantam. The favorite early yellow sweet corn. Ears 5 to 6 inches long, kernels broad, deep golden yellow, very sweet, juicy and tender. **Postpaid: D.G.B.P., 13c; 1 lb., 19c; 2 lbs., 36c; 3 lbs., 49c.**

278 Deluxes Golden Giant. Mid-season yellow variety, good for home and market garden. A week earlier than Bantam. **Postpaid: D.G.B.P., 16c; 1 lb., 25c; 2 lbs., 45c; 3 lbs., 59c.**

281 Early Sunshine. Four to five days earlier than Golden Bantam. Good sized ears, 10 to 12 rowed. Kernels golden yellow, sweet, tender. **Postpaid: D.G.B.P., 17c; 1 lb., 26c; 2 lbs., 47c; 3 lbs., 63c.**

283 Early Minnesota. A very dependable productive variety, extra early. Ears are long, with large white grains, sweet and tender. **Postpaid: D.G.B.P., 17c; 1 lb., 27c; 2 lbs., 47c; 3 lbs., 63c.**

LATE SWEET CORN

289 Golden Evergreen. A cross between Golden Bantam and Stowell's Evergreen combining the deliciously sweet flavor of Golden Bantam with the tenderness of Stowell's Evergreen. Ears with 14 to 18 rows, kernels rich golden yellow of finest quality. **Postpaid: D.G.B.P., 17c; 1 lb., 26c; 3 lbs., 69c; 5 lbs., \$1.05.**

290 Early Evergreen. The earliest of all Evergreens. Ears are fully as large as Stowell's and remain tender for a longer period. One week earlier. **Postpaid: D.G.B.P., 16c; 1 lb., 25c; 2 lbs., 45c; 3 lbs., \$1.00.**

287 Stowell's Evergreen. The best known standard main crop sweet corn, excelling all others. Ears 8 inches long, 16 to 20 rowed. Very productive. Kernels clear white, deep, medium width, sugary and tender. **Postpaid: D.G.B.P., 14c; 1 lb., 21c; 3 lbs., 57c; 5 lbs., 85c.**

284 Country Gentleman. One of the best known late varieties, superior for home and market gardens and commercial canners. Stalks often with two ears. Ears 7 to 8 inches long, with narrow irregular grains of good quality, sweet and tender. **Postpaid: D.G.B.P., 15c; 1 lb., 23c; 3 lbs., 63c.** Not prepaid: 10 lbs. \$1.25.

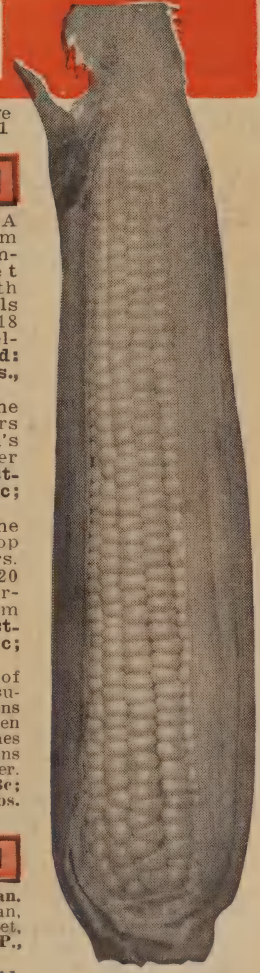

HYBRID SWEET CORN

284X—Golden Country Gentleman. A golden yellow country Gentleman, large ears, shoe peg Kernels, sweet, fine quality. **Postpaid: D.G.B.P., 21c; 1 lb., 33c; 3 lbs., 89c.**

277X Golden Bantam Hybrid. Your favorite early Sweet Corn now better than ever. More hardy, finer flavor, heavier yielder. **D.G.B.P., 23c; 1 lb., 37c; 2 lbs., 69c.**
 Other Hybrids—Page 49.

Stowell's Evergreen

BEETS OF QUALITY

CHOICE TABLE BEETS

Beets should be planted both in Spring and Fall. Will keep fine stored in pit or may be canned. One D.G.B.P. will plant 25 feet of row. Plant about 1½ inches deep about 2 inches apart in row. Make several plantings about one week apart. Average person requires 10 pounds per year—1 D.G.B.P.

393X Berry's Early Blood Red Beet. Very early, thrives anywhere, deliciously crisp and tender, good uniform size. (Pictured, described more fully page 50.) Postpaid: Pkt., 15c; D.G.B.P., 22c; ¼ lb., \$1.10; ½ lb., \$2.00; 1 lb., \$3.50.

154 Early Blood Turnip. (Pictured at right.) Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper. Postpaid: Pkt., 5c; D.G.B.P., 12c; oz., 18c; ¼ lb., 49c; 1 lb., \$1.79.

151 Crimson Globe. An exceedingly fine table beet, of mid-season maturity. Large globe shaped roots. Flesh purplish-red with moderate zonings. Postpaid: Pkt., 5c; D.G.B.P., 13c; oz., 19c; ¼ lb., 54c; 1 lb., \$1.98.

153 Improved Extra Early Eclipse. An early variety for home use. Globe shaped, medium dark red color, with zones of lighter color. A fine pickler; sweet, crisp. Postpaid: Pkt., 5c; D.G.B.P., 12c; oz., 18c; ¼ lb., 49c; 1 lb., \$1.79.

155 Crosby's Egyptian. An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red. Postpaid: Pkt., 5c; D.G.B.P., 12c; oz., 18c; ¼ lb., 49c; 1 lb., \$1.79.

157 Detroit Dark Red. The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone. Postpaid: Pkt., 6c; D.G.B.P., 14c; oz., 21c; ¼ lb., 59c; 1 lb., \$2.10.

167 Berry's Early Wonder. (Pictured at right.) This wonderful early beet is the result of years of reselecting and improving. For earliness it can't be beat. Very uniform in growth, root globular in shape. Postpaid: Pkt., 7c; D.G.B.P., 15c; oz., 23c; ¼ lb., 65c; 1 lb., \$2.25.

158 Swiss Chard. Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt., 5c; D.G.B.P., 12c; oz., 18c; ¼ lb., 49c; 1 lb., \$1.79.

Early Blood Turnip Beet

The Defense Garden Program calls for more food. The average family should plant at least 3 D.G.B.P. of Beets.

MANGELS AND SUGAR BEETS

Stock Feeders—Raise Mangels

The average yield of mangels per acre is 30 tons. Aside from the minimum feeding value of \$2.50 per ton, the mangel is a regulator that keeps stock in the best health.

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels on. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill rows.

The following 3 varieties postpaid: Oz., 15c; ¼ lb., 45c; 1 lb., \$1.35; 5 lbs., \$6.00.

161 Danish Sludstrup. A good cropper, with high feeding value. Long, reddish-yellow.

160 Golden Tankard. Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

166 Giant Half Sugar. Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest.

Berry's Early Wonder Beet
(Described at left)

CELERY

251 White Plume. Earliest of all. A favorite for the table because of crisp tender quality. Stalks are uniformly large and solid. Pkt., 6c; D.G.B.P., 16c; oz., 25c; ¼ lb., 65c.

253 Giant Pascal. An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanches to a beautiful yellowish-white. Pkt., 6c; D.G.B.P., 16c; oz., 25c; ¼ lb., 65c.

252 Golden Self Blanching. Most desirable for truckers. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt., 8c; D.G.B.P., 20c; oz., 30c; ¼ lb., \$1.00.

255 Celeriac or Turnip-rooted Celery. Roots nearly globe-shaped, are used for flavoring soup, stews, etc. Postpaid: Pkt., 7c; D.G.B.P., 18c; oz., 27c; ¼ lb., 75c.

CABBAGE

Golden
Acre

LATE VARIETIES

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity. Postpaid: Pkt., 5c; D.G.B.P., 16c; oz., 24c; ¼ lb., 70c; ½ lb., \$1.25.

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper. Postpaid: Pkt., 6c; D.G.B.P., 18c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.45.

191 Danish Ballhead. A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, storage, and kraut. Pictured at right. Postpaid: Pkt., 8c; D.G.B.P., 21c; oz., 35c; ¼ lb., \$1.00; ½ lb., \$1.75.

194 Mammoth Redrock. The largest and best red cabbage. It is fine for slaw, pickling or boiled. A sure header, heads weighing 10 to 15 lbs. An excellent keeper. Postpaid: Pkt., 7c; D.G.B.P., 19c; oz., 28c; ¼ lb., 85c; ½ lb., \$1.55.

CELERY OR CHINESE CABBAGE

175 Celery or Chinese Cabbage. Most popular for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Makes fine chicken feed. Postpaid: Pkt., 5c; D.G.B.P., 25c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25.

CAULIFLOWER

Choicest Imported Seed

Danish Giant

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. Postpaid: Pkt., 10c; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00; ¼ lb., \$9.00.

221 Berry's Danish Giant. Snow white heads, large and compact, of excellent quality. The finest late variety. Postpaid: Pkt., 10c; ¼ oz., \$1.00; ½ oz., \$1.75; oz., \$3.00; ¼ lb., \$9.00.

Cabbage is of vital importance in our Health and Nutrition Program for Defense. Rich in Vitamin C when eaten raw. Can be grown over a long season. Plant seed in hills for plants outdoors as early as possible, cover lightly about ½ inch. Plant both early and late varieties. Order at least 2 D.G.B.P. to have plenty for a daily diet. One person needs about 50 pounds a year. Used more often in a health diet than any other vegetable except Potatoes and Tomatoes.

EARLY VARIETIES

971X Berry's Earliest Cabbage. The best for earliness, quality and productiveness. (See picture page 50.) Postpaid: Pkt., 15c; D.G.B.P., 25c; ¼ lb., \$1.50.

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets. Postpaid: Pkt., 8c; D.G.B.P., 21c; oz., 35c; ¼ lb., \$1.00; ½ lb., \$1.75.

176 Early Jersey Wakefield. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers. Postpaid: Pkt., 6c; D.G.B.P., 18c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.45.

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. Postpaid: Pkt., 7c; D.G.B.P., 20c; oz., 30c; ¼ lb., 90c; ½ lb., \$1.60.

185 Norseman. A good shipping variety, heads round, weigh 8 to 10 lbs. Superb quality. Postpaid: Pkt., 5c; D.G.B.P., 17c; oz., 26c; ¼ lb., 78c; ½ lb., \$1.40.

Danish
Ballhead

Our seeds are guaranteed satisfactory. Defense Garden Bulk Packages are the year's biggest garden seed values. See page 53.

MEDIUM EARLY

181 Early Flat Dutch. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs. Postpaid: Pkt., 5c; D.G.B.P., 16c; oz., 24c; ¼ lb., 70c; ½ lb., \$1.25.

180 Glory of Enkhuizen. A variety from Holland. Used largely for kraut, also by truck gardeners and shippers. Heads globe shaped, solid, with few outer leaves, weigh 6 to 8 lbs. Remarkably fine flavor, splendid keeper. Postpaid: Pkt., 6c; D.G.B.P., 18c; oz., 27c; ¼ lb., 80c; ½ lb., \$1.45.

YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

174 Marion Market. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later. Postpaid: Pkt., 9c; D.G.B.P., 24c; oz., 45c; ¼ lb., \$1.25.

190 Wisconsin Hollander No. 8. Similar to Danish Ballhead. Good for kraut and winter storage. Postpaid: Pkt., 9c; D.G.B.P., 24c; oz., 45c; ¼ lb., \$1.25.

183 Jersey Queen. 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed small and compact, permitting close planting. Postpaid: Pkt., 8c; D.G.B.P., 22c; oz., 41c; ¼ lb., \$1.15.

188 Racine Market. 60 days. Selected from Copenhagen Market. It is dependably early and uniform; heads are round, solid, and of superior quality. Fine for early kraut. Postpaid: Pkt., 7c; D.G.B.P., 21c; oz., 39c; ¼ lb., \$1.05.

BETTER SEED MEANS BETTER GARDENS

TABLE CARROTS

Carrots are vital to health. Rich in Vitamin A, also B₁ and C. They have a wide variety of uses in meal plannings, can be eaten raw from gardens, stored in pits or canned. The average family should plant 1½ ounces of seed or 150 feet of row half in the spring, half in the fall. Cover seed only a fraction of an inch.

Seed supplies of carrot are the shortest in history. We have made the year's lowest prices on D.G.B.P. though good as long as our supplies last.

012X Berry's Tenderflesh Carrot. A superbly delicious quality vegetable, entirely coreless. A vegetable favorite of all who try it. (Pictured page 50.) Postpaid: Pkt., 15c; D.G.B.P., 29c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.25, postpaid.

201 Oxheart. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder. Postpaid: Pkt., 6c; D.G.B.P., 19c; oz., 29c; ¼ lb., 85c; ½ lb., \$1.55; 1 lb., \$2.95.

204 Danvers Half Long. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive. Postpaid: Pkt., 7c; D.G.B.P., 21c; oz., 32c; ¼ lb., 95c; ½ lb., \$1.75; 1 lb., \$3.25.

205 Chantenay. A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted, deep orange in color. A heavy yielder. Postpaid: Pkt., 8c; D.G.B.P., 24c; oz., 36c; ¼ lb., \$1.05; ½ lb., \$1.95; 1 lb., \$3.75.

212 New Coreless Carrot. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early, uniform size. Postpaid: Pkt., 9c; D.G.B.P., 27c; oz., 39c; ¼ lb., \$1.15; ½ lb., \$2.10; 1 lb., \$3.95.

STOCK CARROTS

206 Long Orange. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper. Oz., 30c; ¼ lb., 90c; ½ lb., \$1.70; 1 lb., \$3.15.

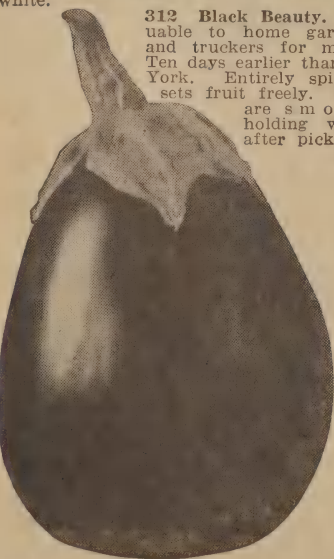

208 Mastodon. Flesh white, crisp, solid, very sweet in flavor. Roots frequently measure 15 to 20 inches in circumference. A heavy yielder. Oz., 15c; ¼ lb., 45c; ½ lb., 85c; 1 lb., \$1.50.

EGGPLANT

These two varieties postpaid: Pkt., 9c; D.G.B.P., 24c; ¼ lb., \$1.50; ½ lb., \$2.50; 1 lb., \$4.50.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New York Purple

New Coreless Carrot
(Seed very scarce)

Defense Garden Bulk Packages are guaranteed to be the year's biggest values. Order at least 3 on carrots.

JAP HULL-LESS HYBRID POP CORN

New Minihybrid 250 Japanese Hull-less Popcorn is the variety to grow this year. It will give you bigger yields, earlier maturity, better quality and a premium price.

Introduced by Minnesota Experiment Station, records since 1931 show: (1) 16% greater yield than average Jap. Hull-less; (2) 20% greater popping expansion; (3) earlier maturity; (4) it is practically free from smut; and (5) it is in popping condition 30 days earlier than regular Jap. Hull-less.

Last year there was not enough to supply the demand at 45¢ a pound. This year we offer it at new low prices postpaid: D.G.B.P., 20c; 1 lb., 32c; 2 lbs., 59c; 3 lbs., 81c.

CUCUMBER

Special Pickling Cucumber. Available in regular size packets only—15¢ each.

225 Berry's Champion Pickler. The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid: Pkt., 15c; D.G.B.P., 24c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

226 National Pickling. The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, 1¼ pounds. Postpaid: Pkt., 8c; D.G.B.P., 13c; oz., 19c; ¼ lb., 59c; ½ lb., \$1.09; 1 lb., \$1.89.

228 Chicago Pickle. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size. Postpaid: Pkt., 7c; D.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., \$1.05; 1 lb., \$1.80.

230 Early Green Cluster. A fine pickling variety and for early slicing. Very prolific, fruits small, pale green, borne in bunches. Postpaid: Pkt., 6c; D.G.B.P., 11c; oz., 17c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.75.

231 White Spine Evergreen. Fine for home garden, and widely used for shipping. Dark green, holds color well. Crisp and tender. Postpaid: Pkt., 6c; D.G.B.P., 11c; oz., 17c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.75.

233 Boston Pickler. Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for table. Postpaid: Pkt., 7c; D.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., 10c; 1 lb., \$1.80.

234 Improved White Spine. Vigorous and productive, fruit uniform, seven to nine inches long, very showy. Postpaid: Pkt., 6c; D.G.B.P., 11c; oz., 17c; ¼ lb., 50c; ½ lb., 95c; 1 lb., \$1.75.

239 Straight 8. The highest award winner of the All-American trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping. Postpaid: Pkt., 9c; D.G.B.P., 14c; oz., 21c; ¼ lb., 63c; ½ lb., \$1.15; 1 lb., \$2.00.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp. Postpaid: Pkt., 8c; D.G.B.P., 13c; oz., 19c; ¼ lb., 59c; ½ lb., \$1.09; 1 lb., \$1.89.

19¢

POP CORN

All varieties postpaid: D.G.B.P., 11c; ½ lb., 12c; 1 lb., 16c; 3 lbs., 45c; 5 lbs., 70c.

301 White Rice. Grains clear white, long and pointed at the top. Pops out large and tender.

303 Japanese Hull-less. Dwarf grower, small ears. Kernels hull-less, snowy white when popped; fine flavor.

304 South American (Dynamite). Kernels yellow, pop to immense size. Stalks grow larger than field corn, with two to three ears on a stalk.

ONION SEED and ONION SETS

NEW CROP—HIGH GERMINATION

High germinating onion seed stocks are the shortest in history. A greatly reduced acreage was planted by growers this year and some crops were total failure due to thrip. There has also been a heavy export trade we normally don't experience.

We are very fortunate in being able to offer you only strictly new crop seed testing high in germination and guaranteed satisfactory. Our prices to you in some cases are lower than we would sell to other seed houses. Stocks are limited though so order at once. Have your own State Laboratory make a germination test for you. We'll guarantee the year's lowest onion seed prices on high germinating stocks regardless of quantity ordered. Our stocks are complete.

Onion is an important vegetable to good health. One ounce will plant 100 feet of row the need of an average family. We suggest raising some onions from seed, plants and sets. Sets are best for early green onions, plants produce the later milder varieties.

432 Southport Red Globe. The finest of the red onions. Uniform in size, handsome, perfect globe type. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. (Pictured at right.) Pkt., 7c; D.G.B.P., 27c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.25.

426 Improved Large Red Wethersfield. Bulbs large, well flattened, skin purplish-red, flesh white, tinged with pink, very firm. Keeps well; an excellent commercial variety. Pkt., 7c; D.G.B.P., 29c; oz., 42c; ¼ lb., \$1.35; ½ lb., \$2.40; 1 lb., \$4.50.

431 Woodruff's Early Yellow Globe. 3 weeks earlier than Danvers or Southport Yellow Globe. Very hardy, heavy yielding. Beautiful yellow color. Globe shaped. Best for storage of early types. Pkt., 9c; D.G.B.P., 31c; oz., 49c; ¼ lb., \$1.50; ½ lb., \$2.80; 1 lb., \$5.10.

441 White Portugal. A large onion, skin and flesh white, mild flavored. Excellent for sets, pickling, bunching, and storage. Pkt., 9c; D.G.B.P., 39c; oz., 59c; ¼ lb., \$1.75; ½ lb., \$3.25; 1 lb., \$6.25.

427 Golden Globe or Golden Marvel. Finest yellow globe variety for sets or commercial onions. A ready seller on any market—has eye appeal. Excellent keeper. Postpaid: Pkt., 8c; D.G.B.P., 31c; oz., 49c; ¼ lb., \$1.50; ½ lb., \$2.80; 1 lb., \$5.10.

435 Yellow Globe Danvers. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh and mild flavor. Most productive with fine keeping qualities. Postpaid: Pkt., 8c; D.G.B.P., 30c; oz., 45c; ¼ lb., \$1.40; ½ lb., \$2.50; 1 lb., \$4.75.

443 Ebenezer. An excellent variety for producing sets of exceptional keeping quality. Matured bulbs will keep in good condition all winter. Flesh white, tender and unusually mild. Postpaid: Pkt., 8c; D.G.B.P., 30c; oz., 45c; ¼ lb., \$1.40; ½ lb., \$2.50; 1 lb., \$4.75.

440 Crystal White Wax. A fine quality white onion of extremely mild flavor. Will grow anywhere, suitable for table use or growing sets. Postpaid: Pkt., 9c; D.G.B.P., 35c; oz., 53c; ¼ lb., \$1.60; ½ lb., \$3.00; 1 lb., \$5.75.

436 Southport Yellow Globe. Grown for commercial purposes. Large, globe shaped, rich yellow color. Flesh white and mild. An excellent keeping onion. (Picture at left.) Postpaid: Pkt., 8c; D.G.B.P., 32c; oz., 48c; ¼ lb., \$1.45; ½ lb., \$2.65; 1 lb., \$4.95.

425 Yellow Sweet Spanish. Most popular variety today. Golden yellow, larger than Prizetaker, flesh white, very mild and of pleasing flavor. Very prolific, excellent for shipping or fall storage. Postpaid: Pkt., 9c; D.G.B.P., 35c; oz., 53c; ¼ lb., \$1.60; ½ lb., \$3.00; 1 lb., \$5.75.

434 White Sweet Spanish. The largest and mildest of all onions. American grown strain. Globular, with golden yellow skin; flesh white, very mild and of good flavor. Postpaid: Pkt., 9c; D.G.B.P., 37c; oz., 56c; ¼ lb., \$1.65; ½ lb., \$3.10; 1 lb., \$6.00.

Produce Larger Onions of Highest Quality

Sets produced under the most ideal conditions, the longest keepers, uniform size and well cured, of finest quality. We guarantee delivery of your set order free from sprouts.

445 Red. Postpaid: ½ gal., 39c; 1 gal., 69c. Not prepaid: ½ Bu., \$1.75; 1 Bu., \$3.25; 5 Bu., \$3.00 Bu.

444 Yellow. Same price as Red.

446 White. Postpaid: ½ gal., 42c; 1 gal., 75c. Not prepaid: ½ Bu., \$1.95; 1 Bu., \$3.60; 5 Bu., \$3.35 Bu.

GARLIC SETS

448 Garlic Sets. A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade. Postpaid: ½ lb., 29c; 1 lb., 55c.

433 Southport White Globe. A splendid commercial onion, attractive in color, size and shape. Distinct globe type, flesh mild, fine grained, tender. Yields abundantly. Postpaid: Pkt., 9c; D.G.B.P., 35c; oz., 53c; ¼ lb., \$1.60; ½ lb., \$3.00; 1 lb., \$5.75.

442 Yellow Bermuda. Noted for its excellent flavor, of nearly white flesh. Will mature from seed or make fine plants. Postpaid: Pkt., 9c; D.G.B.P., 35c; oz., 53c; ¼ lb., \$1.60; ½ lb., \$3.00; 1 lb., \$5.75.

Yellow Sweet Spanish

Southport Yellow Globe

MUSK MELONS

Musk melons are rich in vitamins—an excellent health food. They thrive under varied conditions and soils. Plant in hills six feet apart each way or if in drills have six feet between rows and thin plants to 12 inches in the row. Plant thick and thin out after plants are up. The average family needs at least 1 ounce which will plant 100 hills or drill 200 feet of row.

SALMON FLESHED

402 Berry's Favorite. (Center Picture.) A large size melon with quality equal to any. Early, luscious flavored, finest eating qualities for the home garden. Size about 6 $\frac{1}{4}$ by 7 $\frac{3}{4}$ inches, weighs about 6 $\frac{3}{4}$ pounds. Prominent ribs, good netting. **Postpaid: Pkt., 15c; D.G.B.P., 22c; oz., 29c; $\frac{1}{4}$ lb., 85c; $\frac{1}{2}$ lb., \$1.50; 1 lb., \$2.75.**

409 Golden Delicious. A popular medium early, large melon. Thick flesh of finest texture and rich flavor. Good netting over a hard rind. Slightly smaller than Berry's "Favorite" and ribs not so prominent. **Postpaid: Pkt., 6c; D.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 45c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.40.**

410 Shumway's Giant. The largest of the pink fleshed melons it is deeply ribbed with a fine netting. Weighs about 10 pounds. Skin turns creamy yellow as it ripens. About 4 days later than Golden Delicious. **Postpaid: Pkt., 7c; D.G.B.P., 10c; oz., 16c; $\frac{1}{4}$ lb., 48c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.45.**

418 Osage. (Picture at right.) The finest flavored "Queen" of salmon-fleshed melons. Flesh exceptionally thick, tender and sweet. Fruits distinctly ribbed and netted; weigh around 6 lbs. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 65c; 1 lb., \$1.25.**

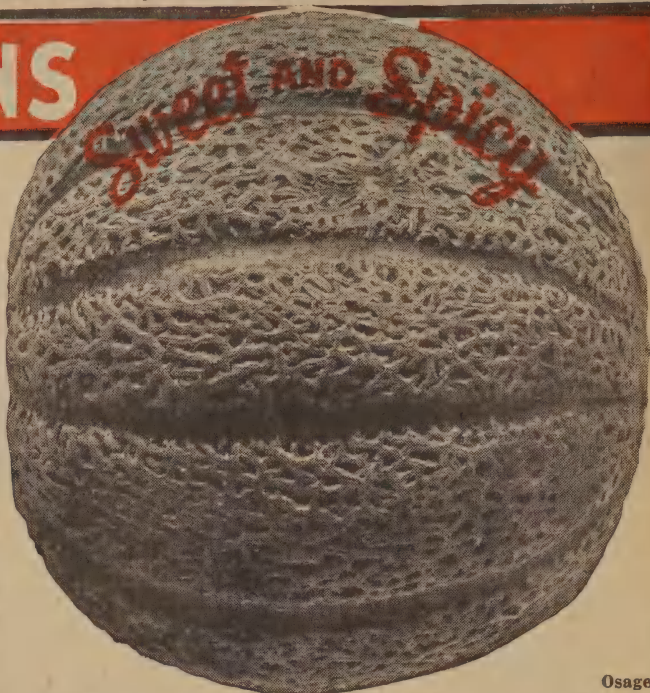

411 Sugar or Honey Rock. All-American winner in 1933. Has been most popular for the home garden since. Very early, weighs about 3 pounds, flesh thick and very sweet. **Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 14c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.35.**

413 Hoodoo (Hearts of Gold). Fruits practically round, weighing about 2 lbs., small seed cavity. Tender, juicy, sweet and delicious. A good shipper. **Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 14c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.35.**

414 Banana. Resembles a banana in shape, growing 18 to 30 inches long. Flesh salmon color, with delicious banana-like flavor. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 65c; 1 lb., \$1.25.**

420 Hales Best. An early melon with very thick flesh of sweet flavor. A Rocky Ford type, but excelling all others for long distance shipping to markets. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 65c; 1 lb., \$1.25.** In Approved Iowa Defense Garden Collection page 53.

416 Tip Top. Very productive, of fine appearance, showy. Fruits pale green, turning to yellow at maturity; flesh bright salmon, sweet and delicious. Weighs about 8 lbs. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 65c; 1 lb., \$1.25.**

Osage

GREEN FLESHED

Musk melon seed is short this year. This applies to other vine seed crops in Colorado. We believe you will find we have the year's biggest values on all garden seeds for the Home Defense Garden. We save you \$1.00 on the Iowa Defense Garden Collection, page 53, which is adapted for every American gardener.

417 Gold Lined Rocky Ford. In delicious flavor Gold Lined far excels the regular Rocky Ford. It is slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm. **Postpaid: Pkt., 8c; D.G.B.P., 12c; oz., 18c; $\frac{1}{4}$ lb., 55c; $\frac{1}{2}$ lb., \$1.00; 1 lb., \$1.85.**

408 Montreal Market. Fruits very large, thick, green meated, delicious and sweet. Often weigh 18 lbs. Almost round, deeply ribbed, well netted. **Pkt., 5c; D.G.B.P., 9c; oz., 13c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 70c; 1 lb., \$1.30.**

412 Early Hackensack. A most popular variety for home use

and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy. **Postpaid: Pkt., 6c; D.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 45c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.50.**

405 Early Green Nutmeg. One of the oldest and most popular varieties. Very early and prolific. Fruits weigh about 3 pounds, are heavily ribbed and well netted. **Pkt., 7c; D.G.B.P., 11c; oz., 16c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 90c; 1 lb., \$1.65.**

401 Extra Select Rocky Ford. (Picture at left.) Probably the most widely known cantaloupe. Almost round, covered with netting. Green flesh of delicious flavor. Fruits weigh about 2 $\frac{1}{2}$ lbs. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 65c; 1 lb., \$1.25.**

BERRY'S FAVORITE MELON PATCH

Enough seed for the Home Defense Garden in these favorite varieties ripening at different times: 1 D.G.B.P. Golden Delicious, Osage and Rocky Ford. No. 600—3 for only 29c, a saving of 10c from regular catalog prices.

MUSTARD

Postpaid prices on all 4 varieties; **Pkt., 5c; D.G.B.P., 8c; oz., 12c; 2 oz., 18c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.**

710 Chinese Curled. The best known and most popular for greens. Large leaves. Ready for use in 6 weeks after sowing.

713 Southern Giant Curled. The most popular sort for greens. Leaves long and wide, light green, heavily crumpled and curled at the edges.

711 Large Smooth Leaved. Large broad oval leaves of deep green color with a white rib. A vigorous variety.

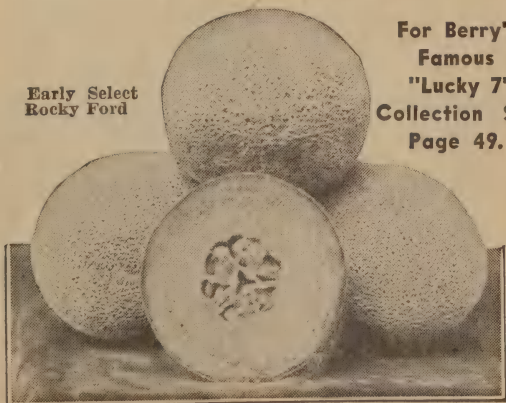

580 Mustard-Spinach. A quick grower, resistant to heat and drought. Used for greens, combines flavor of both mustard and spinach.

Berry's Favorite
Musk Melon

Every family should plant as much musk melon seed as 2 D.G.B.P. to insure enough for their needs.

Collection See
Page 49.

WATER MELONS

Berry's Improved Kleckley Sweet

Plant in hills about 8 feet apart each way. One D.G.B.P. will plant about 15 hills. The average family if space permits should plant twice that much. Don't disturb the vines after they start to run. Don't plant until ground is warm and cover only about 1 inch. Because of long growing season required in northern states plant only early varieties.

WHITE SEEDED

368 Berry's Improved Kleckley Sweet. Finest melon for home and market gardens. An improved type of the old popular strain; larger and wilt-resistant. Medium early, dark green skin, with bright red flesh very tender and melting. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**
153X Berry's Mammoth Melting Sugar. Very early for such a large melon. Sweetest, most delicate flavor of any. (Pictured page 52.) **Postpaid: Pkt., 15c; D.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.**
370 Georgia Rattlesnake. A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant. **Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

374 Dixie Queen. A recent introduction of finest quality. Early, it attains an average size of 15x12½ inches, weight 32 pounds. Color light green striped with darker green. Flesh dark pink with very few seeds—white. Deliciously flavored. **Postpaid: Pkt., 7c; D.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35.**

375 Mixed. Finest for the boy's melon patch. Old favorite varieties—something to please everybody. 20c for ¼ lb. will pay big returns. Will plant 120 hills of about 30 varieties. **Postpaid: Pkt., 4c; D.G.B.P., 6c; oz., 8c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 75c.**

BLACK SEEDED

357 Harris Earliest. Extra early, ready to pick in about 80 days, melons weigh about 20 pounds. Very red, firm flesh, of most delicious flavor. Fruits round, dark green striped with light green. **Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

358 Sweetheart. Vines vigorous and productive. Fruits large, oval. Rind thin, flesh bright red, firm, sweet and tender. A very fine shipper. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

371 Berry's New Winter. A melon of finest quality that will keep until Christmas. Nearly round, pale yellow. Flesh is bright red and sweet as honey. **Postpaid: Pkt., 8c; D.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.65.**

376 Early Kansas Red Seeded. A remarkably early melon for its large size. Finest quality, flesh rich red of delightful flavor. **Postpaid: Pkt., 7c; D.G.B.P., 10c; oz., 14c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

379 Early Northern Sweet. A new fine first early variety for home gardens. From Minnesota it is nearly round. Color green, flesh of best quality, dark pink in color. Seeds light brown. **Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

Halbert's Honey

352 Halbert's Honey. One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 55c; 1 lb., 95c.**

356 New Irish Grey. Large, long grey melon of excellent quality. Rich red flesh of good texture. Rind thin but very tough. Good shipper. **Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

360 Tom Watson. Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

369 Golden Honey. Dark green, medium sized, long oval shape. Cream colored flesh which is very tender and delicious. **Pkt., 7c; D.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

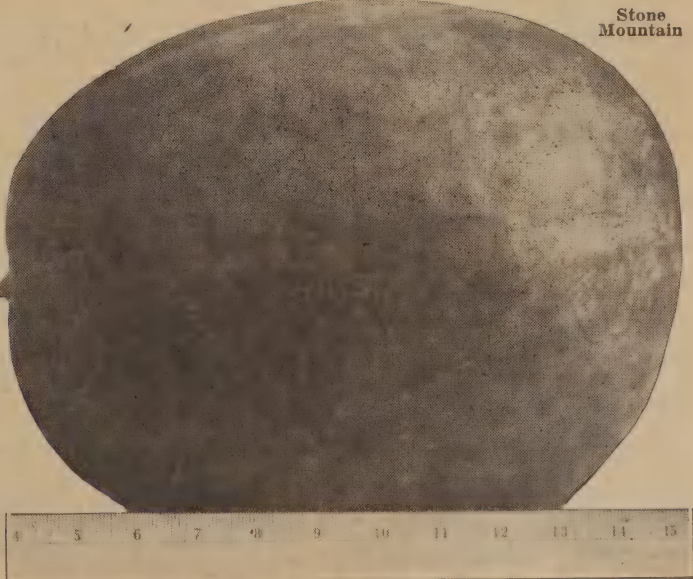

372 Phinney's Early. Small, long type, light and dark green striped. An early melon. Very prolific. Flesh pinkish red. **Pkt., 6c; D.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 55c; 1 lb., 95c.**

377 Stone Mountain. Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious. (See picture at right.) Wilt-resistant. **Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

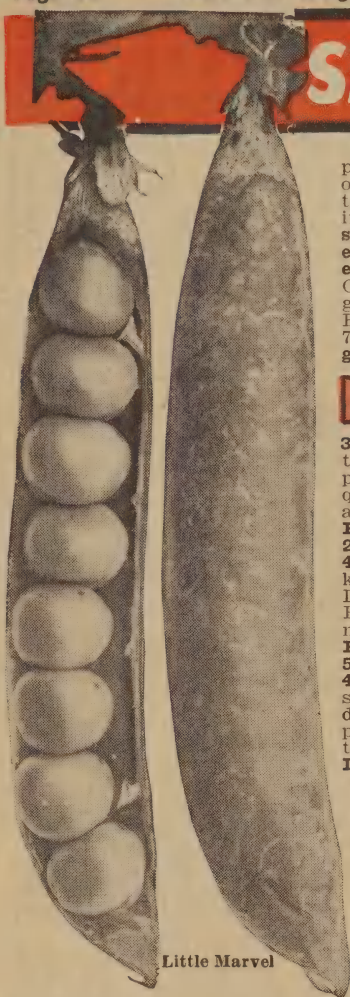

Berry's "Sweet As Honey" Melons

Just enough seed in our best varieties to insure favorite melons over a longer season. Plant all at same time. 1 D.G.B.P. Golden Honey, Dixie Queen and Berry's Improved Kleckley Sweet—regular price 27c—No. 610—only 19c, p.stpaid.

Mountain**

SAVORY GARDEN PEAS

Little Marvel

The average family needs to plant in pounds more Peas than Beans. They are one of the most delicately flavored of all vegetables being rich in Vitamins A, B, C, and iron. Excellent for home canning. You should plant at least 2 pounds of early varieties, 3 pounds of later types and ½ pound of edible Peas such as White Marrowfat, Dwarf Grey Sugar or Mammoth Melting Sugar. To get what you need and save money order our Home Garden Collection this page or "Lucky 7" page 49. Nothing smaller than D.G.B.P. gives you enough seed for planting.

EXTRA EARLY VARIETIES

364X Berry's Supreme Wonder Pea. (Pictured page 50.) A variety you will want to plant several times during the spring. Finest quality for eating fresh or canning, most abundant yielder.

Postpaid: D.G.B.P., 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

451 New Laxtonian. (1½ ft.) The best known of the early dwarf, large podded sorts. Large telephone like pods of finest quality. Requires no support, making it one of the most popular varieties. (Pictured below.)

Postpaid: D.G.B.P., 19c; 1 lb., 29c; 3 lbs., 79c; 5 lbs., \$1.19.

478 Laxton's Progress. An excellent and standard dwarf early variety for home gardens. Bears heavily, producing straight, plump deep green pods. Each pod contains 8 to 10 large sweet deep green peas. Postpaid: D.G.B.P., 18c; 1 lb., 28c; 3 lbs., 77c; 5 lbs., \$1.15.

460 Thomas Laxton. (2½ ft.) A great favorite of home and market gardeners. Pods single, plump and square ended, containing 7 to 8 large tender peas of good quality. Postpaid: D.G.B.P., 19c; 1 lb., 29c; 3 lbs., 79c; 5 lbs., \$1.19.

459 Berry's American Wonder. (1 ft.) Vines bear in greatest abundance. Pods large, containing 5 to 8 delicious peas. Very early. Postpaid: D.G.B.P., 15c; 1 lb., 23c; 3 lbs., 63c; 5 lbs., \$1.00.

456 McLeans Little Gem. A pea that always gives entire satisfaction. Very early but has the fine sugary flavor of later

sorts. Pods 2½ to 3 inches long, round and filled with peas of delicious flavor. Postpaid: D.G.B.P., 16c; 1 lb., 25c; 3 lbs., 69c; 5 lbs., \$1.10.

455 Early Alaska. Smooth seeded and earliest of all. Hardy, vigorous grower maturing well filled pods of finest quality. Ideal for first markets and home gardens. Postpaid: D.G.B.P., 13c; 1 lb., 19c; 3 lbs., 54c; 5 lbs., 85c.

457 First and Best. Favorite home garden variety for early crop. Very hardy and abundant yielder. Yellow seeded peas 6 to 8 to a pod. Postpaid: D.G.B.P., 14c; 1 lb., 21c; 3 lbs., 60c; 5 lbs., 95c.

BERRY'S "BEST 4" HOME GARDEN PEAS

An all-season collection of varieties chosen for best yields and finest quality. We want everyone to order these 4 varieties in the quantity they need at our special low prices.

Early Alaska. Earliest of all. Smooth seeded. 56 days.

Little Marvel. Finest early dwarf wrinkled pea. 62 days.

Berry's Everbearing. Fine, prolific, mid-season. 70 days.

Fillbasket. Superior late variety (Pole). 75 days.

620 1—D.G.B.P. above 4 varieties—49c.

Regular catalog price 65c—you save 16c.

621 1 lb. above 4 varieties—4 lbs. Postpaid, 79c.

Regular catalog price \$1.04—You save 25c.

MID-SEASON VARIETIES

471 Telephone. (4 ft.) A standard variety of high quality, excellent for home and market garden and shipping. Pods filled with peas of fine flavor. (Wrinkled.) Postpaid: D.G.B.P., 18c; 1 lb., 29c; 3 lbs., 80c; 5 lbs., \$1.20.

477 Dwarf Telephone. (22 in.) Vines light green, stocky and productive. Pods large, filled with 8 to 10 wrinkled peas of excellent quality. Excellent for home gardens, truckers and shipping. Picture next page. (Wrinkled.) Postpaid: D.G.B.P., 15c; 1 lb., 23c; 3 lbs., 63c; 5 lbs., \$1.00.

476 Dwarf Grey Sugar. (2-2½ ft.) An edible podded variety; sweet, tender and delicious. Very productive; resistant to Fusarium wilt. (Smooth seeded.) Postpaid: D.G.B.P., 16c; 1 lb., 25c; 3 lbs., 69c; 5 lbs., \$1.10.

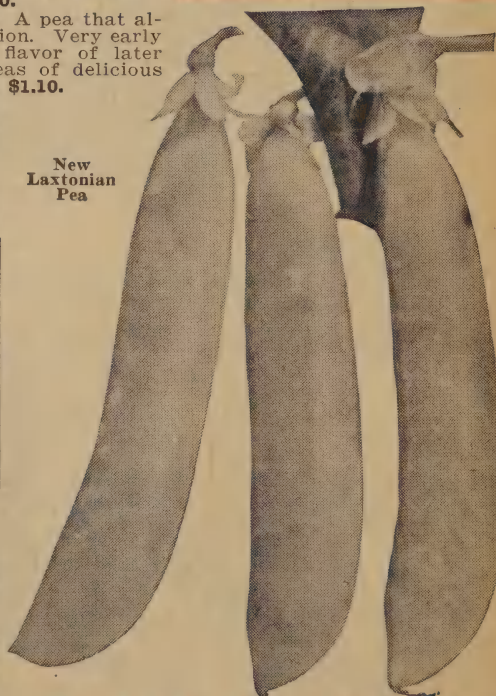

Pea Culture

Plant as early as anything in garden—light freezing does not hurt Peas. In the South plant two crops—early spring and fall; in the north make successive plantings about one week apart. Peas will grow on poorer soils than most crops. Smooth varieties are hardiest, wrinkled varieties of finest quality. Plant about 1 inch apart, 3 inches deep. 1 pound will drill 50 feet of row. You can double row peas about 8 inches apart spacing between double rows about 36 inches.

SPECIALS

463 Little Marvel. (18 in.) Home gardener's favorite. Exceptional in quality and yield. Pods well filled with tender peas. Extra early. Postpaid: D.G.B.P., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10. Not prepaid: 10 lbs., \$1.30. (Picture at left.)

468 Berry's Everbearing. A prolific and continuous bearing variety. Pods 3 to 4 inches long containing 6 to 8 large wrinkled peas of superior flavor. The best main crop or mid-season variety. Postpaid: D.G.B.P., 18c; 1 lb., 29c; 3 lbs., 80c; 5 lbs., \$1.20.

New Laxtonian Pea

Planting a big garden will aid us to quicker Victory, and save you up to \$200 on food costs. See pages 48 and 53 for details.

LETTUCE CRISP, HEALTHFUL AND DELICIOUS ALL THE TIME

Lettuce is a favorite vegetable because of its varied uses and vitamin and mineral content. You should plant early in spring as well as fall both leaf and head varieties. Head lettuce requires the cooler season and for large heads thin out to six inches apart. The approved Iowa Defense Garden Package for every American farm garden listed pages 49 and 53 contains 1 ounce. We suggest you order 2 D.G.B.P. of leaf varieties and 1 of Head Lettuce or 2 regular size packets. One D.G.B.P. plants 100 foot of row.

Heading Varieties

331 Crisp as Ice. Attractive bronze, glassy leaves. Heads solid, medium sized, well blanched and of delicate flavor. Popular for the home garden. Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

332 Improved Hanson. Unsurpassed for home and market garden use. Heads large and compact, tender and sweet, light yellow-green color. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

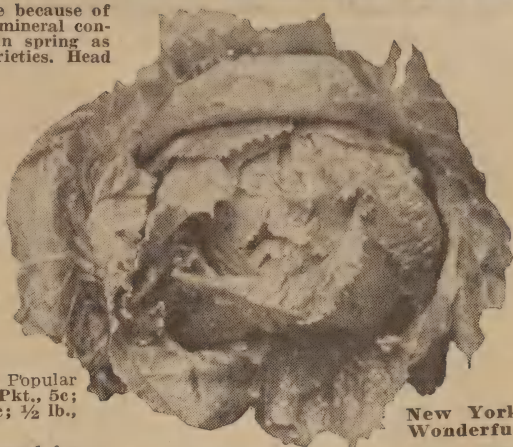

333 Selected Big Boston. A very popular variety for forcing; splendid shipper. Very solid heads, extremely tender. Leaves tinged with brown, heart light golden yellow. Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

334—California Cream Butter. A fine early heading variety. The solid heads are a rich golden yellow with a most agreeable and delicate buttery flavor. A good shipper and ready seller on the market. Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.45.

336—Iceberg. A large late variety. Conical shaped heads, of medium size, crisp and sweet, white interior. Outer leaves light green tinged with brown, crinkled. Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

335 Berry's Bountiful. Grows beautiful compact heads, weighing 2 to 3 lbs. Exceedingly tender, creamy flavor. A splendid variety for shipping. None excels. Postpaid: Pkt., 9c; D.G.B.P., 13c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75.

337 New York Wonderful. The outstanding shipping variety. Leaves dull green, heads large and solid, crisp and of excellent quality, fine flavor. (Pictured above.) Postpaid: Pkt., 8c; D.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., 90c; 1 lb., \$1.60.

New York
Wonderful

LOOSE LEAF VARIETIES

326 Black Seeded Simpson. A popular variety, leaves large, light green in color. Best for forcing. Tender. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 11c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

327 Early Curled Simpson. One of the most widely used for home gardens. Very early, non-heading, of excellent flavor. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 11c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

328 Grand Rapids. Excellent for early planting outside, and for forcing. Superior quality, beautiful appearance, leaves light green, heavily fringed. (Picture below.) Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

329 Early Prizehead. An early non-heading variety. Remains tender and crisp. Leaves medium green, light brown edges. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

Grand Rapids Lettuce

Fillbasket
Peas

PEAS—LATE VARIETIES

465 Fillbasket or Pot-latch. (26 in.) A superior late variety for home and market. Peas tender, fine flavored. Postpaid: D.G.B.P., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10.

473 Improved Stratagem. A favorite with home gardeners because of its large, handsome pods. Very productive. Pods long, well filled with large peas of delicious flavor. Postpaid: D.G.B.P., 18c; 1 lb., 29c; 3 lbs., 80c; 5 lbs., \$1.20.

474 White Eyed Marrowfat. (5 ft.) Vines hardy and productive. Pods large, peas of fair quality. Grown extensively for dry use. Postpaid: D.G.B.P., 15c; 1 lb., 23c; 3 lbs., 63c; 5 lbs., \$1.00.

475 Mammoth Melting Sugar. (4-5 ft.) The best of the edible podded sorts for home and market garden use, wilt resistant. Very tender and richly flavored. Postpaid: D.G.B.P., 19c; 1 lb., 31c; 3 lbs., 87c; 5 lbs., \$1.35.

LARGER YIELDS-BETTER QUALITY

2 D.G.B.P. of Pumpkin is enough for average needs. They will plant 30 hills in between the Corn or will drill 100 feet of row. Plant shallow when ground is quite warm.

On peppers we recommend 2 D.G.B.P. for average family needs. Plant the same as Tomato. See page 51.

PUMPKIN

481 Mammoth Prize. The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.**

483 Sweet, or Sugar Pie. Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.**

485 Kentucky Field. Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; D.G.B.P., 6c; oz., 8c; ¼ lb., 24c; ½ lb., 39c; 1 lb., 65c.**

486 Connecticut Field. (Picture below.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.**

487 Cushaw or Crookneck. Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.**

488 Large Cheese. Exceptionally early and uniform for early canners and market gardeners. An excellent keeper, making fine pies. **Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.**

489 Mixed. A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: Pkt., 4c; D.G.B.P., 6c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c.**

Connecticut Field Pumpkin

PEANUTS

Should be shelled before planting. Plant in rows 2 ½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

621 New Mammoth Virginia. Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 12c; ½ lb., 17c; 1 lb., 30c; 5 lbs., \$1.35.**

PEPPERS

510 Sweet Mountain. Plants very productive, growing upright, about 2 ft. tall. Fruits large, smooth, handsome. Green turning to rich red, when ripe. **Postpaid: Pkt., 6c; D.G.B.P., 12c; oz., 18c; ¼ lb., 60c; 1 lb., \$2.00.**

511 Large Bell or Bull Nose. Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor. **Postpaid: Pkt., 7c; D.G.B.P., 13c; oz., 20c; ¼ lb., 65c; 1 lb., \$2.15.**

515 Ruby King. Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes. **Postpaid: Pkt., 7c; D.G.B.P., 13c; oz., 20c; ¼ lb., 65c; 1 lb., \$2.15.**

517 Pimiento. A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild. **Postpaid: Pkt., 6c; D.G.B.P., 12c; oz., 18c; ¼ lb., 60c; 1 lb., \$2.00.**

512 Cayenne. A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red. **Postpaid: Pkt., 5c; D.G.B.P., 11c; oz., 17c; ¼ lb., 55c; 1 lb., \$1.75.**

519 Chili. Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot. **Postpaid: Pkt., 5c; D.G.B.P., 11c; oz., 17c; ¼ lb., 55c; 1 lb., \$1.75.**

518 California Wonder. One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 8c; D.G.B.P., 16c; oz., 25c; ¼ lb., 85c; 1 lb., \$2.75.**

513 Chinese Giant. One of the best mango peppers. Plants short, stocky. Fruits large, thick, meaty, of sweet flavor; color deep green changing to scarlet. **Postpaid: Pkt., 9c; D.G.B.P., 19c; oz., 29c; ¼ lb., 90c; 1 lb., \$3.25.**

514 Golden Dawn or Oshkosh. Of a beautiful golden yellow color. Very sweet, without the fiery flavor. Very productive. **Postpaid: Pkt., 9c; D.G.B.P., 19c; oz., 29c; ¼ lb., 90c; 1 lb., \$3.25.**

PARSNIPS and PARSLEY

Postpaid prices on all varieties: Pkt., 6c; D.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., 95c; 1 lb., \$1.65.

502 Improved Hollow Crown Parsnip. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. Keeps well.

503 Improved Guernsey Parsnip. Roots white, uniformly tapered. Extra thick crown. Flavor delicious.

495 Champion Moss Curled Parsley. Very compact plant, with very dark green leaves. Used for garnishing.

RHUBARB or Pie Plant

For Roots (See page 76)

Postpaid prices either variety: Pkt., 5c; D.G.B.P., 12c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75.
626 Victoria. A splendid variety for family use. Sometimes called "wine-plant."
627 Mammoth. Market garden variety, very large and a wonderful producer.

Ruby King Pepper

Hollow Crown Parsnip

ALL TESTED AND GUARANTEED SEED

RADISHES

Radish can be planted several times at intervals in early spring and again in the fall. Plant several different varieties. One D.G.B.P. will drill 50 feet of row. Plant $\frac{1}{2}$ inch deep, 1 inch apart in row.

526 Crimson Giant. The largest of early radishes. Suitable for early forcing or planting out-of-doors. It is always crisp, tender and of fine flavor. Never gets pithy. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

528 Early Scarlet Turnip. An early maturing variety. Roots small, round, skin red. Flesh very white, mild and crisp. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

530 Early White Turnip. The earliest white radish. Flesh pure white, crisp and tender. Has a short top and is a quick grower. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

532 White Strasburg. A variety popular with market gardeners. Roots about five inches long, thick at the shoulder, tapering to a point. Crisp and tender. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

533 French Breakfast. One of the most popular varieties, excellent for home garden, forcing or early outdoor planting. Excels in appearance and quality. Medium sized, olive-shaped. Scarlet with a white tip. Flesh white, crisp and delicious. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

535 Early Scarlet Turnip, White Tipped. A favorite for early outdoor planting. Fine in quality and appearance. Roots nearly round, carmine red, white tipped, crisp and mild. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 85c.

538 Improved Scarlet Globe. Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

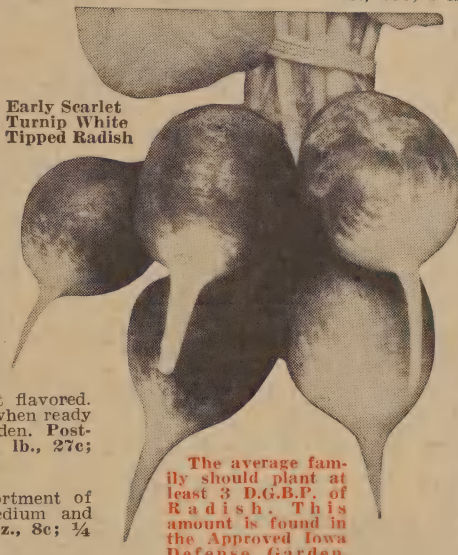

541 Icicle. The most popular white radish. Grow long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 27c; $\frac{1}{2}$ lb., 47c; 1 lb., 80c.

525 Sparkler. Resembles Scarlet Turnip White Tip, but more white and somewhat flattened on lower side. Very solid, crisp, tender and sweet flavored. Has short tops and does not become pithy when ready for table use. Excellent for the home garden. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 27c; $\frac{1}{2}$ lb., 47c; 1 lb., 80c.

540 Mixed. We offer an excellent assortment of the best varieties of radishes, early, medium and late. Postpaid: Pkt., 4c; D.G.B.P., 6c; oz., 8c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 45c; 1 lb., 75c.

725X Berry's Beat-em-all. (Illustrated page 52.) The crisp, snappy radish we all like. Extra early ready to eat in 15 to 18 days after planting. Sparkling red top with dainty white tip. A most superior quality radish for home gardens. Postpaid: Pkt., 15c; D.G.B.P., 20c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.25.

Early Scarlet Turnip White Tipped Radish

The average family should plant at least 3 D.G.B.P. of Radish. This amount is found in the Approved Iowa Defense Garden, page 53.

Roots white, flesh sweet and tender. Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; 1 lb., 85c; 5 lbs., \$3.75.

612 Rutabaga Improved Purple Top Yellow. A dependable variety. Roots large, round, yellow with purple top; flash light yellow, firm, sweet and tender. Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 15c; $\frac{1}{4}$ lb., 45c; 1 lb., \$1.25.

HERBS

Herbs have been previously imported. Growers are now trying to produce them in this country but on many crops this past year seed production was a complete failure. As long as available stocks last we can furnish packets only with exception of Dill.

683 Caraway. Seeds used for flavoring bread, pastry, meats and sauces. Postpaid: Pkt., 10c.

685 Dill. Leaves are used in pickles and flavoring soups and sauces. Postpaid: Pkt., 5c; D.G.B.P., 15c; oz., 25c; $\frac{1}{4}$ lb., 75c; 1 lb., \$2.50.

687 Sage. Leaves and tops used for seasoning and stuffing. Postpaid: Pkt., 15c.

693 Sweet Marjoram. Used for seasoning soups, sauces, etc. Can be used either fresh or dried. Postpaid: Pkt., 10c.

TURNIPS

Purple Top White Globe Turnip

Turnips are excellent for greens and keep well in pit storage. They should be planted both in early spring and fall. 1 D.G.B.P. will plant 50 feet of row. Drill seed about 2 inches apart—cover very lightly.

601 Purple Top Strap Leaf. Fine for table use or stock feeding; one of the most widely planted varieties. Tops medium small, roots four to six inches across, flat. Purple-red at the top; flesh white, fine grained and tender. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 25c; 1 lb., 60c; 5 lbs., \$2.50.

602 New White Egg. Fine for market gardeners. Roots egg-shaped, smooth. Skin is thin. Flesh is white, fine grained, cooks mealy and tender. Best quality. Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; 1 lb., 85c; 5 lbs., \$3.75.

605 Large White Globe. A very productive type. Large, globe-shaped, skin white and smooth. Valuable for home garden and market. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 30c; 1 lb., 75c; 5 lbs., \$3.25.

607 Purple Top White Globe. (Picture above.) Unsurpassed for home planting or truck gardening. Attractive in appearance, fine in quality. Roots large, globe shaped, lower portion white, upper-part purple-red. Flesh is of fine flavor, white, crisp and fine grained. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 25c; 1 lb., 60c; 5 lbs., \$2.50.

609 Cowhorn. Grown largely for stock feeding. Roots 12 to 15 inches long, tapering, often crooked. Flesh tender and mild flavored. A good keeper. Postpaid: Pkt., 7c; D.G.B.P., 10c; oz., 13c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.00; 5 lbs., \$4.50.

608 White Milan. An extremely early variety, used for forcing or planting outdoors.

Icicle Radish

is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

541 Icicle. The most popular white radish. Grow long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 27c; $\frac{1}{2}$ lb., 47c; 1 lb., 80c.

525 Sparkler. Resembles Scarlet Turnip White Tip, but more white and somewhat flattened on lower side. Very solid, crisp, tender and sweet flavored. Has short tops and does not become pithy when ready for table use. Excellent for the home garden. Postpaid: Pkt., 5c; D.G.B.P., 7c; oz., 9c; $\frac{1}{4}$ lb., 27c; $\frac{1}{2}$ lb., 47c; 1 lb., 80c.

540 Mixed. We offer an excellent assortment of the best varieties of radishes, early, medium and late. Postpaid: Pkt., 4c; D.G.B.P., 6c; oz., 8c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 45c; 1 lb., 75c.

725X Berry's Beat-em-all. (Illustrated page 52.) The crisp, snappy radish we all like. Extra early ready to eat in 15 to 18 days after planting. Sparkling red top with dainty white tip. A most superior quality radish for home gardens. Postpaid: Pkt., 15c; D.G.B.P., 20c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.25.

3 DELICIOUS SNAPPY RADISHES

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 650-35c value—only 20c, postpaid.

- 1 D.G.B.P. Berry's Beat-em-all
- 1 D.G.B.P. Crimson Giant
- 1 D.G.B.P. White Icicle

WINTER RADISHES

542 Chinese Rose. A winter radish; bright rose-red in color; flesh white, very firm. Keeps a long time when stored in sand. Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

VEGETABLE FAVORITES OF THOUSANDS

WINTER SQUASH

Winter Squash, particularly yellow fleshed varieties, is an excellent source of Vitamin A. Squash is also easily kept in dry storage. A family should have 50 pounds a year. We recommend 1 D.G.B.P. of Summer Squash and 2 D.G.B.P. of winter varieties. Plant in hills summer types about 4 feet apart, winter about 8 feet apart. One D.G.B.P. will plant 25 hills.

553 Mammoth Chili. The giant among squashes often weighing 150 pounds. The flesh is yellow, very thick, of good quality for stock feed. Also excellent for exhibition. Postpaid: Pkt., 5c; D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

554 Improved Hubbard. Standard winter variety for home, and market gardeners and the best for shipping. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 lbs., flesh very thick orange-yellow, fine grained, sweet and dry. Postpaid: Pkt., 6c; D.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35.

559 Kitchenette. Sometimes called Baby Hubbard, being about two weeks earlier. Color of shell a dark glossy green, weight about five pounds and a fine keeper. Flesh fine grained, delicious, golden yellow. Postpaid: Pkt., 6c; D.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35.

557 Table Queen or Des Moines. Desirable for home and market garden; also good shipper. Fruits acorn-shaped, smooth, thin-shelled, dark green, mature early. Six inches long, 3 inches thick. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well. Postpaid: Pkt., 5c; D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

556 Buttercup. A new introduction just the right size for baking. Of excellent quality, flavor is similar to sweet potato. Flesh dry, deep rich orange, texture and keeping qualities the best. Postpaid: Pkt., 7c; D.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

Improved
Hubbard
Squash

SPINACH

Every garden should have this famous health food. Important source of vitamins, calcium and iron. It thrives under cool, moist conditions so should be planted both in early spring and fall. The average family should plant 2-4 ounces so we don't list regular packet size as D.G.B.P. is the smallest you should order. Plant at least 150 feet of row about 1 inch deep, 2 inches apart. One D.G.B.P. will plant 50 feet of row.

581 New Zealand. It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but cannot stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid price: D.G.B.P., 8c; 1 oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00; 5 lbs., \$1.50.

582 Long Standing. A quick-growing, long-bearing variety for mid-summer use. Plants grow low and spreading, with pointed, dark green, intensely crumpled leaves. May be sown in spring or fall. Postpaid: D.G.B.P., 9c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

583 Bloomsdale Savoy. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green. Postpaid: D.G.B.P., 7c; oz., 11c; ¼ lb., 33c; ½ lb., 55c; 1 lb., 90c.

584 King of Denmark. Very desirable for canning and for market gardens. Leaves broad, rounded, very dark green, somewhat crumpled. An exceptionally long standing type, remaining in condition from one to two weeks. Postpaid: D.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

King of
Denmark
Spinach

SUMMER SQUASH

These 2 varieties: Pkt., 5c; D.G.B.P., 7c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 80c.

561 Mammoth White Bush Scallop. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

563 Giant Yellow Summer Crookneck. Widely used by market gardeners and shippers. Weight about 5 lbs. Flesh thick and yellow, of rich, meaty flavor.

565 Mixed Squash. The assortment you want. Has all standard varieties in our regular quality seed, both summer and winter varieties. Pkt., 4c; D.G.B.P., 6c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.

SALSIFY

571 Mammoth Sandwich Island. Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc. Postpaid: Pkt., 6c; D.G.B.P., 9c; oz., 15c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.50.

MAMMOTH SUNFLOWER

The sunflower seeds have a very high feeding value and are greatly relished by poultry. The Mammoth Russian is the largest of Sunflowers. Plant about the same as corn. If you have no field space to spare, plant them in corners, along fences, etc. Postpaid: D.G.B.P., 10c; ½ lb., 12c; 1 lb., 20c; 5 lbs., 90c. Write for special prices on larger amounts.

TOBACCO

Postpaid price on each of the following 2 varieties. Postpaid: Pkt., 8c; D.G.B.P., 15c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.10.

727 Havana. An early variety used largely for cigar wrappers, on account of the thinness and fine quality of the large leaves. Rich flavor.

728 White Burley. Broad attractive leaves. Easy to cure. Used for fillers and wrappers.

Vegetable Oyster
Salsify

MISCELLANEOUS

Some of the following are imported so seed supplies are short and only early orders can be filled.

676 Brussels Sprouts. Of the cabbage family highly desirable. Plants thickly set with firm cabbage-like balls, maturing successively. Postpaid Pkt., 10c; D.G.B.P., 18c; oz., 30c; ¼ lb., 90c.

690 Kale, Dwarf Green Curled Scotch. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid price: Pkt., 7c; D.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., \$1.35.

720 Okra, Long Green Poddled. The best variety that you can plant. Plants dwarf and very productive. Valuable for soups and stews. Postpaid price: Pkt., 5c; D.G.B.P., 7c; oz., 9c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 65c.

705 Collards, Georgia. A good substitute for cabbage which succeeds on poor soil, grown especially in the south. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 6c; D.G.B.P., 8c; oz., 12c; ¼ lb., 30c; ½ lb., 75c.

706 Broccoli, Italian Green Sprouting. Forms large head consisting of a cluster of small heads. Both stems and heads are cooked and served like cauliflower, but is of a more delicate flavor. Postpaid: Pkt., 10c; D.G.B.P., 18c; oz., 30c; ¼ lb., 90c.

695 Early White Vienna Kohlrabi. Dwarf variety. Excellent for home and market garden. Bulbs 2 to 3 inches in diameter, globular, flesh white and tender. Postpaid: Pkt., 10c; D.G.B.P., 25c; oz., 40c; ¼ lb., \$1.25.

696 Early Purple Vienna Kohlrabi. Desirable early dwarf variety. Bulbs globular with white, tender flesh. Price—Same as Early White Vienna.

1256 Ornamental Gourds Mixed. All of the popular varieties: Calabash, Orange, Jap Nest Egg, Dipper, Dishcloth, etc. Many sizes and colors. Postpaid: D.G.B.P., 10c; oz., 15c; ¼ lb., 45c.

BEAUTIFUL FLOWERS

Cost so Little and Mean so Much!

Beautiful Illustrated Planting Booklets Free

We can not mail conveniently with nursery orders a beautiful "Gardening Illustrated" planting book that costs 25c. We will mail it free with your nursery order for \$1.50 or more if you order 25c or more in flower seeds or a total order of \$1.75.

You can also get in addition a complete 80 page vegetable planting booklet free if you order 25c or more in flower seeds with your vegetable order or a combined total of \$1.75 or more.

Both booklets are mailed on request if you order Garden Seeds, Flower Seeds and Nursery Stock on the same order totaling \$2.75 or more.

Today we are living a faster life all the time. When we are doing more and on the go all the time, in our few moments at home etc. we do like to relax and really enjoy the beauty of life. Today in this war there is more reason than before to raise beautiful flowers. They'll help us to forget the cares and worries of the day. They cost very little but mean so much to everyone that sees them.

We suggest ordering especially our Special Large Size Flower Mixtures. Two or more will entitle you to beautiful illustrated planting booklets described opposite where you order with your garden seeds and nursery stock.

BERRY'S LARGE SIZE FLOWER PACKET MIXTURES

Finest Cut Flowers 16c
—Pkt.

NEW "Super Giant" ROSES

2 yr. S. —59c each; 3 @ \$1.69 postpaid.

2 yr. E.S.—69c each; 3 @ \$1.89 postpaid.

Extra large Bushes of the newest and best varieties at remarkably low prices. Others sell these same varieties, in small size at \$1.00 and some as high as \$1.50 each. Guaranteed one of America's greatest Rose values today.

GRENOBLE—Scarlet-erimson. Plant is very vigorous and the blooms come on unusually long stems, making it one of the best garden Roses for cutting. The buds are Crimson, but the open flower is brilliant red, almost scarlet, and a bed of Grenoble stands out like a fire. Easily one of the best reds.

PINK DAWN—A long well shaped bud of bright rose-pink with heavy textured petals, opening to a full flower with many small petals in the center. The plant is an exceedingly strong grower, with stout heavy stems and big foliage. A splendid flower for cutting.

CONDESSA DE SASTAGO—A delightful new Spanish Rose. The flower is a deep reddish copper on the inside of the petals with a reverse of deep yellow. An exceptionally strong grower and very free flowering.

McGREDDY'S YELLOW—A really fine rose and a very prolific grower and bloomer. Flowers are large and of a bright buttercup yellow of good form. Foliage glossy dark green with deep reddish green stems. This is truly one of our finest yellows.

MME. JULES BOUCHE—The large, beautifully formed buds are creamy white and open with a dainty flush of pink in the center of the flower, but this flush disappears. The sweet-scented white blooms, which come freely and singly on vigorous plants, are long lasting when cut.

NEW AMERICAN BEAUTY—The standard of excellence. Giant rose-red blooms on almost thornless plant. Very hardy and fragrant. The one rose that should be in every garden.

TALL HEDGES for Screens

Will Grow to
4 ft. or Higher
See Description

See Page 73 for Low Prices on Tree Seedlings for Windbreaks. These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

HONEYSUCKLE—BUSH. (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

12 to 18 in.—10 for 95c; 25 for \$1.95; 100 for \$7.25.
18 to 24 in.—10 for \$1.25; 25 for \$2.50; 100 for \$9.15.

RUSSIAN MULBERRY. A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4-5 ft. (when planted 15-18 inches apart), or allowed to grow to 12-16 ft. high (when planted 3-5 ft. apart).

12 to 18 in.—10 for 25c; 25 for 50c; 100 for \$1.35.
18 to 24 in.—10 for 30c; 25 for 60c; 100 for \$2.00.
2 1/2 ft.—10 for 40c; 25 for 80c; 100 for \$2.50.

RUSSIAN OLIVE. Another very useful, attractive, yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight, silvery grey hedge, kept pruned down to 4 to 6 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.

12 to 18 in.—10 for 40c; 25 for 80c; 100 for \$2.50.
18 to 24 in.—10 for 55c; 25 for \$1.10; 100 for \$3.50.

TRIMMED and NATURAL LOW HEDGES

IMPORTANT. Your Hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least 1/2 of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

PRIVET—AMOE RIVER NORTH. Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

12 to 18 in.—10 for 65c; 25 for \$1.35; 100 for \$4.69.
18 to 24 in.—10 for 79c; 25 for \$1.85; 100 for \$6.75.

PRIVET—CALIFORNIA. Similar to Russian Privet except that it is not dependably hardy north of St. Louis. In mild climates, it is almost evergreen.

12 to 18 in.—10 for 65c; 25 for \$1.35; 100 for \$4.69.
18 to 24 in.—10 for 79c; 25 for \$1.85; 100 for \$6.75.

BARBERRY—JAPANESE. A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

12 to 18 in.—10 for 60c; 25 for \$1.25; 100 for \$4.20.
18 to 24 in.—10 for 70c; 25 for \$1.45; 100 for \$5.15.

BARBERRY—Red. Like Japanese but with brilliant red foliage when planted in full sun.

12 to 18 in.—5, 55c; 10, \$1.00; 25, \$2.10.
18 to 24 in.—5, 80c; 10, \$1.45; 25, \$2.95.

SPIREA V. H.—BRIDAL WREATH. One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 in.—10, 65c; 25, \$1.35; 100, \$4.69.
18 to 24 in.—10, 79c; 25, \$1.85; 100, \$6.75.
2 to 3 ft.—10, \$1.20; 25, \$2.50; 100, \$9.35.

CARAGANA. Best ornamental Hedge for severe northern climates. Strong, upright, growing, thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

12 to 18 in.—10, 40c; 25, 85c; 100, \$2.85.
18 to 24 in.—10, 50c; 25, \$1.00; 100, \$3.15.

The above varieties listed under Tall Hedges are also ideally suited for windbreak plantings because of their quick growth. On page 75 we have them priced in larger quantities that will save you money. Plant these in combination though with slower growing Evergreen Seedlings which will make a more permanent windbreak for you. Get our Free Evergreen Circular for full details.

BERRY'S GUARANTEE SATISFACTION AT MONEY SAVING PREPAID PRICES

We have always guaranteed satisfactory quality. See page 75. This year we can assure you of more. Because we don't use expensive illustrative color pictures and free gifts you may not care about we can save you real money on the best quality nursery stock that can be grown.

In comparing our prices remember they are all prepaid. In ordering you can save then at least 20% over other nurseries who may have just as low a price but ship collect.

VINES

Strong 2 Yr. Plants for Rapid Vigorous Growth For Trellis, Arbors, Porches, etc.

33c each; 3 for 89c, postpaid

Vines with their luxuriant foliage and lovely blooms relieve the monotony of bare walls and give quick shade on porches and arbors.

BOSTON IVY. Best clinging vine for brick, stone, cement or stucco. 33c each; 3 for 89c.

HONEYSUCKLE—Scarlet Trumpet. A strong growing vine with bright red, trumpet-shaped flowers. 33c each; 3 for 89c.

ORIENTAL BITTERSWEET. Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby. 33c each; 3 for 89c.

HONEYSUCKLE—Hall's Japan. A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces. 33c each; 3 for 89c.

CLEMATIS—Paniculata. The hardy, vigorous growing Japanese Clematis. Covered with fragrant flowers in late summer and fall. 33c each; 3 for 89c.

WISTERIA—Purple. The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates. 33c each; 3 for 89c.

TRUMPET VINE—The Old Favorite hardy Trumpet Vine. Vigorous growing, hardy vine is covered with larger trumpet shaped, scarlet flowers in summer.

Some Vines of Special Beauty

SILVER LACE VINE. The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each, 39c; 3 for \$1.00.

CLEMATIS JACKMANI—Purple. A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each 70c; 3 for \$1.95.

CLEMATIS—Romona. Lovely, light blue flowers completely cover the plant. One of the most beautiful of all the Clematis. 70c each; 3 for \$1.95.

HONEYSUCKLE—Gold Flame. New, everblooming Honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each, 59c; 3 for \$1.55.

10 LOVELY ORNAMENTAL EVERGREENS

Black Hills Spruce Austrian Pine Colo. Blue Spruce Scotch Pine Am. Arbor-Vitae

BERRY'S EVERGREEN BARGAIN of the YEAR—all 5 and 6 year old trees up to 1½ ft. size

This assortment of varieties makes an ideal ornamental evergreen grouping in the lawn or around the corners of your home. The Pines and Spruces also make your best windbreak plantings. Think of it,—you've paid \$3.00 or more for evergreens not much larger—while here you get them for less than 30c as long as supply lasts delivered to your door.

2 of each variety in size pictured above. Colorado Blue Spruce 8/12 inches; all others 1-1½ feet. Black Hills Spruce; Scotch Pine; Austrian Pine; and American Arbor Vitae—10—5/6 yr. old Transplants—a \$6.00 value—only \$2.98 on early orders as long as supply lasts.

SPECIAL EVERGREENS FOR HOME PLANTINGS

Large Evergreens for Windbreaks

This special offer of twice transplanted windbreak stock is our biggest value of the year. We make this offer only on Scotch Pine and Norway Spruce as these two Evergreens alone make a fine two row windbreak. These extra large trees that cost so little may be planted in their permanent location, the Scotch Pine should be your outside row and the trees 8-10 feet apart. On the inside the Norway Spruce may be planted 14-16 feet apart.

SCOTCH PINE. Very hardy rapid grower that thrives on any type of soil. Needles are short, light green in color. Grows to 40-50 feet.

NORWAY SPRUCE. A very hardy rapid grower fine for windbreaks on the Northwest as it branches close to the ground and has dense foliage. Color is deep green and grows 60-80 feet in height. Lives 45-60 years.

WINDBREAKS

at LOW COST

from SEEDLING TREES

A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen and Forest Tree seedlings: to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost.

EVERGREEN SEEDLINGS

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location. For further planting instructions and windbreak ideas ask for our **Free Circular on Evergreens** giving a full description of all varieties also.

Berry's Evergreen seedlings are grown in northern Wisconsin. They are vigorous with a strong root system guaranteed to be hardy and adapted anywhere. We ship direct to you prepaid at proper planting time furnishing planting instructions and guaranteeing satisfaction.

25 each: Norway Spruce, Am. Arbor Vitae, Colo. Blue Spruce, Ponderosa Pine.

No. 722—all 100—4/6"—only \$1.98 postpaid.

TREE SEEDLINGS

These are more rapid growing than Evergreens so should be used in combination with Evergreens as they are not nearly so permanent as Evergreens.

Our tree seedlings are well rooted, hardy and vigorous. They are easy to start, planting instructions being furnished. We ship prepaid at proper planting time early in the Spring and guarantee satisfaction.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

GRAPES

5 OLD FAVORITES

Available in 2 grades. 1 Yr. No. 1 grade is an extra fine value at Berry's low prices. Often preferred for large vineyard plantings.

All 5 prepaid.	2	5	10	25
2 Yr. No. 1.	\$0.40	\$0.75	\$1.40	\$3.25
1 Yr. No. 1.65	1.20	2.75

BETA. The hardest of all grapes—consistent bearer of juicy black fruit for jelly, juice or wine. Rich, full flavored but rather tart for table use. Fine for Arbors.

DELAWARE. A red grape, very sweet and highest quality. Not quite as large size as Caco.

MOORE'S EARLY. Earlier than Concord. This large blue-black full flavored grape brings premium prices on any market.

NIAGARA. Enormous bunches of large greenish-white, sweetly flavored fruit. Best white for market—good shipper. Requires protection in severe climate.

WORDEN. Extra high quality blue grape of Concord type but clusters are often larger and the berries sweeter and of finer quality. Extremely hardy and productive.

5 NEW GRAPES

We offer these only in big strong 2 Yr. No. 1 vines. Extra well rooted for rapid growth and quicker crops.

First 4 varieties postpaid: 2 for 65c; 5 for \$1.50; 10 for \$2.85; 25 for \$6.25.

FREDONIA. Black. Destined to be America's favorite black Grape! Vigorous, productive and hardy. Large bunches of big juicy, deliciously flavored fruit—ripening 2 weeks earlier than Concord.

CACO. Red. The hardest red Grape. Vigorous grower, bearing young, heavily and regularly. Fruit is extra large, beautifully colored, sweet and juicy.

PORTLAND. White. Earliest of all Grapes! Large, white fruit with luscious, spicy flavor. Hardy and finest quality.

SHERIDAN. (An improved Concord). A promising late-keeping grape to extend the season of Concord. In many places under the same conditions as Concord, the plants have been found to be just as vigorous, healthy, hardy, and more productive. The bunches of Sheridan are larger and more compact; and the berries are firmer and as large as Concord; the flavor is sweeter and richer; the season is a week later and the grapes do not shell as readily.

GOLDEN MUSCAT. A new hardy Grape combining the extra high quality and distinctive flavor of the California Muscat Grape, with the largeness of Concord. The bunches are large and well filled. Berries are large, sweet, meaty and juicy. Vines are vigorous, hardy, and heavy bearers after the second year. Recommended for home or commercial plants. Prepaid: 65c each; 4 for \$2.35.

Berry's Give You the Biggest Nursery Values

We are fair to every customer regardless of the amount of order. 100% value in the best nursery stock America can grow. Accurate grades, true descriptions and a fair and square deal always is guaranteed you. Order with safety at Berry's. Prices are lowest and quality highest so don't delay—act now. Remember our Prepaid Prices save you 15-20% over other nurseries.

HIGHEST QUALITY-LOWEST PRICES

FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

BERRY'S PREPAY CHARGES

All orders are mailed, postpaid, except packages which are too large and must be sent Express prepaid. If your post office address is not your shipping point, please be sure to give name of nearest Express station.

FALL SHIPMENTS

In the spring of the year we ship orders at the earliest possible date or proper planting time, by postage or express prepaid. Detailed planting and pruning instructions for the care of each item ordered are enclosed with shipment.

With the main exception of Strawberries, Cannas, Dahlias and Gladiolus, we can ship all nursery stock in the fall for planting. Most items even in northern latitudes do just as well or better if planted in the fall than in the spring.

PLANT MORE FOR DEFENSE

National Health Defense Authorities urge increased home plantings of all fruit trees and small fruits. They say we need twice as much natural, protective food such as fresh fruits in our daily diet. You can grow Health as well as Wealth at home—protect yourself against rising living costs, have lots of vitamin-filled fresh tree ripened fruit all through the season—plenty to put up for winter—and a surplus to sell at Top-Market prices and a big Profit.

SAVE WITH SAFETY AT BERRY'S NEW PREPAID PRICES

STRAWBERRIES FOR EVERY HOME GARDEN

SURE CROP

BLAKEMORE

New, early market berry. Extra vigorous grower, heavy bearer, very drouth resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home.

SENATOR DUNLAP

Old reliable favorite for home or market. Strong, extra hardy grower—heaviest yielder of big, solid, red berries. Mid-season.

Above 2 varieties postpaid.

	50	100	300	500	1000
Postpaid	60c	95c	\$2.25	\$3.65	\$6.50

EVERBEARING

NEW GEM

A true everbearer with rich, full, sweet flavor. Fruit unusually large, extra firm. Highly recommended. Best plants—lowest prices!

GIANT MASTODON

The King of Everbearers. Extra large, extra heavy bearer, extra vigorous—the super strawberry. Starts bearing in 90 days. Big money maker. Berry's top grade.

Above 2 varieties postpaid.

	25	50	100	300	500	1000
Postpaid	55c	\$1.00	\$1.85	\$4.95	\$7.50	\$12.95

THORO-BREDS

FAIRFAX

A new variety that is making thousands of friends. It wins because of its greatly superior flavor and astonishing yields. Has produced over 5000 quarts per acre. Large firm berries. Bright red color. Excellent shipper.

PREMIER

Famous for flavor and huge crops in any soil or climate. Berry's plants are true early strain—heavy bearers; big red berries.

Above 2 varieties postpaid.

	50	100	300	500	1000
Postpaid	70c	\$1.25	\$3.00	\$4.50	\$8.00

No. W394—Seasonal Strawberry Garden—150 @ \$1.15 ppd. 50 Dunlap, 25 Blakemore, 50 Premier, 25 Fairfax.

GOOSEBERRIES CURRANTS

Delicious for pies, sauce, jelly or canning. Lots of fruit with no work. Extremely hardy, bear every year—disease resistant and long lived. Require very little room in the garden.

Prepaid Prices All Varieties

2 yr. No. 1.....	2	6	10
	\$0.55	\$1.45	\$2.15

CHAMPION. Good commercial variety. Strong, hardy, fewer thorns. Good for pies and canning. Color green.

DOWNING. Very large, light green, juicy berries of extra quality. Strong, vigorous, hardy. Commercial variety.

GLENDALE. The Glendale Gooseberry is "unique, in the regions to which it is adapted, because a single, mature bush often produces enough fruit for an ordinary farm family." Has been known to produce 10 or more quarts of berries on a single bush, sometimes growing as high as 6 feet.

IMPORTANT If you live in Michigan, Minnesota, Ohio, Wisconsin, New York, Pennsylvania or New England States, kindly send us the legal description of your land (taken from your Tax Receipt).

RHUBARB

Nature's best Spring tonic! You can't beat Rhubarb for tasty, snappy sauce and pie. Good for canning, too!

GIANT VICTORIA. ½ inch whole roots. 5 for 39c; 10 for 59c; 25 for \$1.10; 100 for \$3.00.

MCDONALD SEEDLESS. The best flavored Rhubarb you ever ate. The new Rhubarb that never goes to seed. Berry's send you strong divisions (part of a root with eyes) that quickly develop into big, strong, hardy plants.

RUBY RED. One of the best of the newer Rhubarbs. The stalks are brilliant ruby-red. The sauce is also an attractive red, sweet, and of a more pleasing flavor. It is propagated from divisions—blossoms but does not produce fertile seeds.

PRICES FOR ABOVE TWO VARIETIES

Divisions—Each, 45c; 3 @ \$1.15; 6 @ \$2.00.

ASPARAGUS

The Washington rust proof strain—best flavored, heaviest cropper, and longest lived of any Asparagus.

Berry's offer you choice of two sizes—either will thrive for you and both are unusual values at our low prices. The heavier grade usually bears bigger crops, quicker.

25 for \$1.35; 100 for \$5.00.

CUMBERLAND—Black

The favorite commercial Black. Never fails to bear big crop of extra large, glossy black Raspberries. Strong plants for best results—low cost!

NEW LOGAN—Black

The "Ace" of Blacks! Yields more fruit, larger and firmer. Bush extra hardy, very vigorous—resists drouth and disease. The best Black! Top grade plants—lowest prices.

SODUS

The newest and best of the Purple Raspberries. Fruit reddish purple, firm, and of extra fine flavor. Plants are vigorous, hardy, disease resistant and consistent, heavy bearers, early in the season. Very profitable for home or commercial planting.

FRUITS ESSENTIAL TO HEALTH

Under the Nutrition Program everyone should have a large berry patch from which to can liberal quantities. The average family needs 20 quarts per year so we would suggest at least 25 plants per family.

INDIAN SUMMER (See picture)

A new, almost everbearing Raspberry, producing two good crops each season. First crop same as Chief. Fall crop usually lasts until frost. Fruit is extra large, red, firm, of excellent quality. Very hardy.

Postpaid	5	10	25	100

Home Orchard $\frac{3}{8}$ " $\frac{1}{16}$ - $\frac{1}{16}$ "	52c	49c	46c	44c

VALIANT. Introduced in Canada where it is favorite of large orchardists. Considered by many better than Elberta—ripens two weeks earlier. As hardy as any Peach—and featured by many at higher prices. A large round, flesh yellow freestone peach of finest quality. Be sure to try it at our regular low prices.

CHAMPION. Hardest Peach. Large, creamy white with red cheek. Freestone. Very high quality—juicy and sweet. Tree vigorous and thrifty.

J. H. HALE. Earlier and larger than Elberta. Unusually fine flavor. Good yellow with red blush. Good keeper. Plant with other varieties.

POLLY. Originated in Iowa and considered the hardest peach. Yellow freestone of good quality. Tree vigorous and hardy and productive. Midseason.

HALEHAVEN. Best early freestone. Strong grower, very hardy—heavy bearer of fine flavored yellow peaches.

ELBERTA. Best known freestone, commercial variety. Yellow with reddish cheek. Excellent for canning.

EARLY ELBERTA. Freestone. Large golden yellow with red cheek. Yellow flesh, firm, juicy, luscious flavor. Hardier than Elberta.

SOUTH HAVEN. Large yellow freestone, attractive blush and yellow flesh. Ripens 10 days earlier than Elberta.

GOLDEN JUBILEE. Yellow freestone, firm, juicy, full flavored. Ripens 15 to 20 days earlier than Elberta.

BERRY PAYS ALL POSTAGE OR EXPRESS

PEARS 3 To 5 FOOT 41¢ EACH PREPAID 13 OR MORE

Pears are one of the easiest fruits to grow and thrive in any climates where other fruit grows. Plant at least 2 varieties for good cross-pollinization. All are good pollinators except Seckel and Mendel which are blight resistant.

Descriptions of Grades:	1 to 3	4 to 7	8 to 12	Over 12
Commercial $\frac{3}{4}$ " $\frac{3}{16}$ - $\frac{1}{16}$ "	49c	46c	43c	41c
Home Orchard $\frac{3}{8}$ " $\frac{1}{16}$ - $\frac{1}{16}$ "	59c	56c	53c	51c
Quick Crop $\frac{3}{4}$ " $\frac{1}{16}$ - $\frac{1}{16}$ "	72c	69c	66c	64c

DOUGLAS. Best for Middle West. Vigorous and hardy. Often bears second year. Considered blight proof. Fruit large, golden yellow with blush. Fine texture and flavor for eating or canning.

SECKEL (Sugar Pear). Medium sized fruit. Sweet and spicy. Hardy blight resistant. Young and heavy bearer.

BARTLETT. Favorite commercial variety. Heavy bearer of large, juicy, high flavored fruit. Strong growing tree—fairly hardy.

KIEFFER. Large, golden yellow, meaty pear for canning. Tree, extra hardy, blight resistant, and bears young.

MENDEL. One of the best of the near hardy Pears for canning. Favored in severe climates because of its large crops of big, flavorful fruit. One of the best for canning. Fruit keeps in natural storage until late winter. Blight Resistant.

HOME PEAR ORCHARD

A choice selection for all purposes—eating, canning or pickles. Our regular grade trees in both Commercial and Giant size as described on the right. 1 each of varieties listed above: No. W506C— $\frac{3}{4}$ ft. $\frac{3}{16}$ - $\frac{1}{16}$ "—5 Trees, \$2.00

Home Orchard $\frac{3}{4}$ ft.; $\frac{3}{16}$ - $\frac{1}{16}$ "	75c	72c	69c

CHINESE EARLY GOLDEN. Favorite commercial variety in many sections. Large, full flavored, heavy bearer.

MOORPARK. It is considered to be the best flavored. Best quality of all apricots. Fruit is extra large, round, deep orange in color, with a blush on the sun side. The flesh is firm, fine grained and fairly juicy. The fruit is unexcelled for eating fresh and commands a premium price on the market.

QUINCE
3-4 $\frac{1}{2}$ ft.— $\frac{1}{2}$ inch diameter. Each 79c; 4 to 7, 76c; 8 to 12, 73c.

CHAMPION. Fruit large, attractive and delicate in taste and flavor. Trees strong growing, vigorous and productive. Bear very young.

ORANGE. An old favorite for jellies and preserves. Full flavored, orange yellow. Tree is vigorous and hardy. Bears young.

BERRY TREES of EXCEPTIONAL QUALITY

Berry's give you 100% value and you're the judge. Every grade is described just as we guarantee you will find it. Honest descriptions—honest values. Remember this in comparing our quality with more colorful layouts. You pay for all the pretty pictures you see and gifts for other customers. The money we save you enables us to prepay our nursery stock shipments and save you up to 40%.

GIANT SIZE. 5 to 7 ft. tall— $\frac{1}{16}$ to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong $\frac{3}{8}$ to $\frac{1}{2}$ inch diameter—4 to 6 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3 to 5 ft. tall, $\frac{3}{16}$ to $\frac{3}{8}$ inch diameter. Extra value at Berry's lowest prices in years.

ECONOMY GRADE. In Peach Trees, we offer this smaller size—2 to 3 ft. tall, $\frac{3}{16}$ inch caliper (diameter), lightly branched trees. Recommended for larger Orchards in warm climates

BURBANK

Hardest, best yielding Japanese Plum. Fruit good size, bright cherry red. Luscious flavored.

GEEMAN PRUNE—EUROPEAN

A vigorous grower producing large crops. Large dark purple fruits, very juicy and sweet.

STANLEY PRUNE

The most profitable Plum for commercial or Home Orchards. Earliest Prune, insuring top prices. Hardest European variety. Consistent bearer of large, blue, richly full flavored fruit. Freestone, sub-acid. Best for eating and canning.

HARDY AMERICAN VARIETIES

These vigorous varieties listed on the right are the hardest of all fruits—will grow well and bear big crops anywhere. The best pollinators are marked "P." Plant at least 2 different varieties for cross pollination.

ELLIOTT—P

Large, yellow meated; sweet peach-like flavor; freestone. Orange yellow with red cheek. Trees are very hardy and vigorous—bear big crops in August each year, even under adverse weather conditions. Very desirable.

SAPA—P

Early, heavy bearer of rich purplish-black Plums of medium size. Extra hardy. Juicy. Good for jelly, preserves.

UNDERWOOD

Heavy bearer of large, red, juicy, full flavored. Plums excellent quality. Early.

WANETA—P

The largest, most attractive and highest quality of the red Hardy American and Hybrid Plums. Vigorous, extra hardy and big cropper. Mid-season.

SUPERIOR. A new Minnesota plum introduction. A very large deep red plum as large as the California plums and as good or better in flavor. Flesh is firm, fine grained and juicy and the fruit can be peeled as you do a peach. Very hardy, bears big crops and thrives even in the far north. Tree is very vigorous and upright spreading in habit.

RED WING. An unusually large, dull red Plum developed in Minnesota. Flesh is rich yellow, firm, juicy and sweet. The skin can be removed easily and the pit is so free that the plum may be sliced like a peach. A fine home orchard variety for dessert or home canning. The tree is hardy and vigorous.

PLANT PLUMS THIS YEAR! BIGGER TREES—LOWER PRICES

Plums are one of the easiest fruits to grow. Big crops of luscious fruit to eat or can the second year after planting. Under our Nutrition Program for Defense it is recommended the average family have at least 25 quarts per year. They are fine for canning or plum butter.

Plums are very low in price in comparison with other fruit trees. Get your order in early though as stocks are limited and choose at least one good pollinator (marked P) in planting two or more varieties.

"BEST 10" Home Orchard

Selected by our customers and recommended by State Experiment Stations as being the 10 best varieties for the Home Orchard. Plenty of Apples, Cherries and Plums for eating, canning or jelly all season. See also page 80 for description of varieties and sizes.

SCHMIDT'S BIG. Favorite commercial Sweet Cherry East of Rockies. Fruit is large, deep red, excellent flavor, juicy.

BLACK TARTARIAN. Very large, purplish-black cherries of finest flavor. Rich and juicy. Popular in the east.

BING. Unusually large, heart-shaped, dark maroon fruit that is extremely attractive for market. Flesh is firm and juicy, full of rich, delicious flavor. Vigorous grower. Ripens in late June.

YELLOW GLASS. Large golden yellow fruit, firm flesh and the most delicious sweet flavor. The tree itself is a beauty, growing 30 ft. tall.

BERRY'S FINEST APPLES

AMERICA'S
FAVORITE FRUIT

3 to 5 FOOT
1/2 INCH DIAMETER

Description of Sizes

GIANT SIZE. 5/7 ft. tall—11/16 to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong 9/16 to 11/16 inch diameter—4/6 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3/5 ft. tall, 7/16 to 9/16 inch diameter. Extra value at Berry's prepaid prices that save you at least 20%.

A SURE MONEY CROP—WINTER APPLES

DELICIOUS YELLOW. Considered even better than Red Delicious. Superior in flavor, texture and keeping qualities. The very best golden apple.

DELICIOUS NEW RED. America's sweetheart! Supreme in flavor, texture and keeping qualities. Young bearing. Thrive anywhere.

MCINTOSH. Red. Extra hardy, strong long lived tree. Fruit uniformly well shaped and colored. Juicy, full flavored. Especially recommended for Northern States.

STAYMAN'S WINESAP. The extra large, hardy Winesap. Fine for eating or cooking. Good keeper.

NORTHWEST GREENING. Keeps until Spring. Excellent for eating or cooking after Xmas. Tree—hardy, bears young.

JONATHAN—Dark Red. Most profitable apple for Middle West. Heavy, consistent bearer of rich, juicy, tart, good keeping apples.

NORTHERN SPY. Large, tender delicious fruits. Bright red color suffused with a delicate bloom. Very popular.

ROME BEAUTY—New Red. Favorite commercial apple. Bright Red. Excellent keeper. Fine flavor for both eating and cooking.

RED WINESAP. Large, very dark red, full flavored. Excellent for eating or cooking. Keeps until May. Best Winesap for home or commercial orchards.

GRIMES GOLDEN. Golden yellow apple with firm, white flesh, and sparkling, cidery flavor. Favorite for home and orchard planting. Not recommended in severe climates.

For a special Home Orchard to comply with Government's Nutrition Program for Health and Defense order "Best 10," page 79.

ALL FRUITS SHORT

Nursery stocks of fruit trees are smaller than usual because of the Armistice Day freeze one year ago. The demand for replacement of home orchards will be heaviest this year. Now is the time to replant, but don't delay ordering. With limited stocks prices will advance and many varieties in northern grown stocks will be sold out. All fruits are essential in our daily diet for good health. They are in demand and a surplus will be easily sold at a good profit. We guarantee to save you money and give you satisfaction. Order today.
